FUN Begins In Orlando

Better Date Morgans Strong

Dealers are in Orlando attending the 57th annual FUN show and looking for the first chance at acquiring fresh deals. Scarce, rare, and high-end material remains at the top of the list. Problem-free coins with eye appeal and material of premium quality for the grade in addition to those with an interesting story are desperately needed. Quite a selection of such coins will be offered by Heritage, the official auctioneer of the FUN show. While one might expect Florida to be warm, temperatures in Orlando have been remarkably cold, but the forecast for the remainder of the show calls for much more comfortable weather. Running the same dates as the FUN show, January 5-8, is the 40th annual New York International Numismatic Convention which has expectations of possibly garnering \$100 million in auction prices realized from the nine companies participating. Even with all this action, the sight-unseen market remains fairly active with a number of transactions taking place through the dealer-to-dealer trading networks. Usually, just prior to and during a large show, many dealers will deactivate or reduce their live sight-unseen Bids so as to not to be overextended, reserving funds for any sweet deals that may come their way.

The Silver Commem series is contending with another bout of volatility, but there are positive results along with the negative. Bay Bridge issues in MS63 and MS64 are sought now at slightly higher Bids, while comparably graded Spanish Trails are again in a sluggish mode. Most noteworthy is that Booker T. Washington PDS Sets in MS67 are heating up, especially those in PCGS slabs. Sets of this quality are really in very short supply with only two Sets even possible for half of the issues. Bids for these three Sets ('47, '48 and '50) are now rising dramatically to reflect their much higher demand. Bid jumped by \$1,000 this week for the 1947 Set, which consummated a near 50% increase since early last year. Gold Commems are the beneficiary of increased Bids for \$2½ Pan-Pacs in MS62 and MS65, making good recoveries. Market participants expect very strong prices realized for many of the extraordinary Classic Gold and Silver Commems offered at the FUN auction, and they will be revealed this weekend along with those of so many other highly watched items in anticipation of an auspicious beginning this year for the coin market.

A noticeable surge in demand for better-date Morgans in MS61 thru MS64 is overshadowing the declining interest for many of the more common-date issues of the series this week. 1892-O Morgans jumped by 12% in MS63 to \$290, followed by the 1904-S with a 5% up-tick to \$1,360 in MS61. Generic Morgans in MS65 and better grades appear to be taking a back seat to allow these lower quality but scarcer issues to drive the

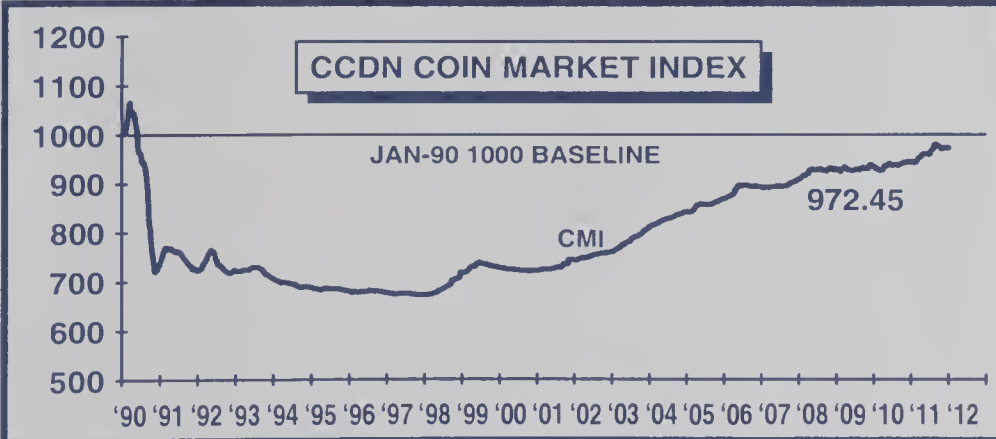

cartwheel market now. This same assessment applies to Peace Dollars, as the prevalence and positioning of plus signs within the MS63 and MS64 columns suggests. This shift towards scarcity could indicate increased participation among the more date conscious collectors within this market segment.

Despite their scarcity, PCGS graded Draped Bust Dimes, Heraldic Eagle, fell somewhat short of expectations during recent auction sessions and are now \$1 000 lower in MS64. Barber Dimes in PCGS PR61 fell by \$20, while Bids for Three Cent Nickels in NGC PR65 and PR66, each of which had remained relatively stable throughout most of last year, posted respective declines of \$10 and \$35. Meanwhile, added appeal for Liberty Seated Dollars With Motto in PCGS PR65 elevated Bid for these issues by \$500.

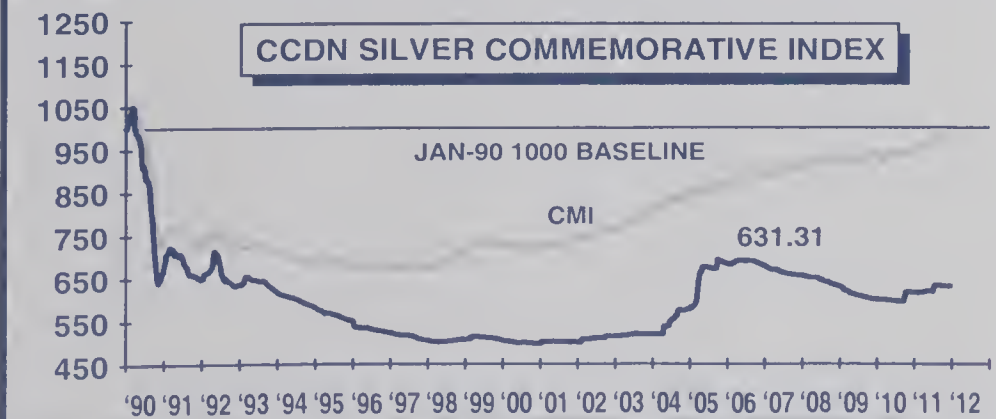

The very early and key-date Buffaloes are all sitting tight for now as only the 1928 in MS63 fell back by as much 10% this week, while the 1930 in MS66 slipped further as well, as Bids for their NGC slabs have been reduced by 27% since early last year. Not much agitated the sight-unseen Mercury Dime segment this week as Bid for every NGC issue held steady amidst the backdrop of the FUN show excitement and related trading activities. Only two PCGS graded issues, the 1920 in MS65FB and 1939-D in MS66FB, receded moderately in reaction to their less than expected on-line auction results.

Early and key-date Walkers are still being swooped up at current Bid by anxious participants who remain undaunted by the recent turbulence occurring within this segment. However, some late-date issues are still losing steam, particularly the 1946-S, 1947, and 1947-D, all of which dropped in MS64 by as much as 11%. Bid for the popular 1947-D in NGC MS67 continues on its volatile path, with a decline of \$500 this week due to discounted trading.

Gold Spot is now at \$1,619 per ounce, up a hefty \$53 from where we closed 2011, yet Gold Type is still soft with ample supplies available. Gold bugs remain loyal to the yellow metal but averse to offering any real premiums for most generic Gold Type material. This segment may not be much of a screamer, but it is expected to sustain itself as somewhat of a barometer for economic conditions as they relate to the overall coin market. Generic \$20 Saints in MS64 thru MS66 remain under pressure from volume trading at discounted levels. Despite this, high expectations persist with regard to final auction results due to be reported by Heritage's disposition of the several rare-date specimens deriving from the famed Duckor collection.

WALKING LIBERTY HALVES

If your coin will stand on its own merits regardless of the certified grade, a higher *CDN Bid* may be more indicative of current market value.

CAC Celebrates 4th Year!

CAC proudly celebrates it's fourth year serving the numismatic community. Since it's birth, CAC has increased confidence in the rare coin market by setting a higher standard for grading coins. In short order, they have examined over 300,000 coins valued at \$1.5 Billion while providing liquidity to the market, purchasing over \$225,000,000 of coins. Imagine what lies ahead as CAC pole vaults out of infancy!

Before CAC, prices for the solid quality coins were tethered to their lesser quality counterparts, thus holding down the market. With CAC, only coins which meet stringent standards for quality within a grade are awarded a CAC sticker - making it easy to identify coins that are solid for the grade.

Another FUNtastic Show In The Books Copper Spies Higher Buys

If the FUN show success is any indication of the quality of the year to come, the numismatic fraternity should be in a generally strong position. With over \$70 million in combined prices realized from the Heritage auctions, the glut of this total came from the US coin sessions at nearly \$56 million. Two coins encapsulated by PCGS and approved by CAC each sold for \$1.38 million at auction in Orlando: a 1793 Chain Cent graded MS65BN, and an 1829 Large Date Half Eagle in PR64.

While very rare material is fetching record-setting prices at major auction events, the less scarce and, especially, generic material, is becoming vulnerable to precipitous declines caused by discounting, and sell-off actions often induced by ill-liquidity and cash-flow difficulties that consequently arise due to a sluggish economy. Silver Commems continue to appear most prone to the pressures of these drawbacks. This week, 1936 Oregon and Spanish Trail issues in PCGS slabs are down in a succession of various Mint State grades. A few better NGC Commems continue to receive sight-unseen Bids up to 28% higher than their PCGS counterparts including Hawaiians and Missouri 2x4s. A number of Gold issues, mostly \$1 denominated, are getting hammered once again as a result of poor auction performance and wholesale weakness pervading this series. No significant upward or downward movement within either the Morgan or Peace Dollar segments can be reported other than a 7% reduction in Bid for key-date 1886-O issues graded MS63 by NGC and a few moderate declines posted among some common date PL Dollars. All Peace Dollars remained firmly in place, while NGC graded 1921 examples in MS61 and MS63 recovered their mild losses from the past month. As many as twelve individual lots of CC Dollars in sealed, unmarked GSA boxes will be auctioned off by Stack's Bowers during its Americana Auction event in NYC, January 24-26, an unusual offering for those who really like surprises.

Early Copper Type is on the rise again, as well as Bronze and Copper-Nickel Indian Head Cents along with Matte Proof Lincolns. Draped Bust Large Cents in MS62 are sought-after in all color combinations by way of higher sight-unseen Bids. Coronet Large Cents in NGC MS64RB are up by nearly 50% and 1859 Indian Cents in MS64 rose by nearly 40% since a year ago. Standing Liberty Quarters are getting softer, with the 1923 in MS65FH tumbling by over 25%. NGC graded Three Cent Nickels in PR65 and PR66 fully recovered their respective losses of three weeks past, but Liberty Seated Dimes With Arrows ('53-'55) in PCGS PR64 have dropped to \$10K after a less than desirable auction outing. Bid for Type I 1913

Buffaloes in NGC MS66 increased by \$5, but 1923-S issues in the same grade column fell back by 11% this week, as sight-unseen activity within this segment remains fairly subdued compared to others. The Stack's Bowers Americana Sale will feature some incredible Buffalo Nickels, including a 1937-D 3-Legged example in PCGS MS66 with a combined pop of 23 with only 3 finer, and one of only two approved by CAC in this grade.

Better-date Mint State Merics with Fully Split Bands did extremely well during Heritage's FUN show auction, especially those with CAC stickers. This segment is still able to draw Bidders who are willing to pay premiums for exceptional examples with eye appeal when they arise, despite periods of limited activity at the wholesale level. As can sometimes happen to a scarce key date issue that, for whatever reason, falls short of expectations at auction, the 1921-S Walker in PCGS MS65 slid by \$7,000 this week resulting in a 9% drop. A number of pre-war issues in various Mint State grades are edging moderately higher. The Stack's Bowers Americana Auction will feature The Walking Liberty Tribute Collection, an extensive assemblage consisting of mostly late date, short-set component specimens, but of exceptional condition-rarity quality.

Prospects of more quantitative easing by the Fed and continuing financial turmoil pressuring the Euro to its lowest level against the Dollar in almost five years are seen among the variables causing Gold Spot to move higher, now, once again, just above the \$1,650 per ounce level. Generic Double Eagles in most Mint State grades are reacting accordingly.

Heritage reported that the sale of the Duckor collection of 52 \$20 Saint-Gaudens garnered \$5.68 million, averaging nearly \$110,000 per coin. In addition, 33 of these coins set or tied record prices paid at auction. Those somewhat elusive \$3 Indian Princesses graded MS65 by NGC are still heading south and are now below \$10,000 again, while those highly revered \$4 Stellas in PR67 are down by an average of 8% this week.

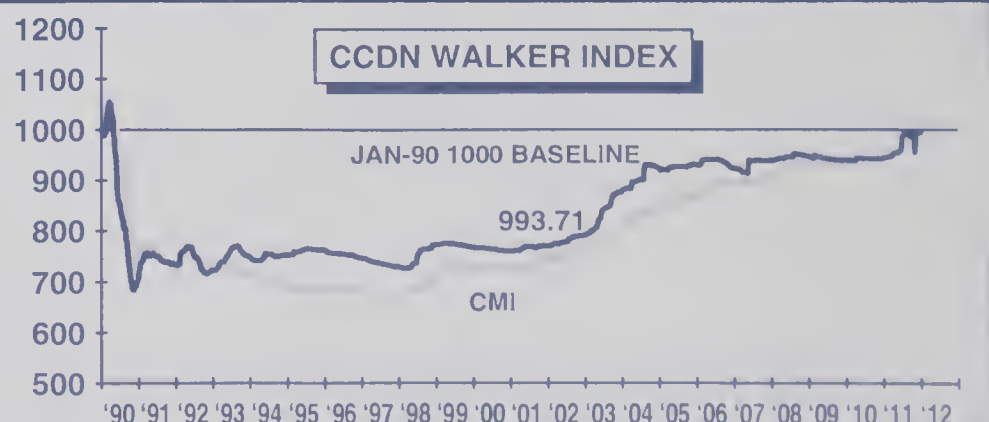

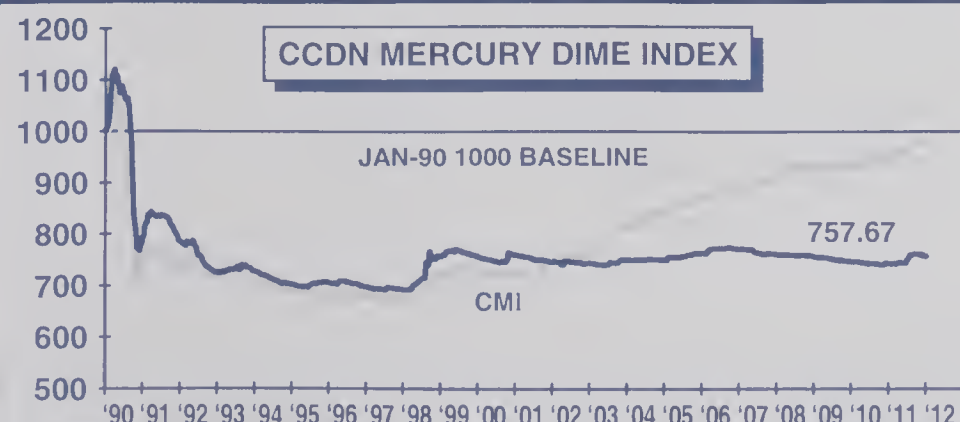

At the PCGS grading contest during the FUN show, a participant won by correctly grading eight out of twenty coins. Actually, there was a three-way tie, but the victor got the edge by being only a half point off for two coins. These competitions will continue at the Long Beach shows, held three times a year. At the next Expo, held February 2-4, kids will also have a chance to test their grading skills scheduled for Saturday, with the winning young numismatist receiving an MS65 Morgan Dollar.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity, nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupportable Bid. Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary according to the needs of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

NGC Price Guides

Get an expert and independent view of the value of World and US coins, including trend lines and comparative charting.

NGC Collection Manager

Track your entire collection—want list, value, storage, certification numbers, insurance reports and much more.

NGC Registry

Understand point values for coins and registry demand in the marketplace, then share your collection and compete with other collectors in the world's largest registry.

Collect with Confidence—Combine the protection and security of NGC certification with the market insight of NGC's web resources. Get all the information you need to make informed buy/sell decisions. To learn more about the one website you must visit before you make your next purchase, go to NGCcoin.com/Insight

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Prooflikes.
Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

Can You Afford to be out of the Loop?

Information is Power. Join the Future of Electronic Coin Trading.

Introducing CoinPlex - a revolutionary coin trading network exclusively for dealers. Now you can take full advantage of real-time bid and ask values on all coins graded with PCGS+ and NGC+ designations with or without a CAC sticker. In addition, CoinPlex offers an unrestricted bidding platform for generics like Morgans, Saints and Libs.

The CoinPlex network puts a wealth of real-time information at your fingertips. As a member, you can browse the results from all of the major auction firms, review CAC population data, bid on and list coins, and instant message other members. What's more, for a limited time Charter Membership is available at the guaranteed low price of \$100 per month.* You can opt out at any time without penalty.

With all of the benefits membership in the CoinPlex network offers, can you afford to be out of the loop? Join today as we build the best market possible - together.

* Price guaranteed for three years. Cancel at any time without penalty.

newsletter

CCDN — a weekly report on the Sight-Unseen certified market published by the Coin Dealer Newsletter (est. 1963)

Vol. XXVII No. 3

January 20, 2012

Single copy price \$5.00

Replicas Removed From eBay Better Buffaloes Behave Poorly

The sight-unseen market is fairly robust, up 14% from one year ago with \$1.23 million in trades through CCE since the year began. Generic Gold Type and common date Morgan and Peace Dollars make up most of the action, as has been the case for some time now. However, this week, quite a few Silver Commems changed hands including a number of PCGS Plus grades.

A flurry of higher sight-unseen Bids for Silver Commems injected some positive energy into this segment. Antietam examples in MS65 and MS67 were among those getting a fair boost, as Bid for those in the latter grade increased by 8%, and Spanish Trails in MS63 thru MS66 are appearing less precarious after sustaining losses during the past two weeks. Booker T. Washington 1950 PDS Sets in PCGS MS67 increased \$100. These Sets, of which only two can be assembled, have been steadily rising since early last June, and are up now by a hefty 22% since then. However, Bids for a number of CAC approved issues, especially Gem Texans, are drifting lower for the second straight month. Within Gold Commems, Pan-Pac Dollars in PCGS MS63 posted a \$10 decline, while 1903 McKinley \$1 examples in MS65 CAC are \$100 lower since we began publishing CAC/Plus sections last November.

Buyers for S-Mint Morgans (1879-1882) in MS66 are back and are willing to pay \$290 sight-unseen as they were at the end of last year. New Orleans minted 1904-O issues in PCGS MS66 are down once more, resulting in a cumulative decline of 24% for these cartwheels since mid-May, when they were Bidding sight-unseen for \$380. Another 1921 Chapman Proof Morgan is up for grabs through the Goldberg's Pre-Long Beach auction, this one graded PR64 by NGC, and a splendid 1921 business-strike Morgan graded MS65DPL by NGC, one of only seven specimens graded as such by both services with none finer, is sure to set the stage on fire with heated Bidding during this event. First year of issue Peace Dollars in PCGS MS64 lost 8%, while Bids for the common dates in MS66 all shed \$30 this week.

CAC approved Classic Head Large Cents in MS64BN thru MS66BN are 15% higher on average since last month. Some negativity arose within the remainder of the Mint State Type segment, particularly among a few varieties of Liberty Seated Dimes within the NGC MS61 and MS64 grade range. Barber Dimes in PCGS MS64 gave back nearly all their gains from last year with a \$30 drop this week, and comparably graded Barber Quarters are reduced by that same amount. Three Cent Nickels graded PR66 by NGC can't seem to maintain steadiness,

fluctuating these past few weeks only to fall back by 10% since late December. Barber Quarters graded PCGS PR64 slid further this week as well, and are down by 7% to a Bid of \$775.

It was an ugly week for the Buffalo Nickel segment, which is experiencing quite a bit of carnage due to highly disappointing auction activity. Sharp declines resulted again for a number of issues, largely in the MS66 column. The bottom seems to be falling out from under those 1923-S issues, which sustained a double-digit Bid reduction for the second straight week, and are down by 21% in just a two week period, while 1925-S issues tumbled by an average of 15% this week alone.

Common date Mercury Dimes in MS66FB and MS67FB are benefiting from greater demand by way of higher sight-unseen Bids, while a few slightly better dates in these grade columns are in moderate decline. PCGS graded 1938-S in MS67FB fared poorly again during recent auction activity, losing 21%. Goldberg's Pre-Long Beach auction will feature a very scarce and pretty 1918-D, graded MS65FB by NGC. This coin has a combined pop of just 27 with only 3 finer, less than half that of a comparably graded

1916-D, and Bids for nearly three and a half times less.

Officials from eBay met with PNG dealers at the FUN show in Orlando to establish policies to ensure the coin buying experience on the site remains an effective destination. One of the first updates as a result of this collaboration is to ban the listing of coin copies and replicas, beginning February 20. This is the first of a multi-step process to alleviate counterfeits that reportedly involves the Secret Service. Coins listed on the site were clearly pictured with the word "COPY" stamped on it, yet the delivered coin, often sent from China, would not, and therefore be considered an illegal counterfeit.

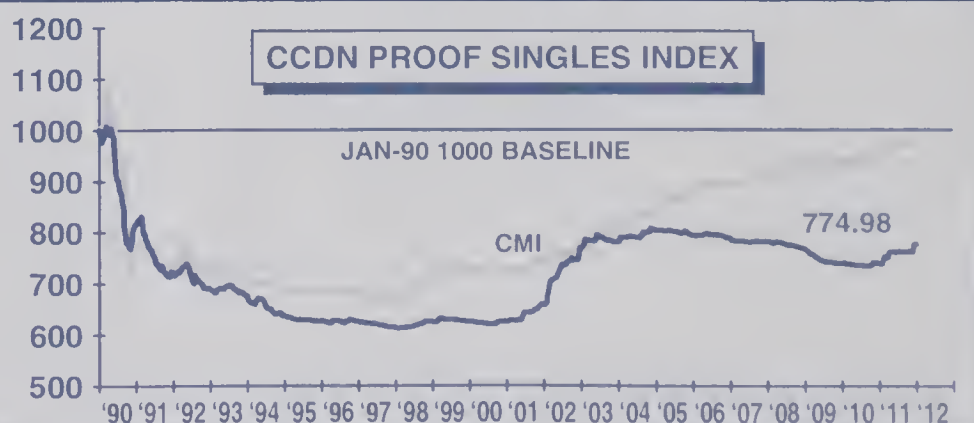

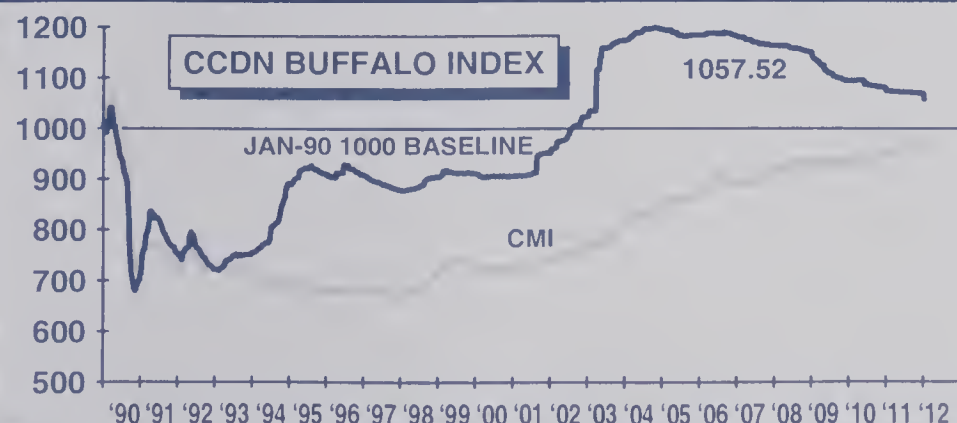

The Long Beach Expo is up next, scheduled for February 2-4, with an auction by Heritage. Ira and Larry Goldberg will hold a Pre-Long Beach sale in Los Angeles, January 29-31 (see a few of the many highlights herein).

The Certified Coin Dealer newsletter (the *Bluesheet*) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity, nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDn may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an upper price level. Asks, Trades, and prior levels are reported as they appear. CCDn uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Greatest Gold Mine of Coin Data - Yours **FREE!**

CAC's POP Report puts all the data you need at your fingertips

CAC-stickered coins give you confidence. That's because we verify previously graded coins and award our green sticker only to those that are at minimum "solid" within their grade. Data for each of the stickered-coins is maintained in an elaborate online database, where you can easily verify any CAC coin.

Now, all of the data is compiled in CAC's Population Report – an absolute "must have" if you are active in today's rare coin market.

Novices and advanced collectors alike can now access up-to-date, comprehensive data on all CAC-stickered coins, free of charge, by visiting our website at www.caccoin.com.

It's easy to identify coins that are solid for the grade - just look for the CAC verification sticker. And now there's an easy way to access a gold mine of CAC coin data, the FREE CAC POP report.

West Coast Expo On Horizon

Auction Anticipation Amplified

Precious metals have made a move to higher ground with Gold at \$1,726-a level not seen in over six weeks. Silver is up to \$33.70 an ounce, 24% higher in less than a month. These recent spikes come on the heels of the FED's decision to leave the current federal funds rate at 0.025% as well as their prediction of ongoing subdued economic activity.

On-line auctions and dealer websites have proven themselves to be double-edged swords for certain material. On one hand, these website resources allow for more material to be seen and made available with greater frequency while, on the other hand, the increased availability of such material places downward pressure on prices. Both Silver and Gold Commems continue to bear the brunt of these consequences. California Halves in MS62 and Lincoln issues in MS61 thru MS63 slid mildly lower, while Lexingtons and '36-D San Diegos, both in MS65, were reduced by a respective \$25 and \$10 this week. 1905 Lewis & Clark Gold Dollars in PCGS MS65, which have been declining precipitously over the past year, are down by another \$450. This is largely due to poor auction performances at retail auctions, and these Commems with a combined pop of 356 in Gem are now Bid \$5,200 in either slab.

A few slightly better-date Morgans in PCGS MS61 thru MS63 including a couple Choice DMPLs are being lured in for the taking at moderately higher Bids, but there was little noteworthy movement in either direction for the series this week. Peace Dollars are continuing in an apparent downward trend, especially common date NGC issues in MS63, as Bids for a few generic and better date issues in various Mint State grades descend mildly lower while averting any drastic set-backs. Mint State and Proof Type material remains virtually unchanged for the week, perhaps indicative that a higher level of involvement can be expected among market participants in the upcoming West Coast show and surrounding auctions. On-line Bidding activity among those vying to acquire much of the Type material that the Goldbergs and Heritage will be offering, just before and during the Long Beach event, already appears quite competitive. Increased interest in early Copper, Draped and Capped Bust, as well as Liberty Seated material of various denominations is expected to foment a good amount of enthusiasm on the bourse floor and at auction.

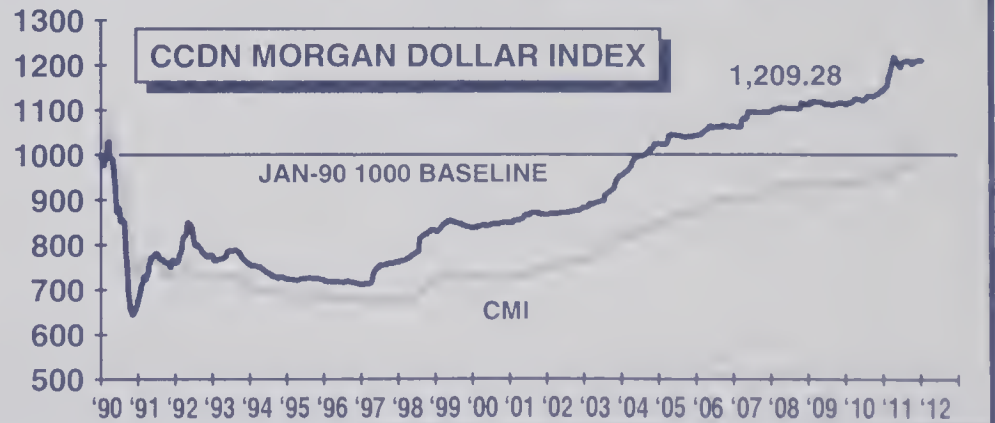

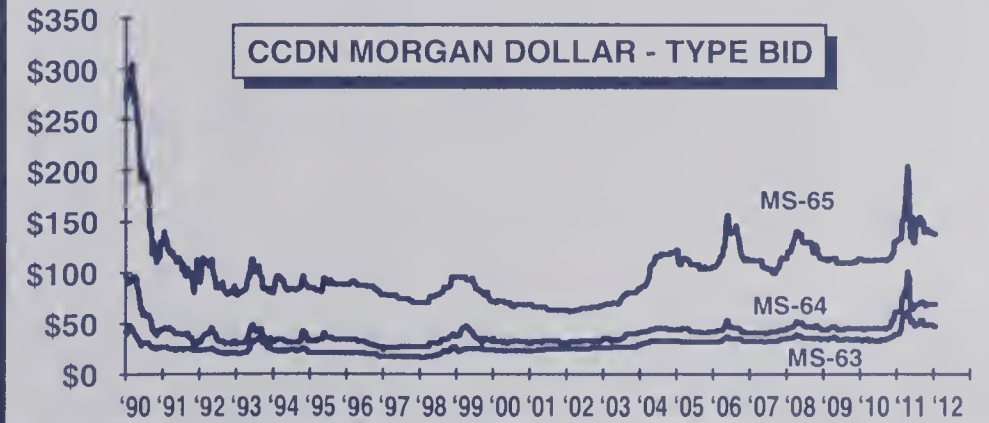

Only PCGS graded 1923 Philly-Mint Buffaloes and NGC graded 1927-S issues, both in MS66, settled lower by a modest 3% this week. Most of the other Buffs remained in place amidst a much needed calm in the aftermath of the near calamitous sharp declines that besieged this segment last week as a result of lackluster auction results. This can be confirmed within the Market columns published herein, the fourth week of every month. Sight-Unseen Bid for 1941-S Mercs in PCGS MS65FB slacked off by \$1, but a \$3 drop in Bid for 1943D issues in PCGS MS65 translates into a 12% reduction, demonstrating the power of small numbers as they apply to this segment. A selection of truly rare Mercs are due to cross the auction block in Long Beach as Heritage will offer an incredible 1918-D, graded MS66FB by NGC, a coin with a combined pop of just 3 with none finer. This is the only NGC graded Merc that has a sight-unseen Bid exceeding that of the 1916-D in the same grade. Walkers weren't as jostled as they had been in past weeks. A few Bid changes appearing within this segment were rather insignificant, as dealers are offering \$3 more for 1936-D issues in MS62, and 1946 issues in NGC MS66 fell further by \$10 to a Bid of \$170, at parity with their PCGS graded peers.

As captivating as they are when found, \$2½ Libs in MS67 just can't seem to apply the brakes to stop their descent to lower ground, as these issues have now lost an average of 14% since this time last year. Only 1,064 of these little golden jewels have been encapsulated at this lofty level with a mere 86 graded finer. Even though Gold Spot broke back through the \$1,700 per ounce level, this didn't prevent generic Type III \$20 Libs in MS65 from slipping lower for the second straight week, with NGC examples having lost \$500 during this short period.

Stack's Bowers January 24-26 Americana sale in New York is still underway as of this writing. Next up is the Ira and Larry Goldberg auction featuring selections from the Helem Estate, and many other great collections, January 29-31 in Los Angeles. Then it's off to the Long Beach Expo, February 2-4, with an auction by Heritage. Some market participants feel that with the absence of the Northern California Santa Clara Expo, the tax nexus will be less of an issue for out of state dealers, creating more activity in Long Beach.

NGCNumismatic Guaranty Corporation of America
Sarasota, FL (800) 642-2646

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDn may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported high Bid or by Ask or Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers who are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, self-dealers, and other sources of *wholesale* transactions. Auction prices realized or retail trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that a reasonable exercise of due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guarantee of accuracy that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase or that it was ever available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin may display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy:** During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "w" - Lowest asking price during the week prior to publication (week old); "m" - Lowest asking price during the previous three weeks (month old); "t" - Trade during the most recent month; "lm" - Lowest asking price appearing last month; "lt" Trade appearing last month; "ot" Trade older than 2 months; " " a blank, for all Market prices older than two months; "a" for auction transactions. "oa" - auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

CAC Leaps Another Milestone While Leading the Charge!

CAC was founded over four years ago by leading members of the numismatic community to set forth stringent standards for quality within a grade. Before CAC, prices for the solid quality coins were tethered to their lesser quality counterparts, thus holding down the market. Today, CAC is leading the charge to identify coins that fully merit the grade it was assigned. Now, advanced collectors and novices alike have an easy way to identify coins that are solid for the grade - look for the CAC sticker.

CAC continues to leap impressive milestones at breakneck speed, while giving you confidence in the value of a coin.

CAC[®]

"Because Confidence is Priceless"

www.caccoin.com

~ SMART PURCHASES ~

Backed by Insight

NGC Auction Central

See prices realized, volume of transactions and upcoming auctions across a range of auction houses.

NGC Coin Explorer

Examine key summaries of market information and coin history to get a comprehensive view of the coin you are considering purchasing.

NGC Census

Gain insight into the rarity of a coin's condition by seeing the number of coins NGC has certified in that grade.

NGC Price Guides

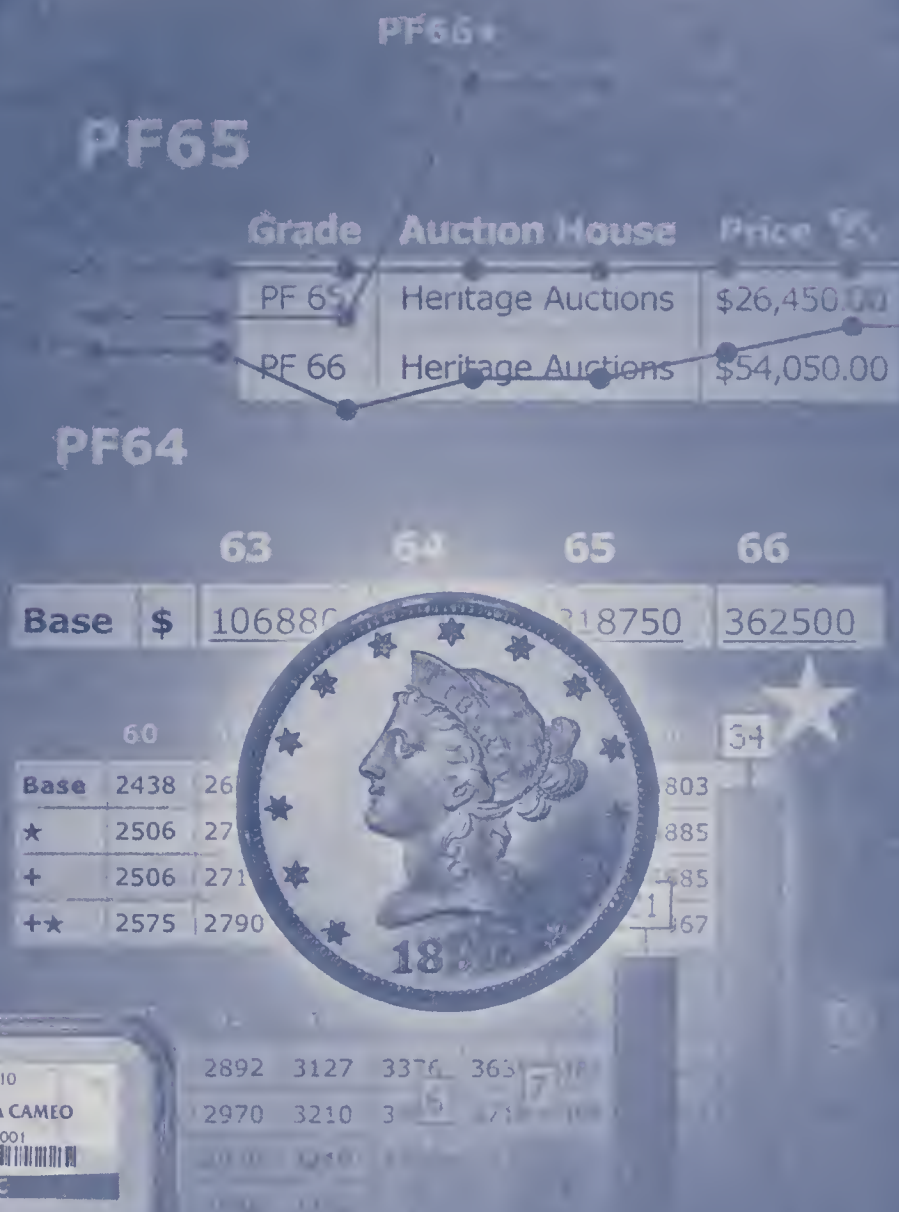

Get an expert and independent view of the value of World and US coins, including trend lines and comparative charting.

NGC Collection Manager

Track your entire collection—want list, value, storage, certification numbers, insurance reports and much more.

NGC Registry

Understand point values for coins and registry demand in the marketplace, then share your collection and compete with other collectors in the world's largest registry.

Collect with Confidence—Combine the protection and security of NGC certification with the market insight of NGC's web resources. Get all the information you need to make informed buy/sell decisions. To learn more about the one website you must visit before you make your next purchase, go to NGCcoin.com/Insight

Prices are for the most common dates. Better date coins usually bring more than the Bids of the most common issues listed herein. Bids listed for issues that trade infrequently are the last known.

MINT STATE TYPE COINS

Prices are for the most common dates. Better date coins usually bring more than the bids of the most common issues listed herein. Bids listed for issues that trade infrequently are the last known.

Can You Afford to be out of the Loop?

Information is Power. Join the Future of Electronic Coin Trading.

Introducing CoinPlex - a revolutionary coin trading network exclusively for dealers. Now you can take full advantage of real-time bid and ask values on all coins graded with PCGS+ and NGC+ designations with or without a CAC sticker. In addition, CoinPlex offers an unrestricted bidding platform for generics like Morgans, Saints and Libs.

The CoinPlex network puts a wealth of real-time information at your fingertips. As a member, you can browse the results from all of the major auction firms, review CAC population data, bid on and list coins, and instant message other members. What's more, for a limited time Charter Membership is available at the guaranteed low price of \$100 per month.* You can opt out at any time without penalty.

With all of the benefits membership in the CoinPlex network offers, can you afford to be out of the loop? Join today as we build the best market possible - together.

* Price guaranteed for three years. Cancel at any time without penalty.

Long Beach Buzz Begins

Goldberg Sale Reaches \$6.9 Million

Many of the nation's largest dealers are in Southern California attending the Long Beach Expo. Dealer set-up day was extremely busy, with plenty of hustle and bustle. The crowd was sizeable and tables that had been empty in the past were full, helping to create a buzz on the bourse. Most dealers that were circling the trading floor share a similar agenda, and that is to find fresh, original and problem-free coins that are solid for the assigned grade. Wholesalers will work on instantly flipping this type of material, while the remainder are looking to bring home the good stuff for their anxious clients. Precious metals are strong and show promoters are expecting the general public to be bringing in their Gold and Silver scrap, jewelry and coins to sell. Gold closed at \$1,757, and Silver Spot is at \$34.15, both strong levels not seen since mid-November. As dealers await the Heritage auction, the Pre-Long Beach Goldberg sale, held January 29-February 1 realized a total of \$6.9 million. A few of the many highlights are listed herein. The top lot was a 1796 \$2½ Capped Bust to Right with Stars graded NGC MS61, a pop 6 coin with 5 higher, which garnered \$155,250. The last time an example in this grade sold was at the 2007 January FUN show, where it received \$218,500.

Commemorative Missouri Halves in PCGS MS64 got rattled a bit during this week's prolific West Coast auction activities and are now \$60 lower. A few Silver Commems are still being scooped up through online auctions for less than what many Bidders are offering to pay for them sight-unseen, as is the case with the \$50 being left on the table for 1935 Hudson issues in NGC MS65. Jefferson Gold Dollars in PCGS MS64 and MS65 are trickling lower, while 1904 Lewis & Clark Dollars in NGC MS65 and 1917 McKinleys in NGC MS66 also headed south again by a respective 5% and 8%.

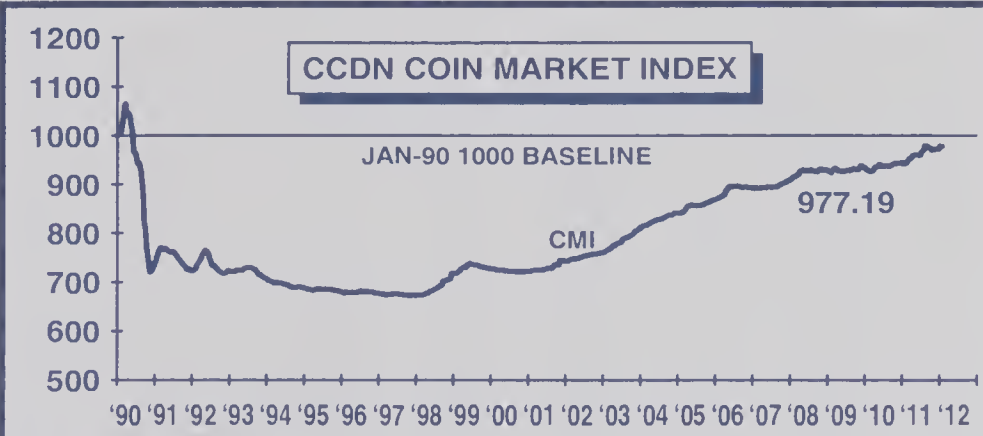

Generic Morgan Dollars are down slightly in MS64 and MS65, while a handful of better-date issues in MS62 are inching their way up. Bid for 1878 7TF (Rev. of '79)

issues in NGC MS66, plunged 12%, and 1888 issues in NGC MS67 are down by another \$150. Common date Peace Dollars in MS64 each slid a bit after some recent stability, and 1935-S issues in PCGS MS65 sold at public auction for a discount resulting in a 6% drop.

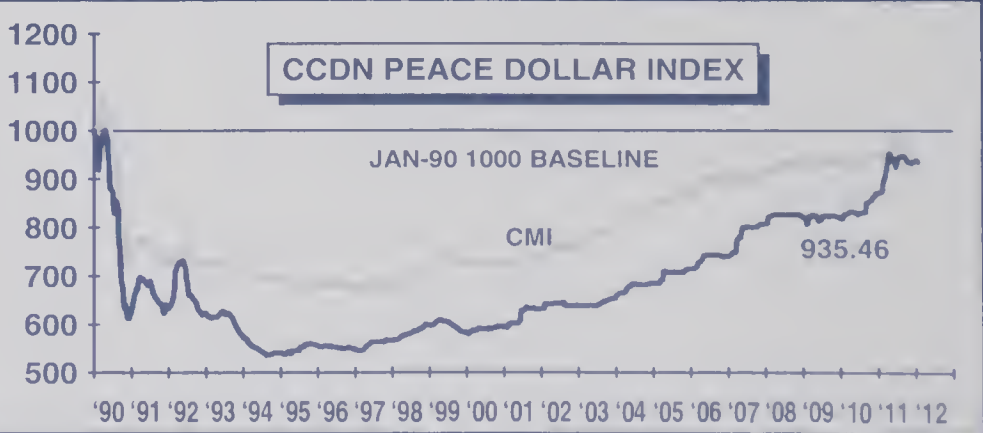

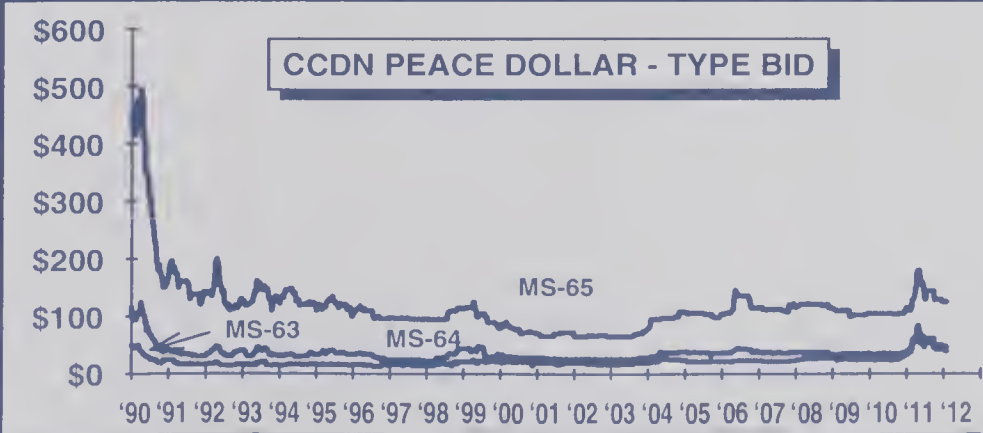

Considering how volatile and often negative this market can get, Type material continues to hold up comparatively well. Despite the stamina we've seen lately among early Copper, however, Braided Hair Large Cents in NGC MS66BN are weakening a bit at the auction events, as indicated by their \$75 lower Bid. PCGS graded Liberty Seated Dimes with Stars in MS65 also buckled somewhat to the auction block pressure with a \$50 reduction. Three Cent Nickels in NGC PR66 are encountering more unfavorable reception from Bidders as these issues have been driven down by 27% since October. PCGS graded 1929-D Buffaloes in MS66 gave up \$40 this week, but the remainder of this sight-unseen segment held up well with a fair amount of current Bid support. Bids moved higher for common date Buffs after hundreds traded sight-unseen through the dealer-to-dealer trading networks in grades MS65-MS66.

Early key date Walkers were negatively impacted by poor auction results for the first time since late August when PCGS graded 1917-S (S on Reverse) issues in MS64 slipped by \$100, with their Bid retracting by again this week. A few late-date Walkers in MS67, particularly those graded by NGC, were hurt as well. Bid for 1946 issues plunged by 23%, and 1944-D issues came in second in terms of a percentage decline with an 11% drop. Much of the generic Gold Type is still seesawing and unable to climb to higher levels as many Gold Bugs have been hoping. The fact that lower premium material in MS61 and MS62 is now favored over that in higher grades attests to a predominance of a more bullion-oriented breed of buyers determining this segment's movements. High grade issues such as \$2½ Libs in PCGS MS65 thru MS67, \$5 Libs With Motto in MS66, and common Double Eagles in MS65, have trouble maintaining ground when many of today's participants want the most Gold for their buck.

Mint Directors Trust Miles Standish - You Should Too!

In 2011, Miles Standish, Vice President and Senior Grader of PCGS, was awarded the Director's Coin for Excellence medal in recognition of his meritorious service to the coin collecting community.

The PCGS Bulk Certification Program, regarded by Miles as one of his most important contributions, enables dealers and collectors to submit high volumes of coins for grading at strongly

discounted prices. Miles can show you how to:

- Grow your business
- Expand your market
- Design specific campaigns to target new markets with innovative ideas such as our specialty PCGS holder label programs.

Find out how Miles can contribute to the bottom line of *your* business. Contact him at **949-922-0515** or **Mstandish@collectors.com**.

Higher Sight-Unseen Bids Chase Five-Figure Coins Generics Slide In MS64-MS66

Gold and Silver Commems cannot evade the dampening effect of what appears to be an over-supply of material in the market. The few gains recorded are heavily outweighed by losses again this week. While Lafayette Dollars are declining by 6% in PCGS MS64, both Missouri issues in MS66 dropped, as NGC graded 2X4 examples ended up \$1,000 lower, possibly the result of too many being auctioned at once. Rhode Island and Washington-Carver Type issues plunged 15% and 35%, respectively, as sight-unseen Bidders appear inclined to greatly limit their offerings for such issues as they sell in retail venues for less. Pan-Pac and 1916 McKinley Gold Dollars, as well as \$2½ Sesquicentennial all got rattled in Gem, as those of the latter denomination concluded this week with an 8% drop. While it's nearly impossible to predict the bottom here, many market participants believe it could be near.

Morgan Dollars remain rock steady throughout most grade columns aside from those generics at the MS66 plateau. These cartwheels, with a pop of some 140,000 have a new, lower Bid of \$260, though buyers will still take quantities sight-unseen. Among the worst hit were the ubiquitous 1883-O and 1887 issues in PCGS slabs, which are down by 13%. Comparably graded better-date issues such as the 1885-S are down by \$300, while 1880-CC (Rev. of '78) examples in NGC MS65 slid by 12%. However, 1902-S issues in MS63PL and MS64PL are up significantly, skyrocketing well over 50% from our last report. Those tough to find 1921 issues in NGC MS65DPL disappointingly shed another \$190, bringing their sight-unseen Bid down by well over \$500 this past year. Generic Peace Dollars in MS64 still haven't applied the brakes on the downhill path as they descend a bit further for the second straight week, while those eagerly sought-after key date 1928-S examples in PCGS MS65 coasted down along with them to register a \$750 loss.

Liberty Seated Dimes with Arrows dated 1853-1855 and graded MS64 by PCGS were among the few Mint State Type issues to incur a significant decline, as Bid for these dropped to an even \$500 after poor retail auction performances. Capped Bust Halves in NGC MS64 continue in their descent for the second straight week, while Liberty Seated No Motto Halves in PCGS MS65 dipped by \$250. Comparatively better Bid support pervades the Proof Type segment, as the few declines represent minor corrective adjustments.

Buffalo Nickels appeared to be stabilizing these past few weeks, but some early dates got beaten up by poor auction performances again with extensive declines as the result. The largest declines are for the 1913-S Type I in NGC MS65 and the 1919 in NGC MS67, the former posting a decline of 6%, while the latter lost 14%, dropping by a hefty \$800 in nearly a one year period. Two early, Full Band Mercs faltered as a result of poor auction activity this week. 1917-S issues in MS67FB fell back by an average of 9%. Bid for those very scarce 1918-D specimens in MS65FB sank along with those graded MS66FB. Discount activity forced 1945-S issues in MS67 to surrender all of their gains achieved since mid September.

There's certainly still demand for nice MS65 and MS66 Walkers, but at increasingly lower levels. Late dates in these grades are again being discounted by way of lower auction prices realized. Many of these issues in MS66 have had their prior year's gains completely reversed, while some issues are now actually trading below their sight-unseen Bid levels of one year ago.

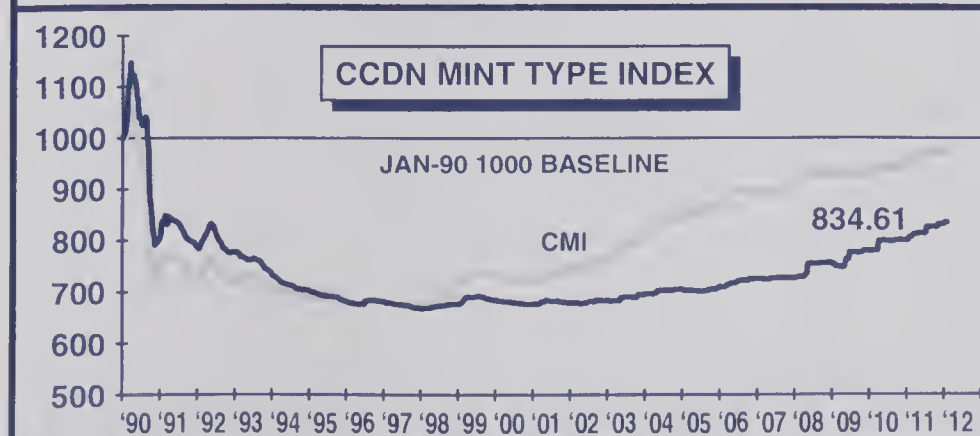

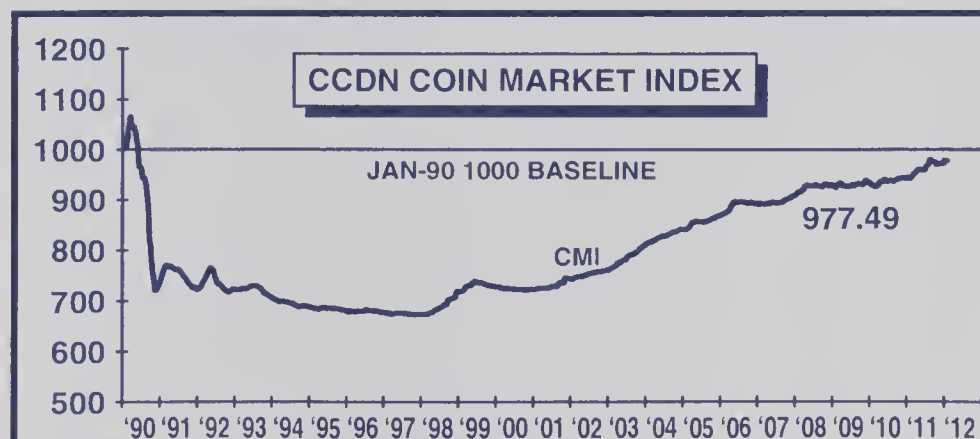

Bid for \$5 Libs with Motto in MS66 has receded by \$200 these past two weeks, but the Indians of the same denomination in MS64 are showing a bit more energy this week. After three consecutive weeks of decline, Type III \$20 Libs in NGC MS65 slabs bounced back up to Bid \$3,000 again while their PCGS peers in comparable grade seem to be stabilizing. Overall, it's a mixed scene in the sight-unseen Gold Type segment as none of the generic material has deviated significantly away in either direction from its Gold Spot influences.

The key to the \$2½ Indian series, the 1911-D, is needed in multiple grades, some at higher levels, including Gems. Dealers are looking to pay \$47,500 sight-unseen for any of the 17 MS65 examples graded by PCGS, while offering \$41,000 for NGC slabs, of which 80 have been made in this grade. More of these higher, five-figure sight-unseen Bids can be found within the Proof Gold Type segment in PCGS grades PR65-PR67. The specific targets are Proof \$10 Indians and Proof \$20 Saint-Gaudens in Gem and better condition.

Schuyler J. Rumsey Auctions will hold a sale at the San Francisco Palace Hotel, February 21-22 featuring the Broadus R. Littlejohn, Jr. Collection of US Gold coins. We have included a few of the highlights above.

The Certified Coin Dealer Newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity in the most nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Ask. Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the property of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets.
Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

Can You Afford to be out of the Loop?

Information is Power. Join the Future of Electronic Coin Trading.

Introducing CoinPlex - a revolutionary coin trading network exclusively for dealers. Now you can take full advantage of real-time bid and ask values on all coins graded with PCGS+ and NGC+ designations with or without a CAC sticker. In addition, CoinPlex offers an unrestricted bidding platform for generics like Morgans, Saints and Libs.

The CoinPlex network puts a wealth of real-time information at your fingertips. As a member, you can browse the results from all of the major auction firms, review CAC population data, bid on and list coins, and instant message other members. What's more, for a limited time Charter Membership is available at the guaranteed low price of \$100 per month.* You can opt out at any time without penalty.

With all of the benefits membership in the CoinPlex network offers, can you afford to be out of the loop? Join today as we build the best market possible - together.

* Price guaranteed for three years. Cancel at any time without penalty.

www.CoinPlex.com

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Prooflikes. Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

Greatest Gold Mine of Coin Data - Yours **FREE!**

CAC's POP Report puts all the data you need at your fingertips

CAC-stickered coins give you confidence. That's because we verify previously graded coins and award our green sticker only to those that are at minimum "solid" within their grade. Data for each of the stickered-coins is maintained in an elaborate online database, where you can easily verify any CAC coin.

Now, all of the data is compiled in CAC's Population Report – an absolute "must have" if you are active in today's rare coin market.

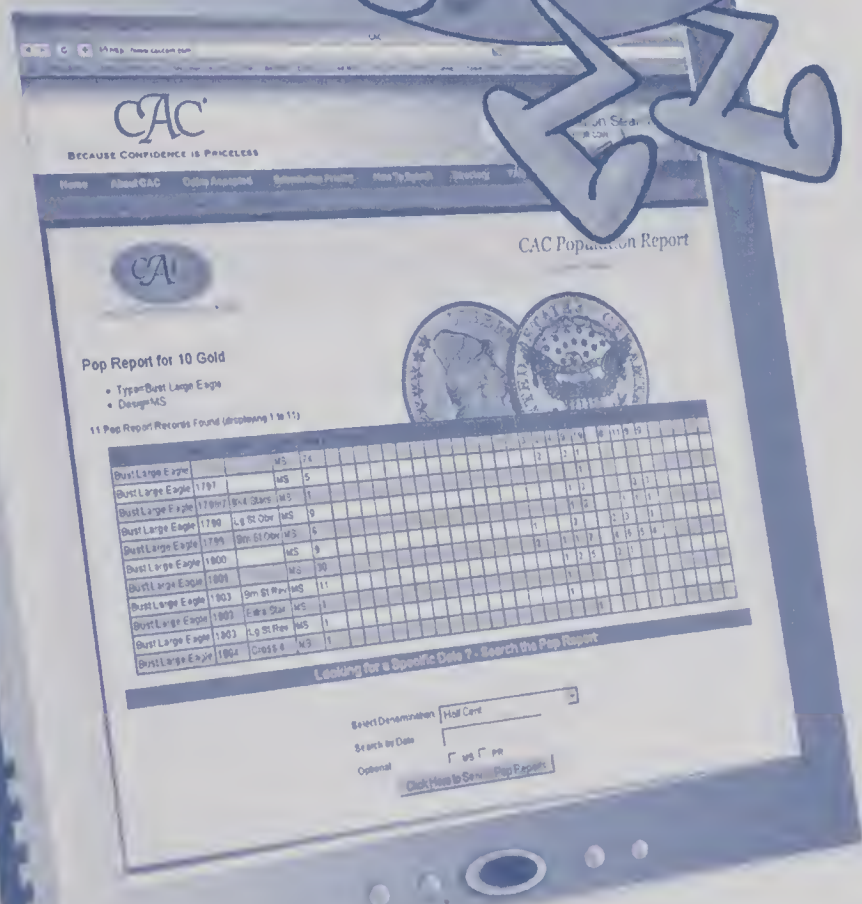

Novices and advanced collectors alike can now access up-to-date, comprehensive data on all CAC-stickered coins, free of charge, by visiting our website at www.caccoin.com.

It's easy to identify coins that are solid for the grade - just look for the CAC verification sticker. And now there's an easy way to access a gold mine of CAC coin data, the FREE CAC POP report.

Every Numismatic Library needs a complete set of the
COIN DEALER newsletter family of publications

the Backsheet

Now that we have your attention, we really haven't started an additional newsletter — but your library should include **Back Issues** of our publications. Back issues are available two ways:

You can purchase small quantities to fill in missing issues, to obtain articles necessary for your research, or to follow your special interests. You may also combine your order for back issues of any of our publications to obtain the lowest price:

1-10 issues - \$3.00 each • 11-25 issues - \$2.50 each • 26 & over - \$2.00 each

Or, you can purchase *complete sets* of back issues for really dramatic savings:

Complete set of the weekly **Coin Dealer newsletter (Greysheet)**
from June 14, 1963 to December 23, 2011, now includes 2,475 issues.
At \$2.00 each this would normally cost \$4,950, but a complete set
is only \$3,175.

Complete set of the monthly **CDN Monthly Supplement**
(formerly the Monthly Summary)
from August 1976 to December 2011, now includes 425 issues. At \$2.00
each this would normally cost \$850, but a complete set is only \$585.

Complete set of the **CDN Quarterlies**
from January 1992, to December 2011, now includes 240 issues, a
complete set is only \$315.

Combined weekly **CDN (Greysheet), Monthly Supplement & Quarterlies**
now includes 3,140 issues, and extra savings at only \$3,900.

Complete set of the weekly **Certified Coin Dealer newsletter (Bluesheet)**
from August 22, 1986 to December 23, 2011, now includes 1,253 issues.
At \$2.00 each this would normally cost \$2,506, but a complete set
is only \$1,600.

Complete set of the monthly **Currency Dealer newsletter (Greensheet)**
from September 1980 to December 2011, now includes 376 issues.
At \$2.00 each this would normally cost \$752, but a complete set
is only \$525.

CERTIFIED COIN DEALER

newsletter

CCDN — a weekly report on the Sight-Unseen certified market published by the Coin Dealer Newsletter (est. 1963)

Vol. XXVII No. 7

February 17, 2012

Single copy price \$5.00

Type Maintains Solid Bid Support

Semi-Key Morgans Show Strength

Many segments of the market have slowed this week, commensurate with what can be considered a pause for now until the next major show and auction events take place. Relative calm was cast upon Silver Commems, as only two PCGS graded Halves in the MS65 column, the Lynchburg and 1935-S San Diego, were both set back with respective 8% and 11% declines. However, Bidders are competing rather aggressively for Texas PDS Sets that are PCGS + graded. While Gold Commems are steady for PCGS and NGC, those with the green bean are active with advances outnumbering declines. Only eight 11-piece sets in MS65 are possible to assemble, with only four stickered in MS66. An exquisite Grant with Star PCGS MS67 \$1 Gold specimen, one of only 38 in this grade approved by CAC, will go to the highest Bidder when Heritage concludes its New York City Signature Auction running March 8-11. See highlights herein.

Very little significant movement occurred this week among generic Morgans, but a noticeable rekindling of interest can be discerned with regard to certain semi-key issues. A higher sight-unseen Bid of \$6,250 is being offered now for the 1884-S in MS61 in either slab, constituting an average increase of 30%, and this issue is also climbing higher in MS62. This desirable cartwheel has a combined pop of only 637 across all Mint State grades with buyers willing to pay \$200,000—more than double Bid—for a CAC approved Gem once one is made. The quest for these better-date Morgans drove 1894-O examples in MS63 up in Bid by 20%, and the higher demand for 1903-S and 1904-S Dollars in MS61 through MS63 is of such an extent so as to enable reporting of impressive double-digit percentage gains for them in many of the columns within this grade range as well. Generic Peace Dollars in MS65 provide beauty and appeal ever more so now, if not real opportunity, as they recede further down to equal their Bid of one year ago at \$115.

Type is benefiting from current Bid support which remains solid, and that's something to appreciate in this time of so much volatility in the market. Those early Coppers that advanced so dramatically in recent months have retained virtually all of their gains. Market-makers and participants avidly seeking the

earliest issues, such as Flowing Hair, Draped and Capped Bust specimens of all dates and denominations, as well as certain Liberty Seated material, complain of a shortage of these types of coins in desirable quality, even at major auction events. Premiums are still being paid for low mintage, late 19th and early 20th century Proof and key-date issues in Mint State that haven't been getting easier to find. Then again, that elusiveness is primarily what increasingly adds to the appeal of such material and to the challenges of collecting.

Although Buffalo Nickels took quite a beating these past several weeks, major auction firms happily consign them as there undoubtedly remains a widespread

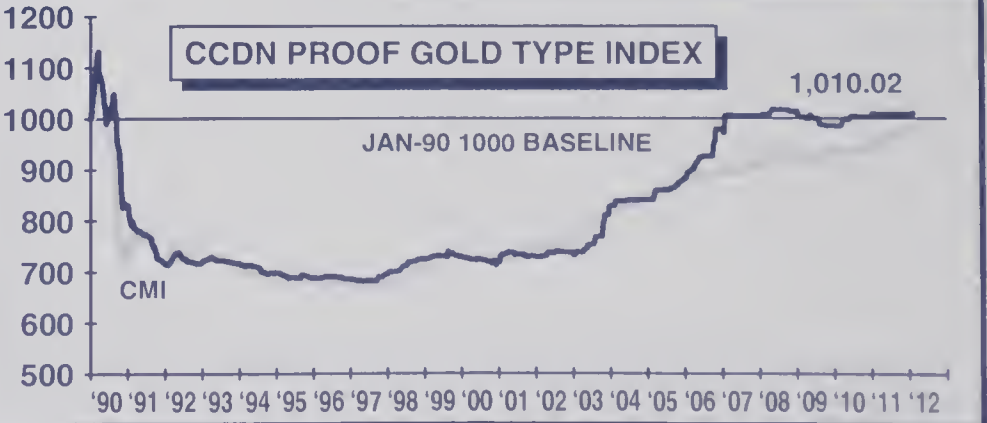

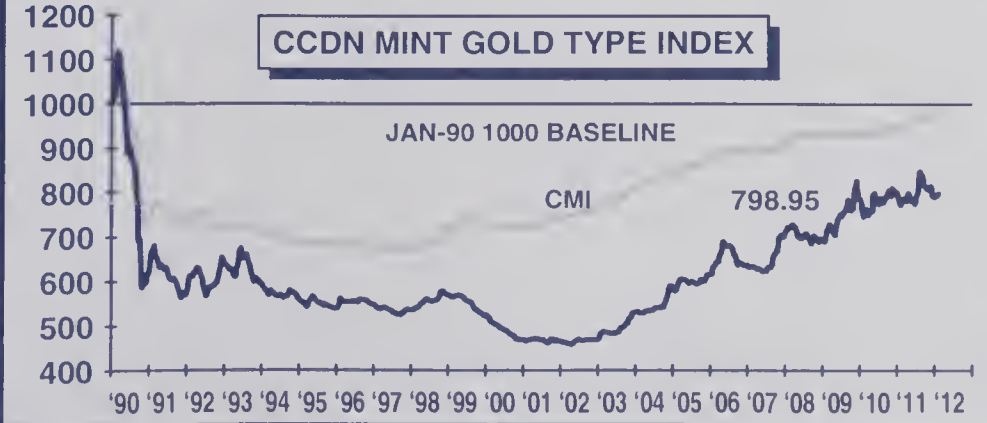

devotion among collectors who consider the Buffs as quintessential numismatic Americana. Beautiful, eye-catching, low-pop examples with original peripheral toning, especially, continue to captivate crowds at show and auction venues. Higher sight-unseen buys are targeting 1934 examples grading PCGS MS64+ and MS65+. After skyrocketing late last summer by 125% from \$40 to \$90, those volatile 1945-S Mercury Dimes in PCGS MS67 declined for a second straight week to bring their sight-unseen Bid back down nearly to where it was last year. Many of the war-time Merces in CAC approved MS64FB and PCGS MS65FB+, however, added \$2 to \$3 to their Bids.

As if there has to be a supplement to the negativity that has been afflicting mostly NGC graded Gem Walkers these past two weeks, many of the same examples in PCGS MS66 are now entangled in the discounting commotion while CAC approved issues in this grade are a bit more resilient. Bid for 1942-D Walkers in MS65 with a combined pop of 4,235 increased by \$10 to \$150, while buyers will pay \$210/\$215 for CAC and PCGS + examples. Following a rise of 15% to a Bid of \$3,000 last week, generic Type III \$20 Libs in NGC MS65 slid by a moderate \$50, while their MS61 thru MS63 peers edged mildly higher along with comparably graded \$20 Saints. Gold Spot has been closing nicely above the \$1,700 per ounce level each day over the past few weeks, raising hopes that more confidence in this segment will soon prevail.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services determined through careful study of market activity including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid by Ask. Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers and are strictly the property of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

CAC Leaps Another Milestone While Leading the Charge!

CAC was founded over four years ago by leading members of the numismatic community to set forth stringent standards for quality within a grade. Before CAC, prices for the solid quality coins were tethered to their lesser quality counterparts, thus holding down the market. Today, CAC is leading the charge to identify coins that fully merit the grade it was assigned. Now, advanced collectors and novices alike have an easy way to identify coins that are solid for the grade - look for the CAC sticker.

CAC continues to leap impressive milestones at breakneck speed, while giving you confidence in the value of a coin.

CAC[®]

"Because Confidence is Priceless"

WALKING LIBERTY HALVES

CCDN does not represent that it is possible to purchase selected coins at the listed levels. Considerable sight-seen trades can be expected to occur at substantially higher levels in many cases.

CCDN — a weekly report on the Sight-Unseen certified market published by the Coin Dealer Newsletter (est. 1963)

Vol. XXVII No. 8

February 24, 2012

Single copy price \$5.00

Generic Dollars Continue Slide Rumsey Auction Garners \$4.5 Million

Dealers will be heading to Las Vegas for the PCGS members only show at the Venetian February 29-March 3, held in cooperation with the long-established 49th LVNS show at the Palace Station Hotel and Casino March 2-4, with set-up on the 1st. Many dealers attend these trade-n-grades just to get first crack at the freshly slabbed material. Promoters are working hand-in-hand so that dealers from both events will have access to each show.

Overall, both Gold and Silver Commems had another week of relative stability in terms of sight-unseen trading activity with only a pair of Gem NGCs changing hands through CCE, that being a Roanoke and York for \$200 and \$210, respectively. The popular Missouri 2X4s in PCGS MS66 have been discounted now by 8% over the past three weeks, dropping by \$200, while some Washington-Carver Type Halves in NGC MS66 have been trading below some Bidders' offerings, leaving over 20% on the table. Spreads between Bid and Ask have tightened quite a bit in this segment, with one Texas wholesaler making a market in such key issues as NGC Hawaiians. This dealer's sight-unseen buy/sell spreads for NGC MS63-MS65 examples are \$2,550/\$2,650; \$2,700/\$2,875; and \$4,000/\$4,100 respectively. Gem Lafayette Dollars in NGC are another example of these extremely tight, Gold Type-like spreads with this market-maker paying \$6,150 and selling for \$6,300. All of this can be seen in this week's Market column.

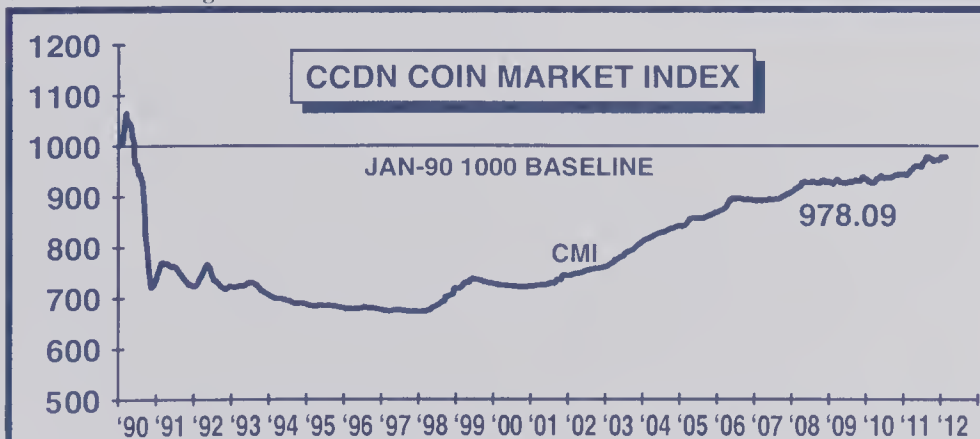

Morgan Dollars often bear the brunt of market weakness when it occurs, and the generics in MS65 can be especially hard hit as these issues now trade sight-unseen at the \$125 Bid level after being as high as \$205 last April. While 1881-CC issues in PCGS MS66 lost some appeal during recent auction activity, premiums continue to be offered for these Morgans in their original GSA packaging with certificates. Despite CAC approval and + grading to identify those slabs that are solid or better for the grade, there remains a certain level of subjectivity as far as how an individual evaluates eye appeal in terms of justifying or agreeing with the often enormous premiums being paid for iridescent, rainbow toned generic Dollars. While grading can be standardized, aesthetic judgment cannot. For example, some just love textile toning, and may pay dearly for it while others hate it, and will pass. Nonetheless, many Morgan and Peace Dollar enthusiasts appear to be particularly fond of cartwheels with originality and character. Generic Peace Dollars in MS64, other than the 1922, are being pressured downward, now at \$43, descending from their recent peak of \$84 ten months ago.

Not much turnover through the dealer-to-dealer trading networks appears to be occurring within the Type segment. Even though there is hardly a soul amongst us anymore who can recall the days when such coinage circulated, obsolete denominations are especially revered for their historic lore despite their cyclical tendencies. Mint State and Proof Two Cent Pieces, especially in Red and Red-Brown, are among the eagerly sought-after Copper issues that are still hot and, paradoxically, defying the softening trend affecting the market. Wholesale weakness caused Twenty Cent Pieces in PCGS MS65 to drop by \$100, but those Three Cent Nickels in NGC PR66, which have been rather unsteady since October, sprang back impressively by a cool \$130. Buffalo Nickels remained absolutely sedentary for a second straight week, and the Buffs now seem to be hibernating for the winter while awaiting the arrival of greener pastures on which to graze. On-line Bidders, nonetheless, maintain a vigilant posture in their search for beautiful, originally toned examples. Depression-era dated Mercury Dimes in Mint State are always very desirable and often elusive enough to elicit highly competitive Bidding if and when they appear. Other than a mild decline for 1941-D issues in NGC MS65FB, the remainder of the Merics held on firmly to their positions from last week. There may be some consolation in knowing or, at least, assuming that the more Gem graded late-date Walkers slide lower, the sooner they will reach their bottom. Most of these issues in MS65 lost another \$2 this week and have now receded by as much as 27% since early last September. Rising crude oil prices, largely due to tensions in the Middle-East, are again stirring up anxiety at the pump and fueling up Gold, which has long served as a proxy commodity for oil. Common Double Eagles along with most other generics are reacting in

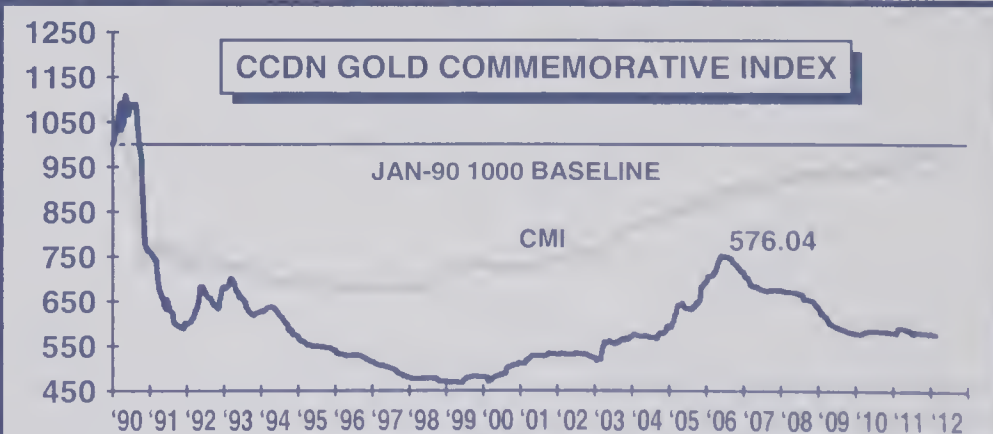

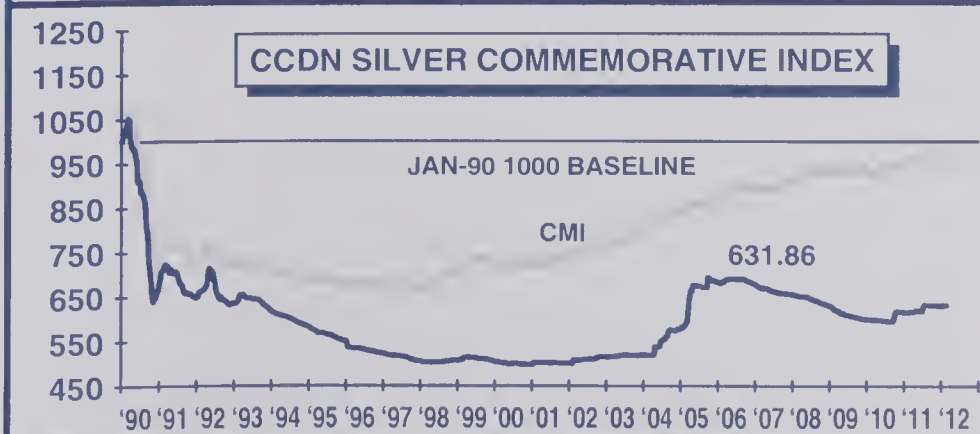

step with the recent Gold Spot increase, as the plus signs reflect higher Bids, especially in the lower grades. Despite the upswing in Gold Spot, this segment remains extremely underappreciated by the public with buyers preferring as much Gold for their buck as possible as opposed to owning numismatic material. Current premiums over melt for many issues remain at or near record low levels. Big money generics are also feeling the pinch as \$20 High Reliefs in NGC MS65 and MS66 are descending, those of the latter grade losing 6%.

The Rumsey sale of the Littlejohn Collection held mid-week in San Francisco realized over \$4.5 million. The top lot, out of 1,500 to cross the block was an 1856-O Double Eagle graded PCGS XF45, which brought in \$276K. We have included a few of the many other highlights herein.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of a supported Bid. Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, as stated by the dealer, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

www.ccdnpublic.com

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell lists, coin shows and other sources of *wholesale* transactions. Auction prices realized or retail trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy:** During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "w" - Lowest asking price during the week prior to publication (week old); "m" - Lowest asking price during the previous three weeks (month old); "t" - Trade during the most recent month; "lm" - Lowest asking price appearing last month; "lt" - Trade appearing last month; "ot" - Trade older than 2 months; " " a blank, for all Market prices older than two months; "a" for auction transactions; "oa" - auction older than 1 month

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Greatest Gold Mine of Coin Data - Yours **FREE!**

CAC's POP Report puts all the data you need at your fingertips

CAC-stickered coins give you confidence. That's because we verify previously graded coins and award our green sticker only to those that are at minimum "solid" within their grade. Data for each of the stickered-coins is maintained in an elaborate online database, where you can easily verify any CAC coin.

Now, all of the data is compiled in CAC's Population Report – an absolute "must have" if you are active in today's rare coin market.

Novices and advanced collectors alike can now access up-to-date, comprehensive data on all CAC-stickered coins, free of charge, by visiting our website at www.caccoin.com.

It's easy to identify coins that are solid for the grade - just look for the CAC verification sticker. And now there's an easy way to access a gold mine of CAC coin data, the FREE CAC POP report.

CAC[®]

"Because Confidence is Priceless"

www.caccoin.com

Prices are for the most common dates. Better date coins usually bring more than the Bids of the most common issues listed herein. Bids listed for issues that trade infrequently are the last known.

Can You Afford to be out of the Loop?

Information is Power. Join the Future of Electronic Coin Trading.

Introducing CoinPlex - a revolutionary coin trading network exclusively for dealers. Now you can take full advantage of real-time bid and ask values on all coins graded with PCGS+ and NGC+ designations with or without a CAC sticker. In addition, CoinPlex offers an unrestricted bidding platform for generics like Morgans, Saints and Libs.

The CoinPlex network puts a wealth of real-time information at your fingertips. As a member, you can browse the results from all of the major auction firms, review CAC population data, bid on and list coins, and instant message other members. What's more, for a limited time Charter Membership is available at the guaranteed low price of \$100 per month.* You can opt out at any time without penalty.

With all of the benefits membership in the CoinPlex network offers, can you afford to be out of the loop? Join today as we build the best market possible - together.

* Price guaranteed for three years. Cancel at any time without penalty.

Vol. XXVII No. 9

March 2, 2012

Single copy price \$5.00

\$1 Million Expected For Lincoln Cents

Gem Generic Peace Dollars Decline Further

Gold, after approaching the \$1,800 level, dropped over \$77 Wednesday, representing the fourth largest single day drop in history on a dollar basis. Gold Spot settled at \$1,721 today, and is still up over 9% since the first of the year. Silver acted similarly, by increasing to a peak of \$37.14 — a level not seen since late September of 2011, before collapsing \$2.56 February 29. The good news is, Silver has since rebounded to \$35.61. Along with all this precious metal activity, wholesale trading through the dealer-to-dealer networks is quite brisk, more than double of what was seen last week, making for quite an exciting kick-off to March.

Steadiness among Silver Commems may lead some to assume that sight-unseen Bids for several, if not all of them, are now at their nadir point, but it is difficult to predict future conditions and limits to market volatility. 1904 Lewis & Clark Gold Dollars graded PCGS MS64 and \$1 Pan-Pacs in MS65, both posted appreciable recoveries, while the latter's peers in MS64 sustained a further minor decline. Sight-Unseen Bid for Grant with Star Gold Dollars in NGC MS66 rose to regain parity with their PCGS graded counterparts of comparable grade.

Generic Morgans in the MS63 column are the focus of attention this week as these issues seem determined to edge closer, if not return to, the \$50 Bid level. Gem 1881-CC cartwheels in NGC plastic are sinking lower, now Bid \$680. This same coin in its original government GSA packaging with the NGC wraparound grade of MS65 is Bid some \$80 less. This disparity may be the result of the GSA holder not being guaranteed like the NGC encapsulated examples are. ANACS has recently begun grading GSA Dollars in a similar fashion, though we have yet to see any Bids targeting this material. Common date Peace Dollars in MS65 have dropped 9% which may stir up concern as to whether or not these issues are on the verge of setting another long-time low. These generic Peace Dollars in MS65 are now 16% below comparably graded generic Morgans even though the combined pop for Peace Dollars is a mere 1/7 than that of Morgans in this grade category.

Weak auction results forced Capped Bust Half Dimes in NGC MS65 to take an 8% dip, but all other Type material remained unshaken. There now appears to be a sustainable market for material certified as "genuine," but non-gradable due to cleaning, questionable toning and color, or altered, encapsulated in either PCGS or NGC slabs, especially for those early and scarcer key-date coins. Such material has its merits in that it has been authenticated and often provides an affordable alternative to either beginner collectors or

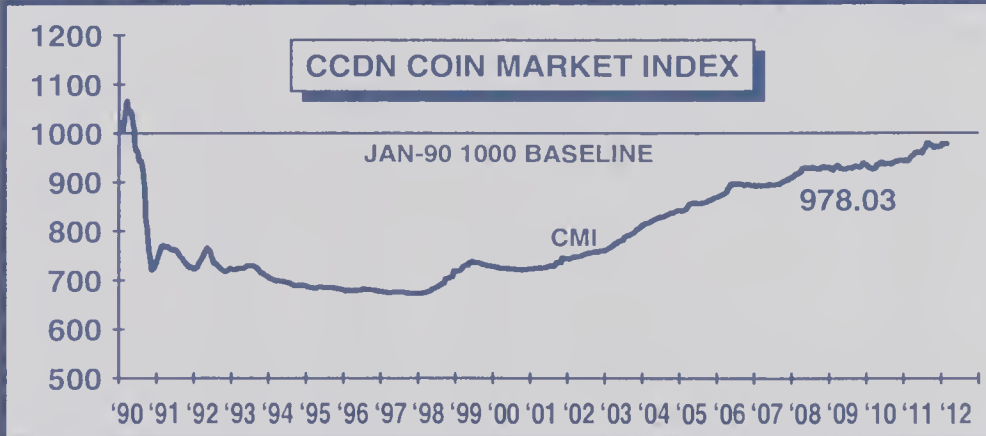

those of limited means who appreciate its historic significance, if not merely as conversation pieces. However, an item's loss of originality and its future re-sale potential, or lack thereof, should be taken into account since these so-called "problem coins" may not be as liquid. This is another aspect of the market where subjectivity and individual taste interplay as variables with respect to judgment.

Among the finest known condition rarity 1913 Type I Buffalo Nickels, graded MS67+ by PCGS with CAC approval, along with a rare 1916 Double Die Obverse in MS63 and a 1937-D 3-Legged variety in MS65, both graded by NGC, are three of the highlighted Buffalo Nickel lots offered by Heritage during its NYC auction, concluding March 11. Late-date Mercury Dimes in MS65FB thru MS67FB are showing some muscle this week, with the gainers in the MS66FB column advancing by as much as 8%. This segment is among the few that still provides real opportunity to acquire material of exceptionally high quality and relative scarcity for a comparatively negligible cost. Late-date Walkers graded NGC MS65 and a few in MS67 are still trickling lower and remain popular items for volume discount wholesalers. Less common pre-war dated Walkers and the earliest issues in virtually all Mint State grades are still being eagerly swept up at current Bid when they become available.

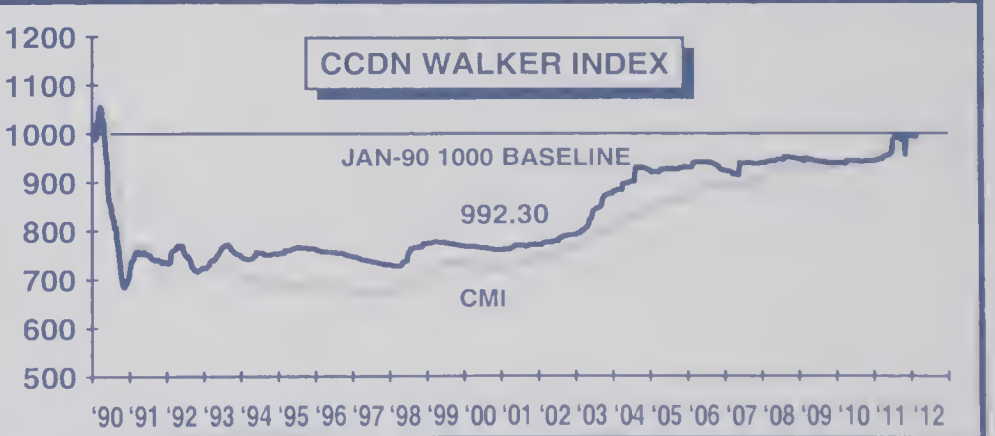

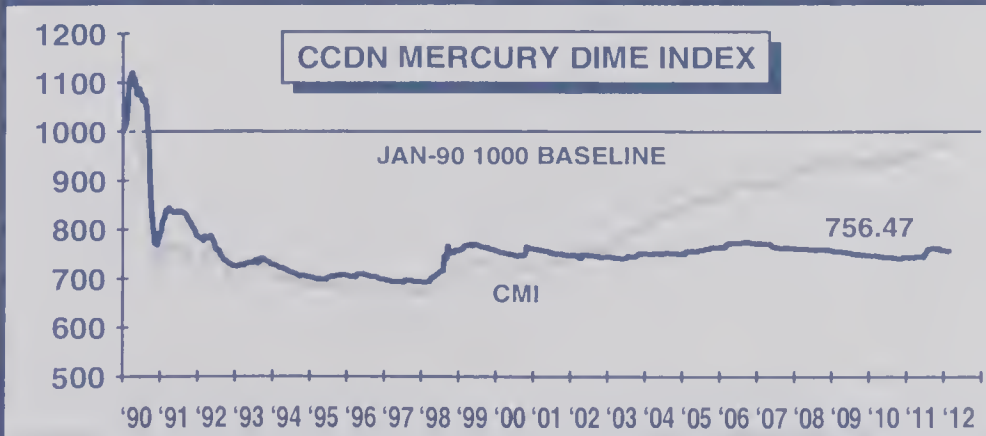

PCGS will now grade 1841 Philadelphia Quarter Eagles as Circulation strikes as well as Proofs. While the traditional view was that the Philly Mint only struck Proof examples of this denomination in 1841, this notion has come into question over the years, and it is now believed by many that business strikes were in fact minted. The first PCGS example with this designation will be up for auction by Stack's Bowers at the Baltimore Expo, scheduled for March 22-25. David Lawrence Rare Coins and eBay will hold an auction of

the world's fourth finest collection of Lincoln Cents. More than 300 pieces graded by PCGS make up this collection, and it is valued at over \$1 million. This sale will run from March 15-25, and the coins can be viewed at the Baltimore Expo. Those interested can even place Bids at the show via an eBay Bidding station. See several of the many highlights herein.

MERCURY DIMES

CCDN does not represent that it is possible to purchase selected coins at these Bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

WALKING LIBERTY HALVES

CCDN does not represent that it is possible to purchase selected coins at times. For January, February, and March, the sight-seen trades can be expected to occur at substantially higher levels than the current market.

CAC Leaps Another Milestone While Leading the Charge!

CAC was founded over four years ago by leading members of the numismatic community to set forth stringent standards for quality within a grade. Before CAC, prices for the solid quality coins were tethered to their lesser quality counterparts, thus holding down the market. Today, CAC is leading the charge to identify coins that fully merit the grade it was assigned. Now, advanced collectors and novices alike have an easy way to identify coins that are solid for the grade - look for the CAC sticker.

CAC continues to leap impressive milestones at breakneck speed, while giving you confidence in the value of a coin.

Single copy price \$5.00

\$10,000 Blind Bid For '53-S Franklin Better Peace Dollars Boosted

Apart from last week's Las Vegas duo of highly successful shows, and this week's metal madness, the beginning of March has been relatively stable. Trades have been occurring with regularity through the dealer-to-dealer exchanges, and volume has been on par over the past few weeks. Heritage is wrapping up their New York City auction as dealers prepare for the highly anticipated Baltimore Expo. This show, now in its 40th year, is scheduled for March 22-25 with an auction by Stack's Bowers, March 21-25. Weak auction performance forced Pan-Pac Halves in PCGS MS65 to slip by \$60, and Robinson issues in PCGS MS63 also eased down by a smidgen. Overall, the Silver Commems have been sustaining themselves quite well as of late. Within Gold Commems, NGC graded 1916 McKinley Dollars in MS61 and MS62 fell back by \$5 and \$15, respectively. Sixteen of these certified Gold Dollars have sold at public auction since January 1, with the top lot realizing \$2,760 for an NGC MS67.

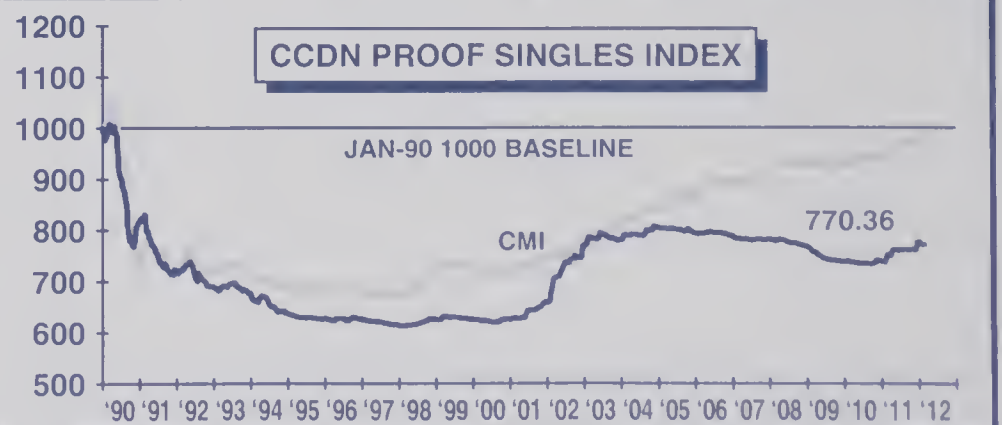

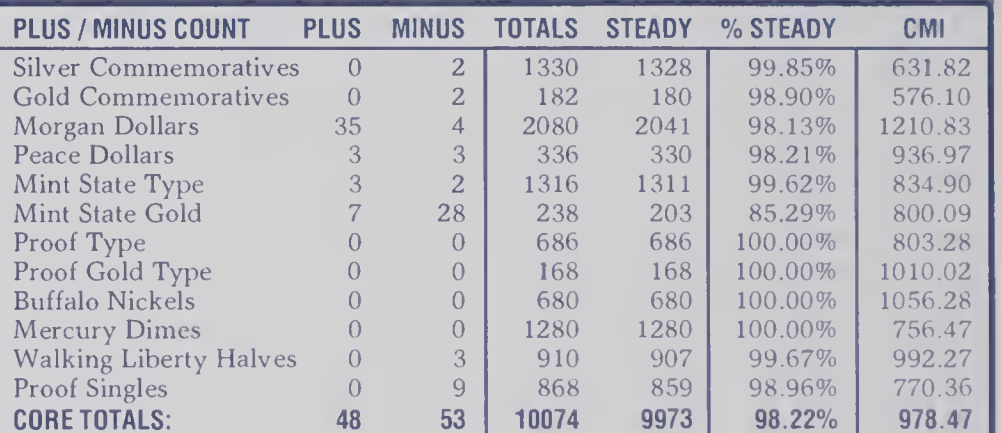

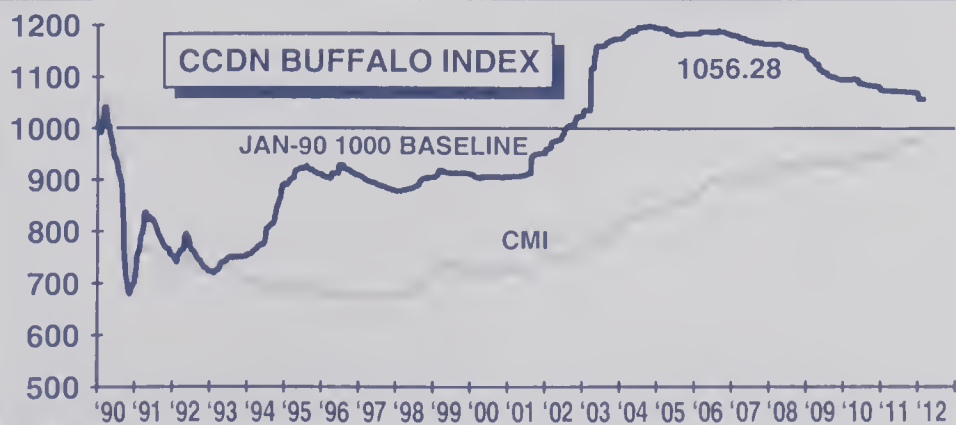

Generic Morgan Dollars in MS63 continue in their upward thrust from last week to gain slightly higher ground, as many of their peers in the MS64 column also partake in the ascension. The most common cartwheels in various grades between MS63PL and MS65PL are weakening, however. Very Choice examples of 1891-S Morgan Dollars advance by 7% to \$225 Bid. Only 3,139 MS64s have been encapsulated by the two majors with 616 at the MS65 level, where Bid quadruples to \$900. CAC has given the green bean to 31 in MS64 and 47 in MS65, with 9 in MS66 and 2 in MS67. A few key-date NGC graded Peace Dollars are being sought at significantly higher Bids this week, as 1927-S issues in MS65 posted a 7% increase. A \$500 rise in Bid for 1934-D Dollars in NGC MS67, which have a combined pop of only 4 with none finer, constitutes a one year gain of 56%. Bid for 1928 Peace Dollars in NGC MS66 jumped to \$14,000 after being dormant for more than five years. This scarce date, with the lowest mintage of the series, today having a pop of 13 with none finer, and only two approved by CAC, surged to a sight-unseen Bid of \$10,000 in late January, 2007. This latest 40% leap brings it to equal footing with similarly graded PCGS material. One of these PCGS Dollars fetched nearly \$49,000 during an auction last April at the CSNS 72nd annual convention.

Type remains cool, calm, and avidly collected. High quality Early Copper, Flowing Hair, Draped Bust, and Capped Bust material of all denominations are especially being targeted by the higher end clientele who, aside from appreciating the lore and history of such coins, are seeking long-term hedging and wealth preservation benefits from their ownership. Bronze Indian Head Cents in MS63RD, popular with beginner collectors, are

up 20% with a \$10 gain. Obsolete denominations are still in demand, but PCGS graded Twenty Cent Pieces in MS65 appear a bit under-appreciated, and are down by 10% since a year ago. Standing Liberty Quarters are stable, with a sole pull-back of 6% for 1930 issues graded NGC MS65FH. Not much is happening to evoke any comments about Buffalo Nickels other than the fact that the Stack's Bowers Baltimore auction will feature one of only three 1913 T1 specimens graded MS68★ by NGC, and this particular one is CAC approved. This outstanding condition rarity, with its gorgeous, original, russet-gold toning, and its first year of issue status, combined with its important sub-type recognition, undoubtedly has record-breaking price realization potential. Mercury Dimes are all taking a rest from any movement after the rather prolific, albeit moderate, advances that lit up the later-date portion of this segment last week. Early, key-date specimens with Full Band designations continue to elude Bidders participating both at major show auction events and daily on-line sessions. 1934-D Walkers in PCGS MS66 continue to sell through on-line auctions for a discount, resulting in a \$25 drop after clinging to their sight-unseen Bid of \$1,400 for more than six months. Other than the 1941 issues in MS64 going down slightly, not much else is happening here.

Common \$20 Saints in MS62 through MS65, are higher than a month ago, yet are down a bit this week in light of Gold Spot's recent descent to below the \$1,700 per ounce level. While the consequences of the correction have had a negative impact on a number of generic Gold Type issues, they hardly have caused reason for participants to jump ship from this segment, as reflected by the continuing current Bid support, along with the few higher Bids even posted this week for some fractional denominations in the PCGS MS65 column. Sight-Unseen Bid has jumped for 1953-S Franklins in MS65FBL to \$10K. This new, high buyer will take any one of the 22 graded by PCGS with only 1 finer. PCGS/NGC has designated only 45 as having Full Bell Lines across all grades, while CAC has approved zero. In the last two retail public auction outings, a PCGS MS65FBL hammered for \$28,750 in January of this year, and \$25,300 in April of 2011. Without the Full Bell Lines, Bid drops to \$35 for this issue, which has a combined pop of 6,853.

Sonny Henry's Auction Services will hold a 500 plus lot coin and currency sale March 31 in Lasalle, Illinois. A few of the many highlights include a 1924-D \$20 Saint-Gaudens graded PCGS MS64; a 1929 \$20 Saint-Gaudens in PCGS MS64; and a 1905 \$1 Lewis & Clark, NGC MS64.

The Certified Coin Dealer newsletter (the *Bluesheet*) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity, nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDn may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an Ask. Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among all of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets.
Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

~ SMART PURCHASES ~ Backed by Insight

NGC Auction Central

See prices realized, volume of transactions and upcoming auctions across a range of auction houses.

NGC Coin Explorer

Examine key summaries of market information and coin history to get a comprehensive view of the coin you are considering purchasing.

NGC Census

Gain insight into the rarity of a coin's condition by seeing the number of coins NGC has certified in that grade.

NGC Price Guides

Get an expert and independent view of the value of World and US coins, including trend lines and comparative charting.

NGC Collection Manager

Track your entire collection—want list, value, storage, certification numbers, insurance reports and much more.

NGC Registry

Understand point values for coins and registry demand in the marketplace, then share your collection and compete with other collectors in the world's largest registry.

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Prooflikes.
Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

Greatest Gold Mine of Coin Data - Yours **FREE!**

CAC's POP Report puts all the data you need at your fingertips

CAC-stickered coins give you confidence. That's because we verify previously graded coins and award our green sticker only to those that are at minimum "solid" within their grade. Data for each of the stickered-coins is maintained in an elaborate online database, where you can easily verify any CAC coin.

Now, all of the data is compiled in CAC's Population Report – an absolute "must have" if you are active in today's rare coin market.

Novices and advanced collectors alike can now access up-to-date, comprehensive data on all CAC-stickered coins, free of charge, by visiting our website at www.caccoin.com.

It's easy to identify coins that are solid for the grade - just look for the CAC verification sticker. And now there's an easy way to access a gold mine of CAC coin data, the FREE CAC POP report.

Can You Afford to be out of the Loop?

Information is Power. Join the Future of Electronic Coin Trading.

Introducing CoinPlex - a revolutionary coin trading network exclusively for dealers. Now you can take full advantage of real-time bid and ask values on all coins graded with PCGS+ and NGC+ designations with or without a CAC sticker. In addition, CoinPlex offers an unrestricted bidding platform for generics like Morgans, Saints and Libs.

The CoinPlex network puts a wealth of real-time information at your fingertips. As a member, you can browse the results from all of the major auction firms, review CAC population data, bid on and list coins, and instant message other members. What's more, for a limited time Charter Membership is available at the guaranteed low price of \$100 per month.* You can opt out at any time without penalty.

With all of the benefits membership in the CoinPlex network offers, can you afford to be out of the loop? Join today as we build the best market possible - together.

* Price guaranteed for three years. Cancel at any time without penalty.

Green Bean Adds Green To Slabs

Dealers Prepare For Baltimore

Gold has fallen well below the \$1,700 per ounce level to \$1,659 after crossing paths and falling below Platinum following six months of supremacy. The yellow metal tumbled largely in response to the FED's announcement that the US economy is showing real signs of recovery, so not surprisingly, stocks went up and Gold went down. Much attention is being diverted away from precious metals, particularly Gold, by the recent rise in the financial market indices. Investors in metals and related commodities question whether the DJIA and the NASDAQ, which is at an eleven year high, are fundamentally deserving of this restored faith in them.

1936 Boone PDS Sets in PCGS MS64 fell slightly short of maintaining their long held Bid of \$320 and have declined due to discounted Asking prices. Most noteworthy among the declines here is the 20% drop for 1921 Pilgrims in NGC MS65, and auction consignors of those Spanish Trail Halves in MS64 are leaving money on the table by letting these issues go to Bidders for less than what some dealers are willing to pay sight-unseen, just ship. 1904 Lewis & Clark Gold Dollars in NGC MS64 and PCGS MS65 have been highly susceptible to discounting binges this past year, as these issues in the former grade dipped by 7%. However, both varieties of Grant Memorial Gold Dollars in MS61 through MS63 are bouncing back with some renewed energy. Bidders are gravitating towards generic Morgan Dollars in MS61 and MS62, now paying \$40 and \$43, respectively for pre '21s. Common date Gems are off a tad, now Bid \$122. Keep in mind that these had a recent peak of \$205 just last April, and this can be seen in the chart below. Both varieties of 1880-CC cartwheels in PCGS MS65, with a combined pop of nearly 4,500, remain plentiful with waning demand, and are now lower. A CAC sticker may not always assure immediate appreciation, but some better-date Morgans in MS65 with CAC approval advanced by as much as 13%, as is the case for the 1891-S. Generic Peace Dollars in MS64 edged back up \$3 to a Bid of \$46. NGC graded 1922-S Dollars in MS65 are now down by 31% from

a year ago, and disappointing auction results forced those rather elusive condition rarity 1923 issues in MS67 to drift downward by \$220. Get a CAC sticker on a key-date 1928 Dollar in MS66, and you've got a coin that Bids sight-unseen for \$5,000 more than it does without the green bean.

Early Copper seems to be having a mesmerizing effect on the collecting community, as Bidders stampede to acquire even the later Braided Hair Half and Large Cents, and they don't necessarily have to be Red. Matte Lincoln Cents are very hot now too, and Bidders are paying \$15 more to get PR63RD specimens and \$100 more for those graded PR66RB. These issues in NGC MS64RD are up this week by 20%. The upcoming Stack's Bowers auction in Baltimore will feature several lots comprised of some of the most incredible scarce date and condition rarity Lincoln Cent specimens, including an awesome 1919, graded MS68RD by PCGS, a combined pop 14 coin with just one finer, and one of only four in this grade approved by CAC. Barber Halves in NGC MS64+ are sought at a \$150 higher Bid sight-unseen. Shield Nickels without Rays graded PR66 by PCGS were pressured downward by \$15, now at \$660. After four straight weeks of trading activity that enabled the entire Buffalo Nickel series to remain completely sedentary in terms of Bid movement, a resumption of discounting and weak auction results dragged down a few of the Buffs this week.

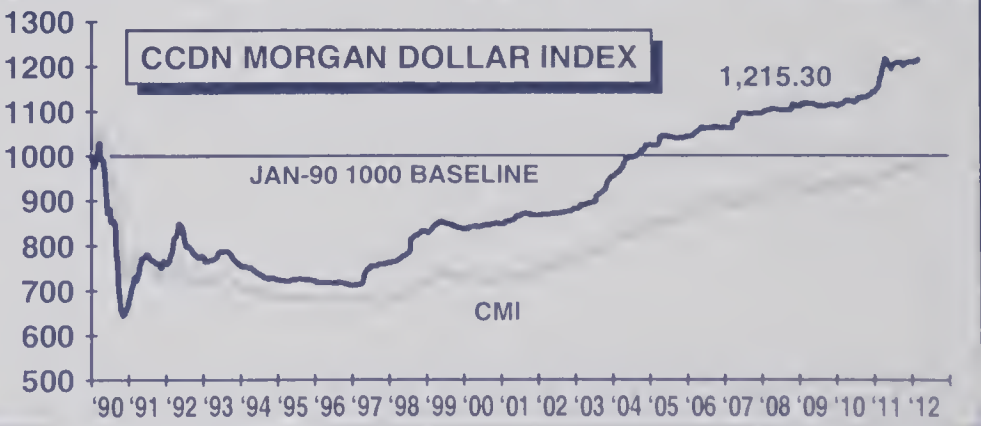

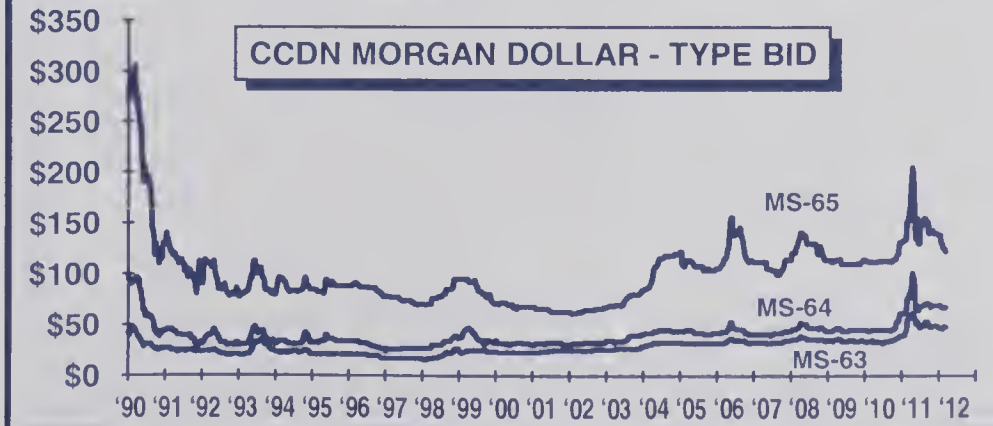

PCGS graded 1927-S issues in MS66 were the hardest hit with a 10% decline, while their comparably graded NGC peers fell by 6%. A good number of Depression-era Walkers graded MS65+ by PCGS are resuming their advances from last month, and issues such as the 1937-S increased by 18%. However, market dynamics are still forcing wholesalers to unload late-date Gem Walkers at discount. Several of these issues in PCGS MS65 and NGC MS66 are on the bumpy path south again, as those in the latter grade column edged lower by \$8. NGC graded 1946-S issues in MS67 slid by \$100, as they did nine weeks ago, declining by 16% since then. Proof Singles explode with at least one dealer upping the ante for most issues dating 1936-1942 in all grades.

Dealers are preparing for a trek to the Baltimore Expo March 22-25 as well as the Stack's Bowers auction, where lot viewing begins March 19. See highlights herein. Pre-show deals will take place in hotel ballrooms and other meeting places as participants attempt to get a jump on the best material before it hits the bourse.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services determined through careful study of market activity including the nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDn may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

CAC Leaps Another Milestone While Leading the Charge!

CAC was founded over four years ago by leading members of the numismatic community to set forth stringent standards for quality within a grade. Before CAC, prices for the solid quality coins were tethered to their lesser quality counterparts, thus holding down the market. Today, CAC is leading the charge to identify coins that fully merit the grade it was assigned. Now, advanced collectors and novices alike have an easy way to identify coins that are solid for the grade - look for the CAC sticker.

CAC continues to leap impressive milestones at breakneck speed, while giving you confidence in the value of a coin.

Every Numismatic Library needs a complete set of the
COIN DEALER newsletter family of publications

the Backsheet

Now that we have your attention, we really haven't started an additional newsletter — but your library should include **Back Issues** of our publications. Back issues are available two ways:

You can purchase small quantities to fill in missing issues, to obtain articles necessary for your research, or to follow your special interests. You may also combine your order for back issues of any of our publications to obtain the lowest price:

1-10 issues - \$3.00 each • 11-25 issues - \$2.50 each • 26 & over - \$2.00 each

Or, you can purchase **complete sets** of back issues for really dramatic savings:

Complete set of the weekly **Coin Dealer newsletter (Greysheet)**
from June 14, 1963 to December 23, 2011, now includes 2,475 issues.
At \$2.00 each this would normally cost \$4,950, but a complete set
is only \$3,175.

Complete set of the monthly **CDN Monthly Supplement**
(formerly the Monthly Summary)
from August 1976 to December 2011, now includes 425 issues. At \$2.00
each this would normally cost \$850, but a complete set is only \$585.

Complete set of the **CDN Quarterlies**
from January 1992, to December 2011, now includes 240 issues, a
complete set is only \$315.

Combined weekly **CDN (Greysheet), Monthly Supplement & Quarterlies**
now includes 3,140 issues, and extra savings at only \$3,900.

Complete set of the weekly **Certified Coin Dealer newsletter (Bluesheet)**
from August 22, 1986 to December 23, 2011, now includes 1,253 issues.
At \$2.00 each this would normally cost \$2,506, but a complete set
is only \$1,600.

Complete set of the monthly **Currency Dealer newsletter (Greensheet)**
from September 1980 to December 2011, now includes 376 issues.
At \$2.00 each this would normally cost \$752, but a complete set
is only \$525.

CCDN — a weekly report on the Sight-Unseen certified market published by the Coin Dealer Newsletter (est. 1963)

newsletter

Vol. XXVII No. 12

March 23, 2012

Single copy price \$5.00

Generics Head South

\$25K Sight-Unseen For \$10 Liberty

Dealer-to-dealer activity has been quite heavy on the electronic trading networks, which is somewhat unusual heading into and during a large coin show. Whitman's Baltimore Expo is underway until the 25th with an auction by Stack's Bowers still in progress. Nearly twice as much volume changed hands through the Certified Coin Exchange and CoinPlex compared to recent weeks. A 1906-S \$10 Liberty graded PCGS MS66, sold sight-unseen through CCE for \$25,000 March 19. PCGS has graded three in MS66 with only a single example graded higher. NGC has graded two in MS65 with none finer.

Several Commemorative Half Dollars, including the Elgin, Norfolk, Robinson, Roanoke, and the 1935-S San Diego, encountered lower prices in online auction activity to such a degree so as to result in decreases across multiple Mint State grades. This week's Market columns contain many of these low auction prices realized in addition to Asking prices and Trades. Substantial quantities of this material continue to remain readily available in the marketplace. Even CAC and + graded examples have been selling for less than Bid, albeit usually not much more than just one Bid increment lower. Issues with huge spreads between the top grades continue to receive strong attention from buyers. Booker T. Washingtons are such an example with all PDS Sets in PCGS MS67, except for the 1946, accelerating to new highs, and rising between 8% and 15%, depending on the year of the Set. Bidders are content to offer \$500 more sight-unseen for the 1947 Set of the same grade in NGC slabs. 1905 Lewis & Clark and 1917 McKinley Gold Dollars in MS61 are both up a bit more for the second straight week as each of their peers in MS62 also increased. Grant with Star Gold Dollars in PCGS MS62-MS63 are resuming their ascent from last week as well.

Like them or not, whether they are up or down from one week to the next, generic Morgan Dollars comprise a major segment through which so much daily trading activity within the coin market is sustained. The seesaw activity continues, although on the downside again, for most generic cartwheels, largely in grades MS62, MS63, and MS65. Those desirable turn-of-the-century 1900 issues in condition scarcity MS67, however, defied the herd by posting advances, with those in PCGS slabs being especially sought-after now at a 10% higher Bid. Negativity cast upon Peace Dollars concentrated among the early-dates, including the generics, in MS61

through MS64, and the \$3 to \$4 reduction that each of these examples absorbed consequently translates into a decline by as much as 11%.

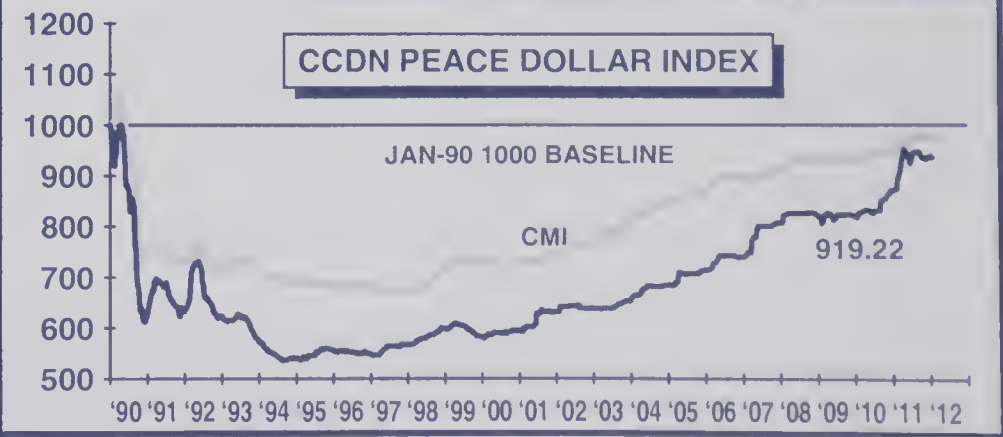

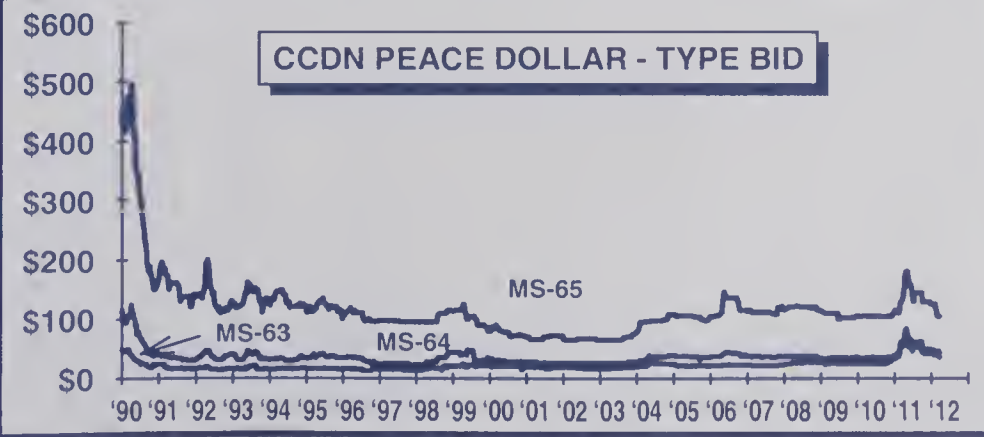

Stack's Bowers is in its final stages of consummating its auction in Baltimore this week, and among the most noteworthy of the Type material featured there is an incredible 1872 Two Cent Piece, graded MS65RD+ by PCGS with CAC approval, a beautiful 1794 Flowing Hair Half Dime, graded MS66 by NGC, and an always popular 1897-O Barber Dime, graded MS65+ by PCGS with a green bean on its slab. Liberty Nickels With Cents in MS65 and NGC graded Type II Standing Liberty Quarters in MS64-MS65 faltered a bit. Other than common Barber Dimes in PR64 and Barber Quarters in PR63, each shaking off \$20 from their Bids, Proof Type appears as a refuge for market participants to find relief from all the much harsher realities now prevailing throughout many of the other segments. 1913 Type II Buffalo Nickels in MS64 and 1938-D issues in MS65, both graded by NGC, drifted moderately lower and have left money on the table in recent auction outings. Weak auction performance resulted in reductions for 1937 Mercury Dimes in PCGS MS65FB as well as for five wartime issues in NGC MS67FB. 1942-S Merics in NGC MS67 dropped rather drastically by 26%, while comparably graded 1945-S issues by PCGS MS67, which had a precipitous decline last month, haven't yet shrugged off their vulnerability as this week's decline of another 29% for them will attest.

Walker enthusiasts may not get as edgy and disgruntled over every little pullback that's been predominantly afflicting the more common issues almost on a weekly basis. What is in play, however, are the worries over the cumulative consequences of these declines, which began late last summer shortly after the entire Walkers series seemed to be at the fore of a euphoric bull market. Widespread discounting along with a lack of sight-unseen Bids concludes with only more downside results for late-date issues mostly in the MS64 and MS65 columns. Type I \$1 and \$2½ Liberty issues in MS62 and \$2½ Indians in MS61 were the only upbeat Gold Type components defying the odds of what appears to be an economic trend that isn't too supportive of a rise in Gold Spot anytime soon. Despite the unflattering prospects for this segment, virtually all generic Gold Type issues in Gem or better grades have held up well and retain strong Bid support at current levels.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity including the nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of a high Bid by a Ask. Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the property of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale trading networks* and other sources of *wholesale* transactions. Auction prices realized or retail trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that prices exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guarantee or that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin may display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy:** During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "w" - Lowest asking price during the week prior to publication (week old); "m" - Lowest asking price during the previous three weeks (month old); "t" - Trade during the most recent month; "lm" - Lowest asking price appearing last month; "lt" Trade appearing last month; "ot" Trade older than 2 months; " " a blank, for all Market prices older than two months; "a" for auction transactions "oa" - auction older than 1 month

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

PCGS DMPL and NGC DPL Bids are for fully Deep Mirror Prooflike coins. Bids for PCGS PL and NGC PL dollars will be listed monthly in a supplemental insert. CDN (Greysheet) Bids have always represented fully, deep mirror prooflike specimens.

CCDn does not represent that it is possible to purchase selected coins at these Bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

Can You Afford to be out of the Loop?

Information is Power. Join the Future of Electronic Coin Trading.

Introducing CoinPlex - a revolutionary coin trading network exclusively for dealers. Now you can take full advantage of real-time bid and ask values on all coins graded with PCGS+ and NGC+ designations with or without a CAC sticker. In addition, CoinPlex offers an unrestricted bidding platform for generics like Morgans, Saints and Libs.

The CoinPlex network puts a wealth of real-time information at your fingertips. As a member, you can browse the results from all of the major auction firms, review CAC population data, bid on and list coins, and instant message other members. What's more, for a limited time Charter Membership is available at the guaranteed low price of \$100 per month.* You can opt out at any time without penalty.

With all of the benefits membership in the CoinPlex network offers, can you afford to be out of the loop? Join today as we build the best market possible - together.

* Price guaranteed for three years. Cancel at any time without penalty.

Busy Baltimore In The Books

Better Morgans Move Up

Dealers have returned from Baltimore after an excellent show and auction. Stack's Bowers racked up over \$16 million, see highlights herein. Many wantlists are still unfulfilled as overwhelming demand continues to outweigh supply. Premium quality material is what everyone is after, and it will likely take higher Bids to bring these coins to the market. Generic through better slabs of average quality are doing quite well in the sight-unseen arena as reported here. The current health of the entire market remains robust overall, and this bodes well as an indication for the remainder of the year.

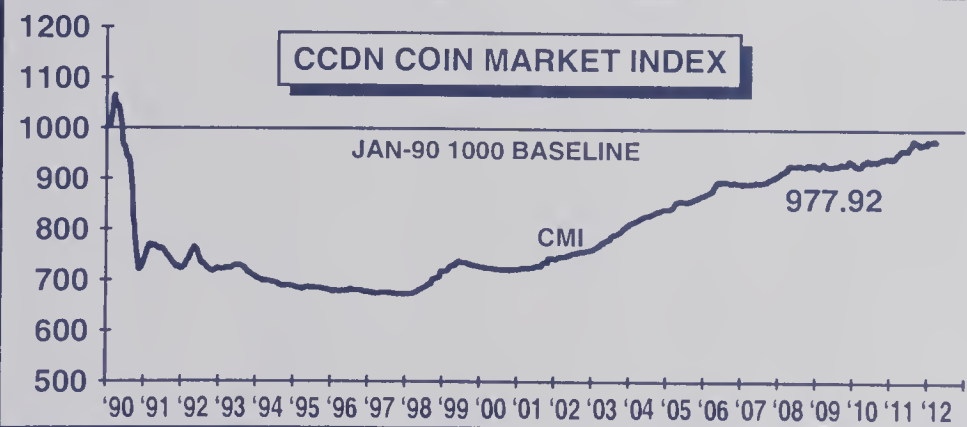

A large number of Gold and Silver Commems remain abundant, even those in Gem and better, and the impact of this condition has both positive and negative consequences. The vast supply, of course, allows for a market to provide opportunity for many to collect them. However, the volatility factor is the other edge of the sword, and prices for Classic Commems can deflate every now and then, as has again been happening this week, but their stabilization is more a matter of "when" than "if," ideally along with their eventual rise. PCGS graded Bay Bridge, Norfolk, Robinson, and 1935-S San Diego issues in MS64 and lower are more susceptible now to the liquidation and discounting occurring within this segment. Far less bad news prevails over Gold Commems, as \$2½ Pan-Pacs in MS61 shot up by \$200 to Bid at \$1,650. Bidders are getting more discriminating in their sight-unseen offers for both Morgan and Peace Dollars and are taking into consideration the merits of scarcity along with availability, more so than the slab in which a particular Dollar is encapsulated. This is somewhat reflected by the similarities in the positioning of the plus and minus signs appearing this week throughout the various grade columns for both PCGS and NGC. The gap between generic and better date issues is becoming wider by way of plentiful Bid increases for Carson City examples and other better dates. Downside pressure among Peace Dollars in the MS61 through MS63 columns is again forming a pattern of decline nearly identical to that as last week. All of the common through better dates in MS64 and higher remain strong at current levels.

Dealers looking for early Coppers want more material than the market has been providing, so they have increased their sight-unseen Bids for several issues in hopes of shaking some loose. Liberty Cap Large Cents in MS61 and MS62 in all color designations are up considerably, as those graded as such with the elusive Red designation posted respective gains of 10% and 18% this week. Liberty Nickels With Cents in PCGS MS65 continue to trickle lower, while Barber Dimes in PR64 and NGC graded Barber Quarters in PR63 are also in a moderate descent, as they all were last week. Recent auction results clearly indicate that Capped Bust Halves are resurgently popular, as the earliest dated issues are more than 200 years old now. One of NGC's largest supporters is currently making a market in MS63 examples by selling them for \$1,575 while paying \$1,525 sight unseen, resulting in instant liquidity with little downside risk.

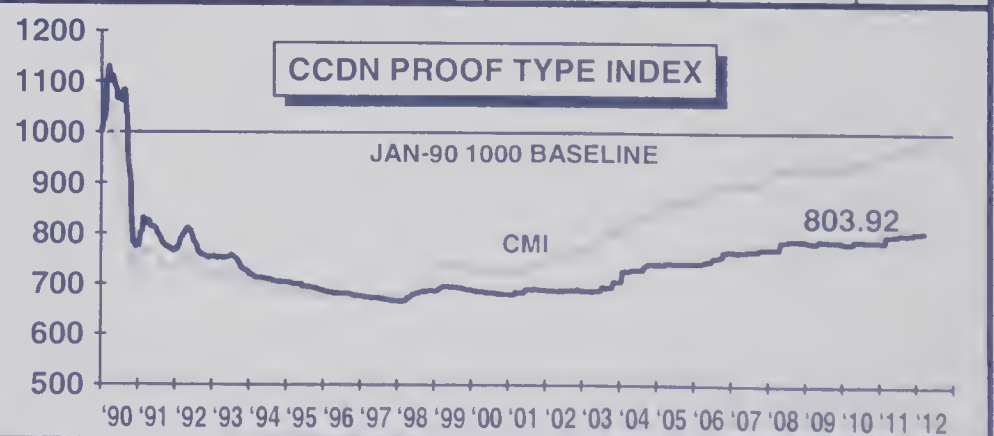

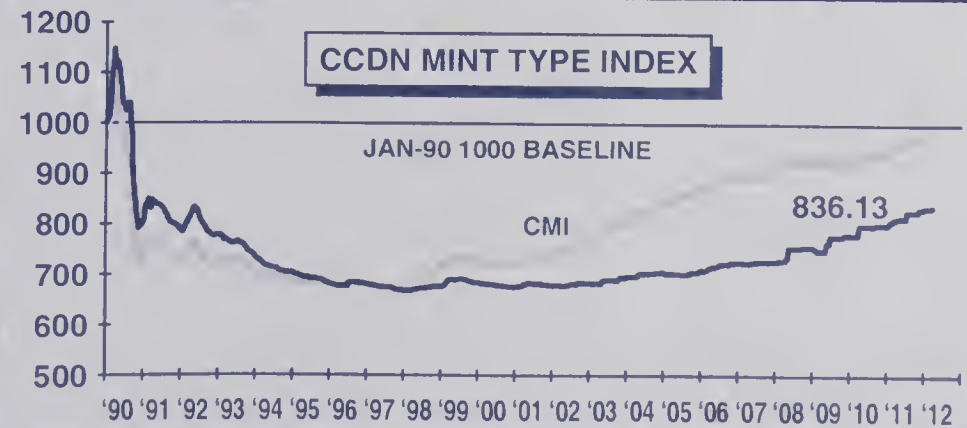

Although the Buffalo Nickels series hasn't been moving and shaking the coin market all that much lately, some issues are eliciting very strong and competitive Bidding activity from on-line auction participants. Bidders are particularly gravitating towards the Depression-era issues in Gem grades. A 1929 D graded PCGS MS66, for example, sold for \$1,955 earlier this week, along with a 1935-S in PCGS MS65 that realized a respectable \$288, both through Teletrade. Mercury Dimes are also in a dormant period right now in terms of exerting any preponderant influence over the sight-unseen market, but this series is far from ignored by attentive collectors who always jump on an opportunity to acquire those premium quality, scarce issues, be they with Full Bands or not. Early Gem Walkers have been hard to find, and perhaps this is the reason why a few of the earliest dated S-Mint issues in lower Mint State grades are now being sought at higher Bids. Issues such as the 1916-S in MS61, as well as the 1917-S (Rev.), 1918-S, and 1920-S in MS62, in either slab, are more appreciably recognized for their scarcity. Not so, however, for five late-date PCGS graded P-Mint issues in MS67, as those dated 1939-1943 each descended by \$10 for a second straight week.

Stabilization is clearly at play within the Gold Type segment, with some generic issues in MS61 through MS63 posting moderate gains resulting from trading activity that predominantly occurs at current Bid levels. Gold Spot appears to be clinging onto that pivotal \$1,650 per ounce mark, with little long-lasting deviation in either direction. Central States is the next big convention, coming up April 18-21, beginning with PNG Day. The show will be held in Schaumburg, IL, with an auction by Heritage.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market nationally reported sight unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDn may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an on-posted high bid. Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

MERCURY DIMES

CCDN does not represent that it is possible to purchase selected coins at these Bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

Greatest Gold Mine of Coin Data - Yours **FREE!**

CAC's POP Report puts all the data you need at your fingertips

CAC-stickered coins give you confidence. That's because we verify previously graded coins and award our green sticker only to those that are at minimum "solid" within their grade. Data for each of the stickered-coins is maintained in an elaborate online database, where you can easily verify any CAC coin.

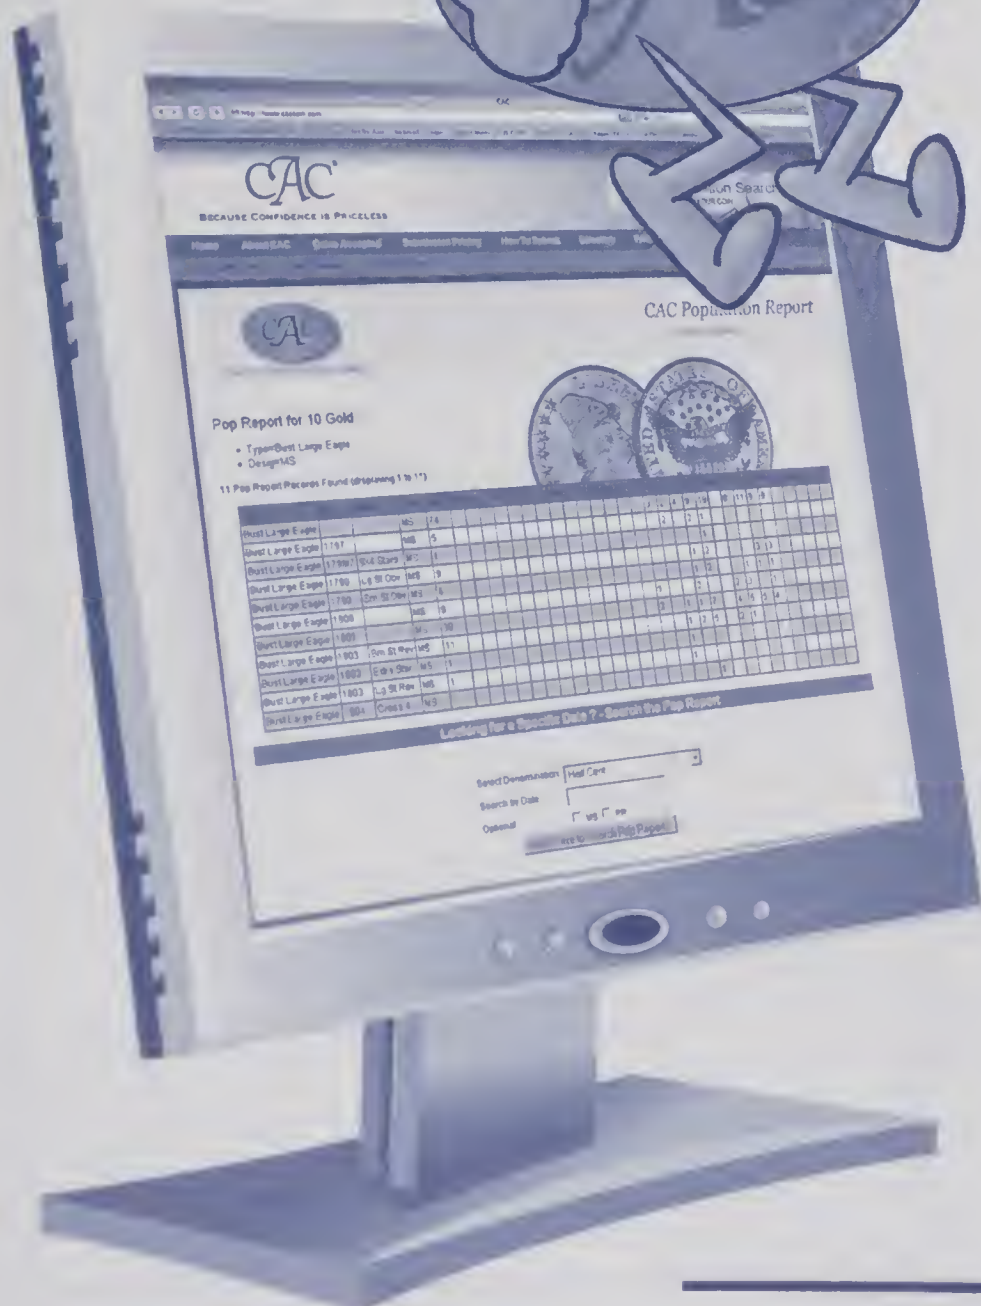

Now, all of the data is compiled in CAC's Population Report – an absolute "must have" if you are active in today's rare coin market. Novices and advanced collectors alike can now access up-to-date, comprehensive data on all CAC-stickered coins, free of charge, by visiting our website at www.caccoin.com.

It's easy to identify coins that are solid for the grade - just look for the CAC verification sticker. And now there's an easy way to access a gold mine of CAC coin data, the FREE CAC POP report.

Peace Dollars Show Strength Proof Singles Propel

While this week's sight-unseen trading has been a little slow on the electronic dealer-to-dealer networks, action should pick up with Teletrade's Best of Spring auction duo. This 5,500 lot sale taking place April 8 and 9 contains over \$3.5 million in certified slabs up for grabs. A few of the noteworthy coins include: an 1834 Half Cent, Large Date, Small Letters graded MS65+ by NGC; an 1859-C Gold Dollar graded NGC MS61; a 1922-S \$20 Saint-Gaudens graded NGC MS65; a 1925-D Buffalo Nickel with a grade of NGC MS66★; a 1799 Draped Bust Dollar graded MS63 by PCGS; and an 1841-C \$2½ Liberty graded PCGS MS62.

The picture isn't getting any prettier yet for Silver Commems, and a few of them are again besieged by multiple grade column declines, including Connecticut, Elgin, Huguenot, and 1946 B.T. Washington Type issues. Antietam Halves in MS65, after recovering just last January from a previous decline, disappointingly fell back by \$70, while Roanoke issues of comparable grade are among the hardest to fall, dropping by 20%. It is somewhat consoling, however, to see the Gold issues all holding up well by way of solid current Bid support.

Some upward movement among Morgan Dollars is limited to better-date issues in lower Mint State grades, but the relatively mild trading activity did not preclude declines from also determining this week's outcome. While 1883-CC and 1884-CC cartwheels in MS65 continue to firm up for a second straight week, those rather scarce 1895-S issues in MS63 slumped down by \$300 due to weakened demand. Bidders will get a chance to compete for another 1893-S, this one graded MS62 by NGC, which will fall under the hammer in Schaumburg during Heritage's upcoming Platinum Night event. A flurry of plus signs adorn the Peace Dollar series, partially offsetting losses of the past two weeks for many issues in MS61 thru MS63, and several higher graded examples benefited from the upswing, including the 1926-D in NGC MS65, shooting up 25% for a nice recovery. Buyers are also looking for those elusive five-figure examples in NGC Superb Gem condition including '34, '34-D and '35-S with a pop of 5, 2 and 3, respectively.

Bidders are demanding more Braided Hair Large Cents in MS63 thru MS65 with Brown and Red-Brown color designations, and are offering \$250 more for those eye-catching specimens grading MS67BN by PCGS. Copper-Nickel and Bronze Indian Cents in a variety of Mint State grades are also in greater demand. Two Cent Pieces in Gem are gaining strength as well, with those grading MS66RB by NGC advancing 17%. However, Barber Quarters in MS64 are receding further, as those in PCGS slabs have dropped back down to Bid as they did just over a year ago. Matte Proof Lincoln Cents in PR63RD gained \$25 to a new sight-unseen Bid of \$350. Only a few moderate declines posted in the

PR66 grade column including Three Cent and Shield Nickels graded by PCGS as well as Liberty Nickels with Cents in NGC slabs. A diverse variety of Mint State and Proof Type material comprises many of the lots featured by Heritage in Schaumburg, from very early and rare Coppers to Draped Bust and Liberty Seated Dollars, as well as some astoundingly gorgeous, seldom seen early and mid-20th century key-date and condition rarity examples that, for many, will surely evoke nostalgic memories.

Proof Lincolns escalate by 25%, followed by early Proof Washington Quarters and Jefferson Nickels in select grades from PR63 PR67. ANACS and ICG are also participating in these increases. Proof Half Dollars including select Walkers and Franklins are not as fortunate with declines recorded as high as 7%. Within the Buffalo Nickel segment only the 1917-D in NGC MS66 stood out from the rest adjusting marginally downward by a mere \$20. Several war-time Mercury Dimes in Full Band Gem grades are getting pounded by discount trading activity, and the \$4 to \$10 Bid declines constituted significant reductions on a percentage basis. Merics will have a good chance to set the stage on fire in Schaumburg as several extraordinary key-date specimens will be auctioned, including a CAC approved 1919-D in PCGS MS66FB. A similar coin last sold at public auction for \$115,000 back in August, 2010. A 1928-S in PCGS MS67FB will also be among the closely

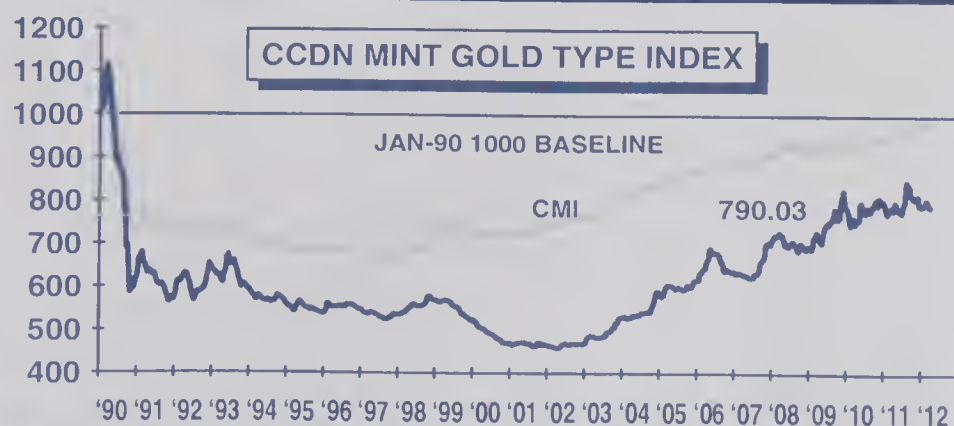

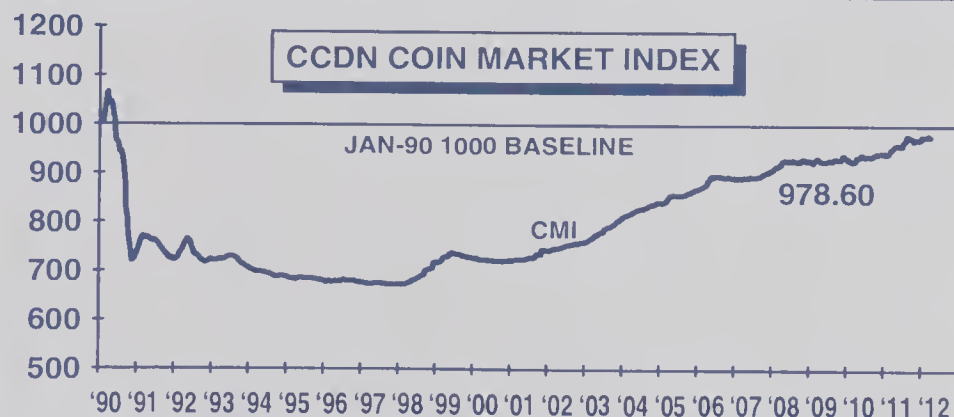

watched lots.

This obviously is not an upbeat market for all generic material, as the recent performance of late-date Walkers certainly has been demonstrating. The incremental but precipitous declines abound again for these issues in MS63 and MS64 and, especially, for those in PCGS MS66. Early and key-date Walkers, on the other hand, remain firm, and Bidders are even sifting many of them out now in ANACS slabs with higher offers. It may take a while before mainstream attention focuses back on Gold, but there sure are enough die-hard Gold bugs out there to maintain a fair amount of sustenance within the Gold Type segment. Generic Gem Gold material has been quite resilient these past several weeks while \$20 Libs and Saints in MS61 thru MS64, along with some fractional denominated issues of comparable grade, continue to fluctuate within a relatively narrow range in accordance with the dictates of Gold Spot.

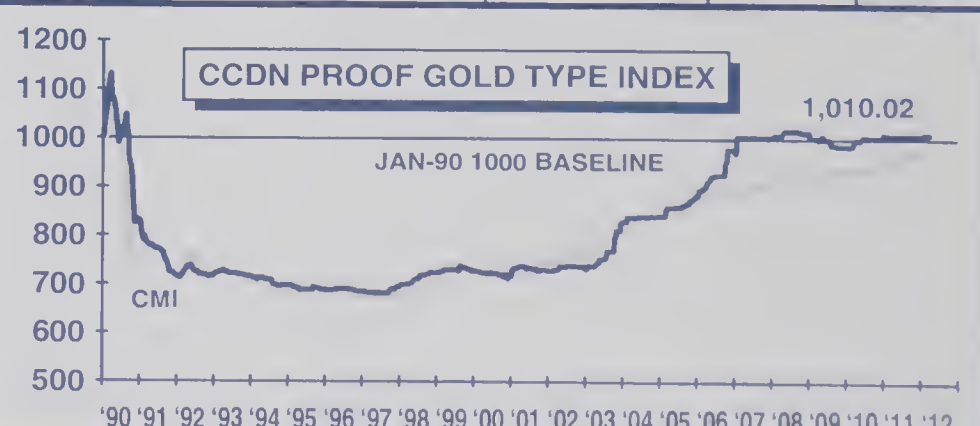

Schaumburg, IL will host the Central States Numismatic Society's 73rd convention April 18-21. This highly anticipated show, with a 250 plus booth bourse has already sold out. Heritage will auction a 1792 Silver Center Cent Pattern in MS61 at the show which is the first coin struck at the Philadelphia Mint. See a list of additional highlights herein.

Silver Commems Head Lower Morgans & Walkers Slip In MS66

Many market participants are wondering if Bids for Classic Silver Commemoratives will continue to slide. Numerous issues in MS61 thru MS64 are in further decline, as are a handful in Gem grades as well. Bridgeport and Spanish Trail Halves are among those taking the broadest hit with declines recorded across multiple grades. Discounted auction results along with lower wholesale Asking prices resulted in lower Bids in Gem and better for issues including: Norfolk, 1934-D & 1937-D Oregon Trail, 1921 Pilgrim, and Wisconsin. See the chart below listing a dozen of the largest percentage drops in the past five years. Heritage's Schaumburg auction has been luring a considerable number of Silver Commem enthusiasts with an offering of some of the finest known specimens, including an Iowa, a 1937-D Oregon, two Wisconsins, and a York issue, all graded MS68 by PCGS with CAC approval. A marginal pull-back for \$2½ Pan-Pacs in MS65 did little to stir up any serious consequences within the Gold Commem segment.

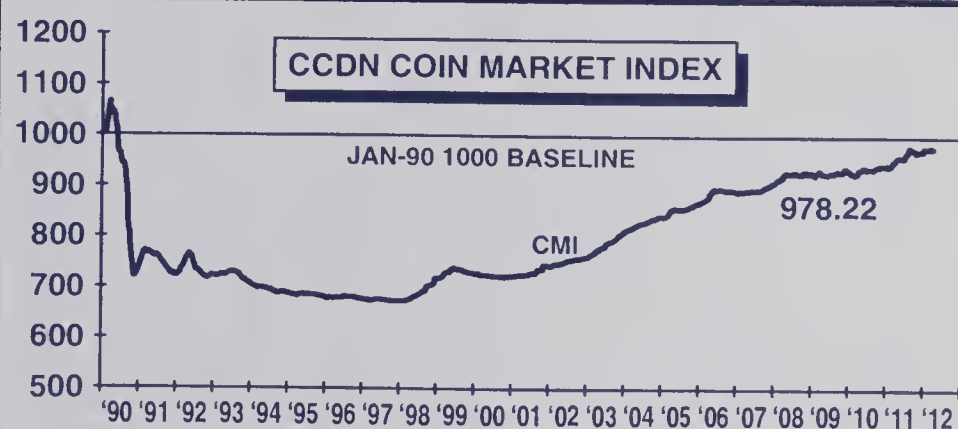

Common date Morgan Dollars in MS66 graded by PCGS and NGC are down a bit, now Bidding \$250 and \$240, respectively, while comparably graded 1883-CC PCGS Dollars and 1884-CC cartwheels in either slab diverged from the pack with moderate advances. Several slightly better-date Prooflike Dollars in MS63PL thru MS65PL are ascending by way of higher sight-unseen buy offers, reflecting increased demand, while the more common issues are buckling to an over-supply effect. Generic Peace Dollars in MS65 are now at an even \$100 Bid, and those 1925 issues in NGC MS67, which have the highest combined pop of the series in this grade at 137 with 2 finer, dropped \$225 due to disappointing auction results.

In sync with the heightened demand for early Coppers, next week's Chicago area auction is featuring two 1793 Liberty Cap Half Cents, both graded PCGS AU58, a 1793 "America" Chain Cent in PCGS AU55, and an extensive selection of high-quality Mint State and Proof Indian Cents to complement the event's offerings. Matte Proof Lincoln Cents are seeing their sight-unseen Bids boosted for a number of dates in grades through PR67RD. These little low pop jewels have been strong for sometime now and these higher

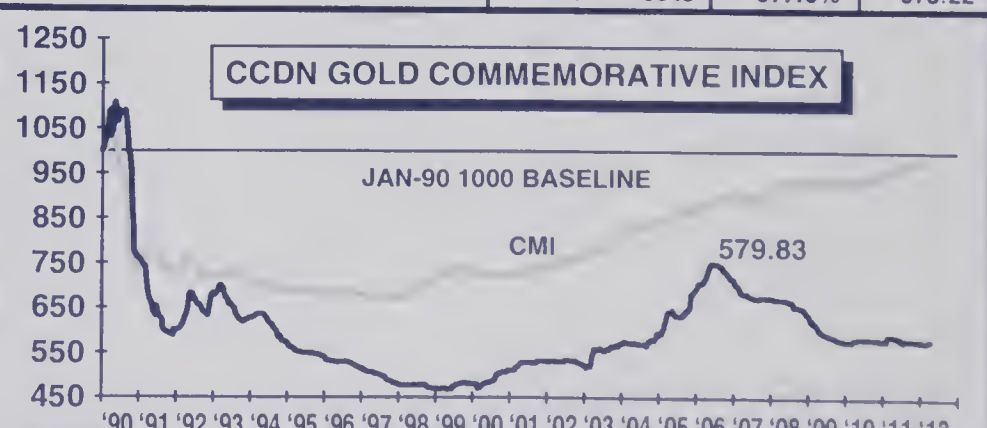

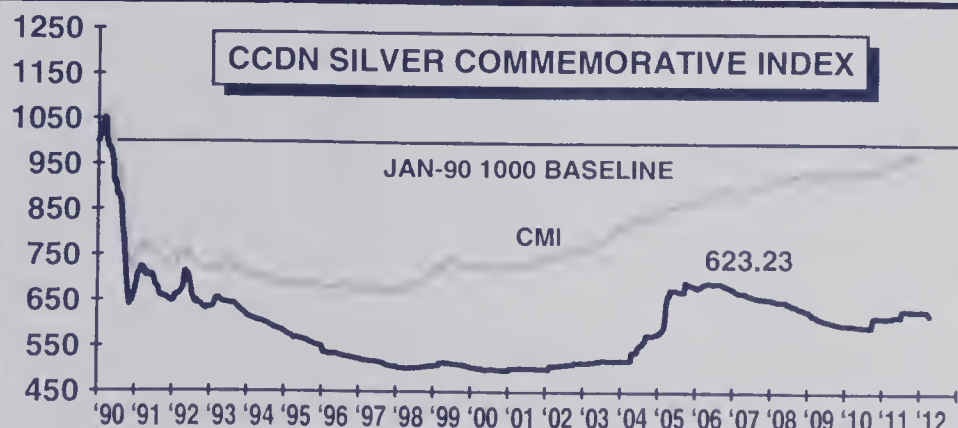

levels are still perceived by many to be ultra conservative. Some market softness is posing challenges for a few higher denominated issues, particularly for Liberty Seated Dimes with Legend in MS65, Barber Dimes in MS63, Barber Quarters in MS61, and a few issues pertaining to the Standing Liberty Quarter series in MS63 thru MS65, as those of the latter grade with NGC Full Head designations lost ground by 10%. Liberty Seated Dimes with Legend in MS67 are being sold for \$1,975 with the seller offering to pay \$1,950 for any of the 250 graded by NGC, regardless of what the coin looks like. Only a single distraction is present among Proof Type as Barber Quarters head \$45 lower in NGC PR64 in reaction to a less than desirable retail auction outing combined with little wholesale Bid support.

NGC graded 1913 T I Buffalo Nickels in MS64 are teetering a bit, and Bid for their MS67 peers sustained a 10% pull-back. Those affordable and popular 1938-D Buffalo Nickels in Gem are weaker as well, with Bid for PCGS Gem examples now down to \$30. These were once thought to be a market-maker's dream as they are highly desirable with collectors and easily obtainable. Half of the PCGS population in MS65 is valued at \$335K while all of the 6,200 graded Gem by NGC are Bid less than \$205K in total. Bids for common, late-date Walkers continue to crumble, with MS66 being targeted in this report. At their most recent pinnacle back in early September, these issues had a sight-unseen Bid of \$183, and their current Bid of \$150 constitutes a rate of decline since then that translates into a reduction of nearly 20%. Mercury Dimes are not as susceptible to discount activity as they were last week, but 1943-D issues in PCGS MS66FB haven't yet applied the brakes all the way in their downward path, incurring another incremental drop for a 20% two week decline. A not so common 1945 Merc, graded MS65FB by PCGS, is among the several key and semi-key date issues of this series due to conclude their auction sessions in Schaumburg next week.

It's a mixed scene for the Gold Type segment, with some generic issues posting partial recoveries while some reacted with more sensitivity and have headed lower. After three weeks of firmness, PCGS graded \$20 Saints in Gem were forced downward by just a bit. Premiums over melt remain at record low levels for all denominations listed here in a wide range of grades. Extraordinary Gold issues are among the top lots to be offered in Schaumburg next week, including an 1864 \$20 Liberty graded MS65 by PCGS, a true rarity in any Mint State grade, much more in Gem, and it's uniqueness in this grade qualifies it as the finest known example of its kind.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services determined through careful study of market activity including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers and are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

www.ccdn.com

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

“Eye appeal is everything.
And when a coin is in a holder, the holder is
part of the eye appeal.”

Greg Rohan, *President, Heritage Auctions*

**“The Scratch-Resistant Holders
from NGC are optically superior**
to any holder out there. I think everyone
should get their collection reholdered
in them—and certainly before bringing
it to market!”

John Albanese, *Numismatic Expert*

“I had a classic rarity—
a million-dollar coin or better—
**reholdered by NGC, and the
difference is incredible.**
I even got a WOW from a top expert in the field.”

Adam Crum, *VP, Monaco Rare Coins*

NGC Scratch-Resistant EdgeView® Holder

Upgrade to optically superior display. Reholder your coins in the
NGC Scratch-Resistant EdgeView Holder today. NGCcoin.com

April 13, 2012

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Prooflikes. Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

UPDATE!

CAC Stickers Do Not Add Value!

Then why do CAC stickered coins bring a premium?

While it is true that CAC-verified coins bring a premium in the market, the "little green" sticker is not what adds the value. Truth is, with or without a CAC sticker, a quality coin will always bring a premium.

CAC has evaluated over ^{350,000}~~250,000~~ coins with a market value over ~~\$1.3~~ billion. Only those coins which meet stringent standards for quality within a grade are awarded a sticker. That is why CAC stickered coins bring a premium - they are placed on only quality coins.

What's more, CAC is a powerful market maker for its stickered coins.

In fact, CAC has recently purchased over ~~\$200,000,000~~ worth of coins.

[^]
\$250,000,000

So the CAC sticker does not add value
- It is just an easy way to identify
coins that are solid for the grade.
And it gives you confidence in
the value of a coin.

*The CAC sticker
doesn't add value,
it just helps
to identify
a quality coin.*

Can You Afford to be out of the Loop?

Information is Power. Join the Future of Electronic Coin Trading.

Introducing CoinPlex - a revolutionary coin trading network exclusively for dealers. Now you can take full advantage of real-time bid and ask values on all coins graded with PCGS+ and NGC+ designations with or without a CAC sticker. In addition, CoinPlex offers an unrestricted bidding platform for generics like Morgans, Saints and Libs.

The CoinPlex network puts a wealth of real-time information at your fingertips. As a member, you can browse the results from all of the major auction firms, review CAC population data, bid on and list coins, and instant message other members. What's more, for a limited time Charter Membership is available at the guaranteed low price of \$100 per month.* You can opt out at any time without penalty.

With all of the benefits membership in the CoinPlex network offers, can you afford to be out of the loop? Join today as we build the best market possible - together.

* Price guaranteed for three years. Cancel at any time without penalty.

Ebay Expands Listing Restrictions

Coin Doctoring Definition Accepted

While the sight-unseen marketplace is somewhat subdued this week by way of dealer-to-dealer trades, much activity is underway in the Chicago area where many dealers are participating in the CSNS convention. To kick things off, members of the PNG approved a three-point definition of coin doctoring on April 17, at the Schaumburg show. This definition has taken two years to put together, and is only one fifth the length of the previously rejected, 900 word proposal submitted in January. Just one of the 50 who attended the meeting voted against the definition, which is worded:

Coin doctoring refers to the alteration of any portion of a coin, when that process includes any of the following:

1)

Movement, addition to, or otherwise altering of metal, so that a coin appears to be in a better state of preservation, or more valuable than it otherwise would be. A few examples are plugging, whizzing, polishing, engraving, "lasering" and adding or removing mint marks.

2)

Addition of any substance to a coin so that it appears to be in a better state of preservation or more valuable than it otherwise would be. The use of solvents and/or commercially available dilute acids, such as Jeweluster, by qualified professionals is not considered coin doctoring.

3)

Intentional exposure of a coin to any chemicals, substances, or processes which impart toning, such that the coin appears to be in a better state of preservation or more valuable than it otherwise would be. Naturally occurring toning imparted during long-term storage using established/traditional methods, such as coin albums, rolls, flips, or envelopes, does not constitute coin doctoring.

Following a joint decision in January resulting in the removal of replica coins, eBay and the PNG have worked together again to make more changes as to what can be sold on the auction website. Third-party grading and certification services must meet six requirements in order for their slabs to be advertised and sold as such thru eBay beginning May 30. These requirements are: online verification of the unique slab serial number; current online population report; written buyback guaranty; a tamper resistant holder with anti-counterfeiting measures built in; grade 50,000 coins and have three graders on staff that are considered numismatic experts. Only PCGS and NGC graded coins currently qualify and will be allowed to include a numeric grade in the title and/or description. Coins encapsulated by other services may not include a numerical grade in the title or listing and will be treated as raw or ungraded. Also, under these new restrictions, U.S. coins listed for sale or auction

with a price of \$2,500 or more, must be encapsulated by PCGS or NGC. ANACS responded to this April 17 eBay announcement by stating that they fall short on only one requirement which they will meet by enabling online verification of slab serial numbers by the May 30 deadline.

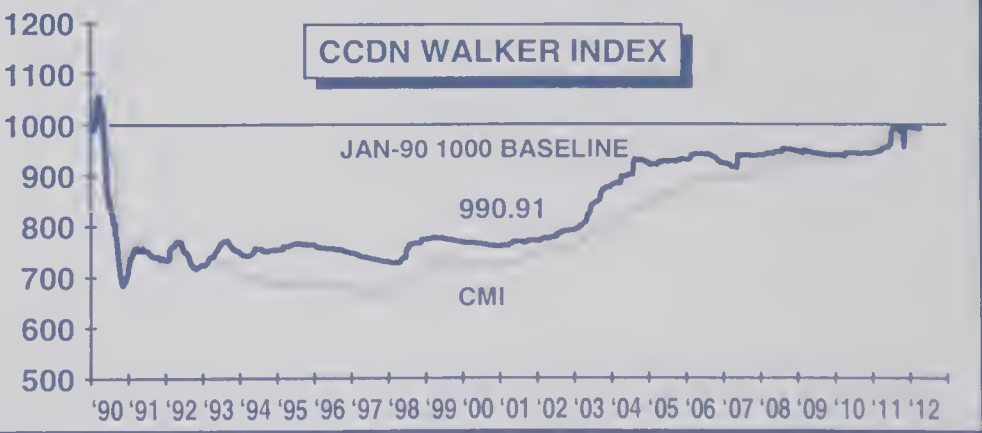

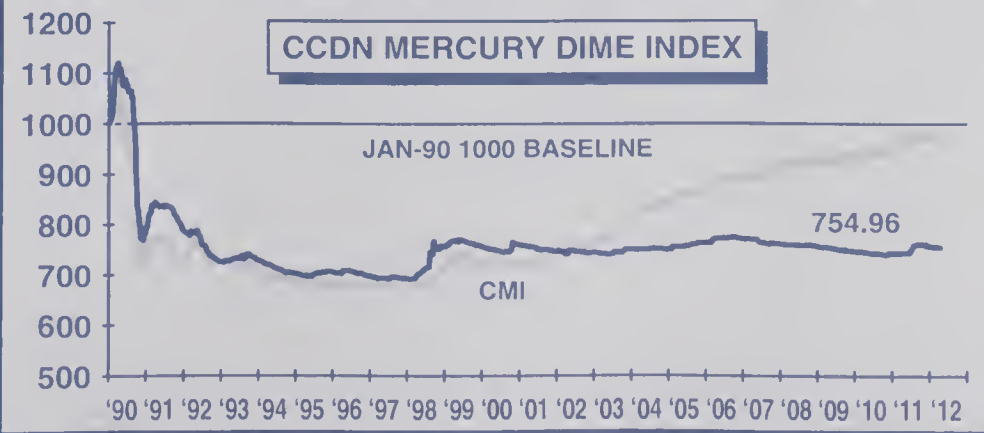

CAC is implementing an increase in submission fees beginning May 1. Prices will rise from \$10 to \$12.50 each for submissions valued at \$10K or less and from \$20 to \$25 each for submissions valued over \$10K. Those coins which do not receive a sticker have no fee. Collector members will not be affected by this rate increase until December 31, 2012. This increase is the first in 4½ years of operation and is being done in an attempt to keep the company small and maintain the current turnaround period of usually less than a week. To date CAC has awarded the green sticker to 158,000 coins, and the coveted gold bean 1,112 times.

Bids for Silver Commems in multiple grades have been steadily declining for four straight weeks without a single increase. Compounding this malaise is yet another significant succession of reductions resulting from weak auction performance. PCGS graded Albany and Rhode Island issues in MS61 thru MS64 are among those faltering to the most noticeable extent this week, along with NGC graded Lexingtons in MS61 thru MS63. PCGS Plus graded Silver Commem material is not as susceptible to the depressiveness. In fact, sight-unseen Bidders are trying to pry away an elusive Sesquicentennial Half in PCGS MS66+ by offering \$9,000 above its previous Bid. \$2½ Pan-Pac Gold Commems in MS65 encountered some moderate weakness for the second straight week, while CAC and Plus graded coins remain steady.

Generic Morgan Dollars in MS63 are getting a bit of a boost, with market-makers in need of serious quantities. Common date Peace Dollars in MS63 thru MS65 are somewhat feistier with across-the-board increases, and those of the latter grade with CAC approval are Bid \$50 more at \$155 sight-unseen. Only a single decline exists of the 686 Bids recorded within Proof Type with Three Cent Nickels in PCGS PR65 sustaining a 5% reduction. It appears that last week's Bid decline for those 1938-D Buffs in MS65 and MS66 got the attention of market participants enough so to enable these issues an appreciable recovery. There may be plenty of the last four D-Mint Mercury Dimes in MS65FB to go around for anyone wanting them, but this may be a case when sufficient supply may lead to a slight increase in appeal, if not outright demand. In addition to Gem, higher sight-unseen Bids are in place for commoners in NGC MS66FB-MS67FB. Late date Walkers in MS64 and MS65 are finally turning around to regain some lost ground and may be an indication or, at least, an instillation of hope that an overall recovery for this segment is in store.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market nationally reported sight unseen Bids, Asks, Trades, prior levels, and auction prices! The CCDn may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of a high Bid. Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary according to the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

CAC Leaps Another Milestone While Leading the Charge!

CAC was founded over four years ago by leading members of the numismatic community to set forth stringent standards for quality within a grade. Before CAC, prices for the solid quality coins were tethered to their lesser quality counterparts, thus holding down the market. Today, CAC is leading the charge to identify coins that fully merit the grade it was assigned. Now, advanced collectors and novices alike have an easy way to identify coins that are solid for the grade - look for the CAC sticker.

CAC continues to leap impressive milestones at breakneck speed, while giving you confidence in the value of a coin.

CAC[®]

"Because Confidence is Priceless"

Sight-Unseen Market Softens

\$25 Million Hammered In Schaumburg

Schaumburg, IL was host to the CSNS last week, where Heritage realized \$25 million at auction. This sale's top lot fetched \$1.15 million—a 1792 Silver Center Cent graded MS61BN by PCGS. Several additional highlights are listed below. Some dealers have left Illinois while others are staying in the area for the Chicago International Coin Fair, April 26-29. Over the same time period, the Georgia Numismatic Association show, held annually, will take place in Dalton. This week's activity within Classic Commems can only be described as brutal with 147 minus signs recorded. Not one grade column on either the PCGS or NGC page was spared from having to indicate any declines. However, while the activity has been preponderantly negative, the successive reductions are undoubtedly raising awareness, thereby rendering this segment as hardly one from which market-makers should jump ship.

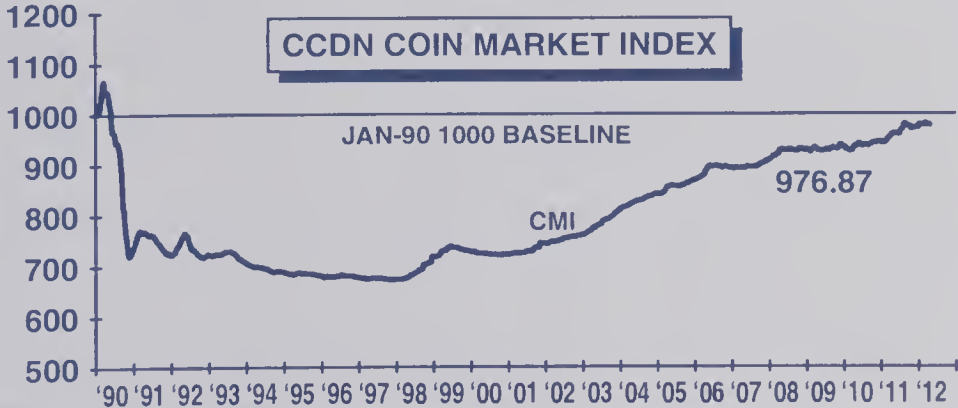

Morgan Dollars drifted lower as generic issues in MS61 and MS65 encountered fairly widespread sell-off trading, while several of their peers in MS63 strived ahead to make gains for the second straight week. Aside from NGC 1882-S Dollars in MS67 posting a \$60 drop, those curious looking 1887/6-O Morgans in MS64, unfortunately, suffered a 13% pull-back, while far more common but equally appealing 1899-O issues in PCGS MS67 softened up by 17%. Generic Peace Dollars remain solid in all grades while weakening demand pulled down a number of better-dates in MS61 thru MS65. Two Cent Pieces in MS64BN and in MS65RB are in slightly greater demand, and early to mid-20th century condition rarity Type material, especially with very low pops, fared extremely well during the Chicago auction. However, much of this week's Type segment was unable to evade the downward corrective pressures as it had been in past weeks. Among the other issues incurring Bid reductions, be they in PCGS or NGC slabs, are Shield Nickels with Rays in MS65, Liberty Seated Half Dimes with Arrows in MS61 and MS62, Legend Liberty Seated Dimes in MS61, MS63, and MS64, as well as Type 11 Full Head Standing Liberty Quarters in MS63FH. Braided Hair Large Cents in NGC MS66RB also took a hit, now lower by 12%. A pair of Trade Dollars sold at the Heritage Schaumburg auction which included an extra bonus for the winning Bidders. An NGC

graded 1876-S in MS63 and an 1877-S in MS64 sold for \$1,380 and \$2,165 respectively and possess a built in buyback at a profit as the auction company will buy any NGC graded Trade Dollar in MS63 and MS64 for \$1,550 and \$2,300 sight-unseen through the CoinPlex trading platform. A presumably lucky Bidder who won a 1903-S \$10 Liberty graded MS66 by NGC for \$4,960 last week in Illinois can also use the trading network for profit by selling this Gold Eagle back to the Texas firm for \$5,750 sight-unseen. All of this information can be found in the Market columns published herein and the fourth week of each month. Proof Type experienced some moderate declines, including Three Cent Nickels in PR66, with Cents Liberty Nickels in PR62, and Barber Dimes in PR63-PR64.

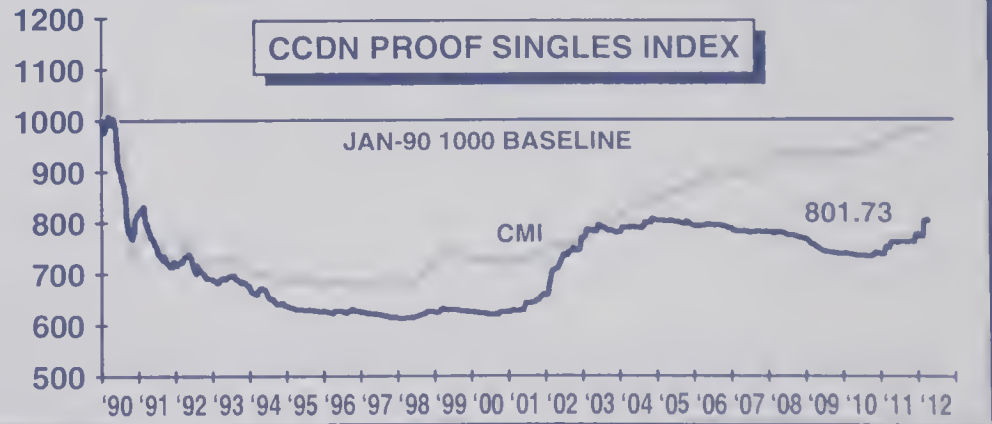

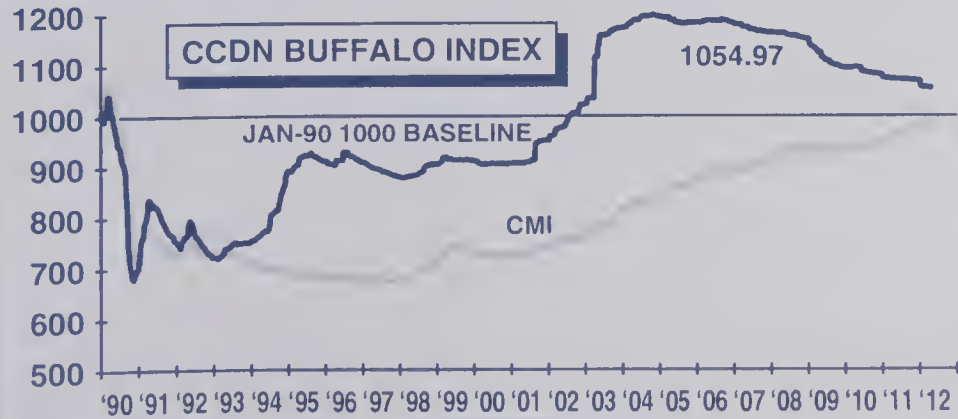

Despite their recognition as being among the classic rarities, 1916-D Mercury Dimes in PCGS MS65FB slipped moderately by \$500, but that set-back proved far less significant than the proliferation of declines posted throughout the Merc segment as a whole. 1939-S issues in MS66FB and MS67FB were among the hardest hit by the consequences of disappointing auction results, as those of the former grade in PCGS holders lost 18%. Walkers in decline include 1918-D issues in PCGS MS64, which is down \$260, and a variety of late-date issues in MS67 are again in retreat, particularly 1946 issues graded by NGC, which fell \$205 and have cumulatively lost over 40% since a year ago. Losers outnumbered the gainers again in the Gold Type segment, as \$5 Indians in MS63 have yet to break out of a declining phase that is now in its eighth consecutive week, resulting in a 26% decline since January. Proof Gold Type, often seen as a haven for stability in the coin markets, also had its share of disappointment as \$5 Libs in NGC PR66 incurred a 5% reduction, while those \$20 T 111 Libs in PR67, as flashy as they are, with a combined pop of only 26 across all dates, also dropped.

eBay is holding a "Morgan Mania" auction ending April 29. Over 300 PCGS and NGC issues are being sold, and 108 are verified by CAC. A few examples include an 1893-S in PCGS MS60; a 1903-S, PCGS MS66; an 1881-O PCGS MS65 DMPL; and an 1879-O graded MS66 by NGC. GreatCollections is also holding an online auction ending April 29 comprised of several Gold rarities, a few of which include an 1883 Gold Dollar in NGC MS68; 1860 \$3 Gold graded PCGS PR65, CAC; an 1860-D Liberty Half Eagle, Medium D, PCGS MS61; and a 1927-S \$20 Saint-Gaudens graded NGC MS64.

NGCNumismatic Guaranty Corporation of AmericaSarasota, FL (800) 642-2646

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity by nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDn may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Ask. Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are subject to the needs of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading network. *sell price* - *ask price* and other sources of *wholesale* transactions. Auction prices realized or retail trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guarantee that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy:** During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We do not stagnate Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "w" - Lowest asking price during the week prior to publication (week old); "m" - Lowest asking price during the previous three weeks (month old); "t" - Trade during the most recent month; "lm" - Lowest asking price appearing last month; "lt" Trade appearing last month; "ot" Trade older than 2 months; " " a blank, for all Market prices older than two months; "a" for auction transactions; "oa" - auction older than 1 month

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis

Greatest Gold Mine of Coin Data - Yours **FREE!**

CAC's POP Report puts all the data you need at your fingertips

CAC-stickered coins give you confidence. That's because we verify previously graded coins and award our green sticker only to those that are at minimum "solid" within their grade. Data for each of the stickered-coins is maintained in an elaborate online database, where you can easily verify any CAC coin.

Now, all of the data is compiled in CAC's Population Report – an absolute "must have" if you are active in today's rare coin market.

Novices and advanced collectors alike can now access up-to-date, comprehensive data on all CAC-stickered coins, free of charge, by visiting our website at www.caccoin.com.

It's easy to identify coins that are solid for the grade - just look for the CAC verification sticker. And now there's an easy way to access a gold mine of CAC coin data, the FREE CAC POP report.

Can You Afford to be out of the Loop?

Information is Power. Join the Future of Electronic Coin Trading.

Introducing CoinPlex - a revolutionary coin trading network exclusively for dealers. Now you can take full advantage of real-time bid and ask values on all coins graded with PCGS+ and NGC+ designations with or without a CAC sticker. In addition, CoinPlex offers an unrestricted bidding platform for generics like Morgans, Saints and Libs.

The CoinPlex network puts a wealth of real-time information at your fingertips. As a member, you can browse the results from all of the major auction firms, review CAC population data, bid on and list coins, and instant message other members. What's more, for a limited time Charter Membership is available at the guaranteed low price of \$100 per month.* You can opt out at any time without penalty.

With all of the benefits membership in the CoinPlex network offers, can you afford to be out of the loop? Join today as we build the best market possible - together.

* Price guaranteed for three years. Cancel at any time without penalty.

Commems Weakening Shows Abound In May

Dealers are split between the EAC show and sale being held in Buffalo, New York through May 6 and the May 3-5 pre-ANA show and sale held at the Denver National Western Expo Hall. Enthusiasts will then head downtown to the convention center for the ANA's National Money spring show May 9-12. A bit of a break is taking place between major auctions with the last being the sale at the Schaumburg CSNS show in April. Ira and Larry Goldberg will hold a pre-Long Beach auction May 27-30, with collections from Bellissima, Cahn, Holmes, Shapiro, and Forsythe. Long Beach will hold its next Expo May 31-June 2 with an auction by Heritage. Dealers will have an opportunity at the National Money show to get a new ANA badge free of charge as the old badges are being phased out. Another option is to email a high resolution photo by July 9. Otherwise, a replacement fee of \$75 will be charged at the World's Fair of Money in Pittsburgh.

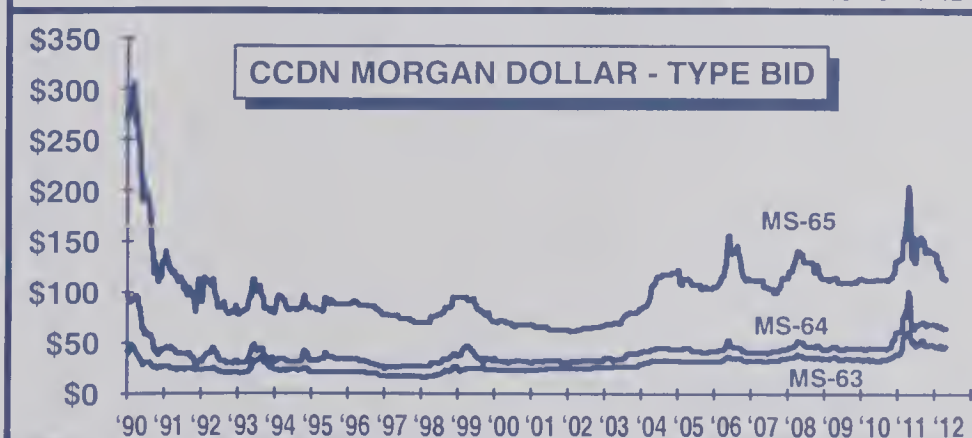

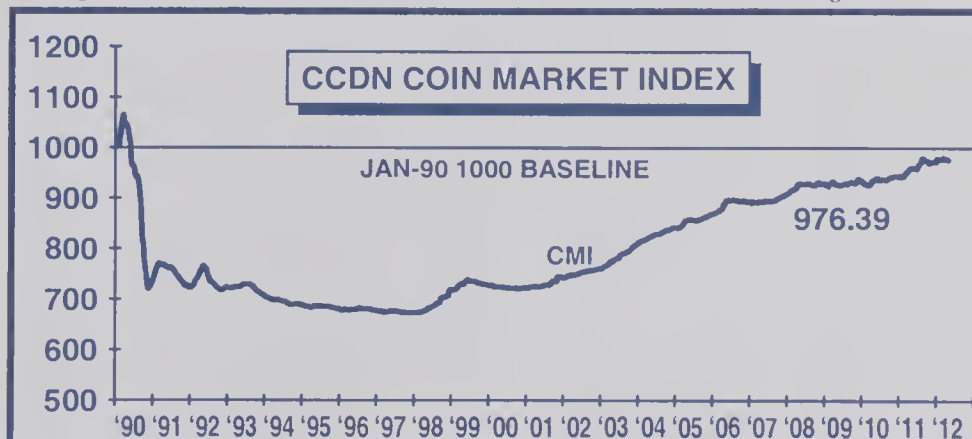

Declines continue to plague Silver Commems, and while NGC graded issues appear more vulnerable than their PCGS peers, Bids for several examples housed in both slabs remain very soft. Oregon and Texas Type in NGC MS61 thru MS64 columns are under considerable strain, and the latter Type in PCGS MS65 and NGC MS66 were also pulled down again for the second straight week, as were 1916 McKinley \$1 Gold issues in NGC MS65, which are now down by \$125 since early February. Bid changes abound in the MS65 column for Morgan Dollars, as most of the increases denote a hike of a mere \$1 for generics in this grade. 1902 cartwheels in NGC MS63 are faltering further, as they did last week, and their comparably graded PCGS peers are also in a downward drift, pulling those much higher pop MS65 specimens down as well by \$15. A few generic Peace Dollars in MS66, barring those from 1924, are encountering unfavorable trade activity, and have settled lower by \$20 to \$30.

Copper and Silver Type issues in all denominations are holding up well across-the-board. However, a good deal of Nickel material, both of the Three and Five Cent denominations in a variety of Mint State and Proof grades, has been teetering a bit these past weeks and is now confronted with the realities of increasing weakness at

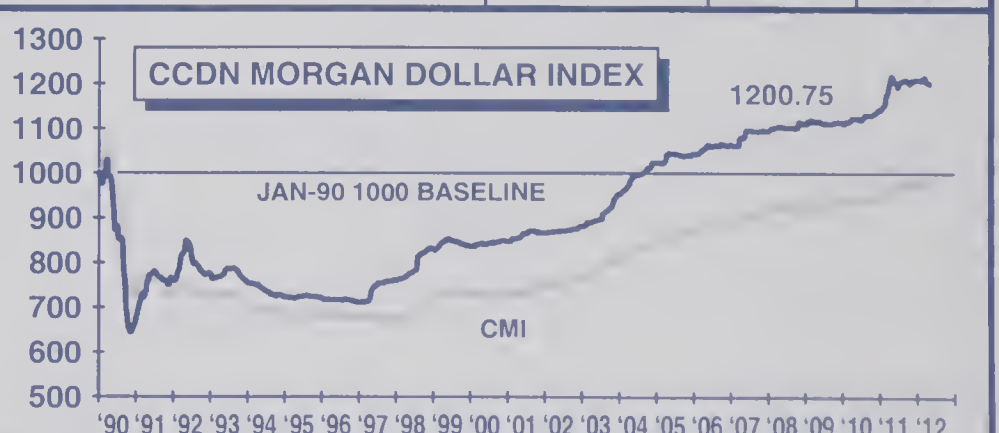

auction. Shield Nickels without Rays in PCGS MS63 and NGC MS64 are currently in disfavor as Liberty Nickels with Cents in PR64 and in Gem-Proof grades, appearing quite often at auction and on the bourse floor, have been especially prone to the recent bouts of incremental Bid reductions. Unlike much of the other Nickels, the Buffalo series completely staved off the ill effects of a softening market that has been quite destabilizing for certain material within other segments. Nice, original looking Buffs in Gem are still in strong demand at current Bid and are faring very well with online auction participants.

Results concerning the Mercury Dime segment are somewhat two-tiered this week, as several early-dates are getting thoroughly shaken down by the persistent weakness via retail public auction while late-date commoners with Fully Split Bands are on another mild upswing in continuation of their somewhat see-saw movement that began a few weeks ago. Among the most dramatic decliners were 1920 and 1929-S issues in PCGS MS66FB, as the latter posted a loss of 34%. Early and key-date Walkers are demonstrating good staying power and remain popular with collectors. While a few late-date issues in MS62 are weakening, several of the most common dates in MS64 got a good upward boost of between \$3 and \$7, but a couple issues in MS66, particularly the 1945-D and 1946-S, each rolled back to Bid at \$150.

A moderate drop in Gold Spot was all it took to lower Bids again for much of the generic Gold Type. Scarce Type II \$1 Indian Princesses in NGC MS66, among the least sensitive to Gold Spot fluctuations, nonetheless drifted moderately downward by \$500. \$5 Indians in MS63 seem to have finally found a level of current Bid support at just above \$1,200 but are now descending, albeit marginally, in MS64. GreatCollections held an auction that ended April 29. Two of the highlights were an 1860-D \$5 Medium D graded PCGS MS61 which hammered for \$13,750 and a 1927-S \$20 Saint-Gaudens in NGC MS64 which sold for \$49,500. The online auction company has reported selling over \$1 million in coins over the last month, making the third month in a row at this level.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

NGC Bulk Submissions Have Never Been Easier

Scott Heller,
Director of Operations
Throughout his 19 years at NGC, Scott has managed and overseen thousands of bulk and prescreen orders. His in-depth knowledge of the numismatic community and the certification process is invaluable to the growth of your business.

Get personal consultations from industry expert Scott Heller.

For years, NGC has led the industry with consistent and accurate grading, excellent customer service and fast turnaround times — for an unbeatable value. We also offer a direct liaison for professional dealers interested in bulk submission. Scott Heller is uniquely qualified to personally assist you with bulk submissions, and will even travel to your location for on-site consultations.

**To discuss your options, contact Scott directly at
sheller@NGCcoin.com or 1-800-NGC-COIN (642-2646).
To learn more, visit www.NGCcoin.com/bulk**

UPDATE!

CAC Stickers Do Not Add Value!

Then why do CAC stickered coins bring a premium?

While it is true that CAC-verified coins bring a premium in the market, the "little green" sticker is not what adds the value. Truth is, with or without a CAC sticker, a quality coin will always bring a premium.

CAC has evaluated over ^{350,000}~~250,000~~ coins with a market value over ~~\$1.3~~ billion. Only those coins which meet stringent standards for quality within a grade are awarded a sticker. That is why CAC stickered coins bring a premium - they are placed on only quality coins.

What's more, CAC is a powerful market maker for its stickered coins.

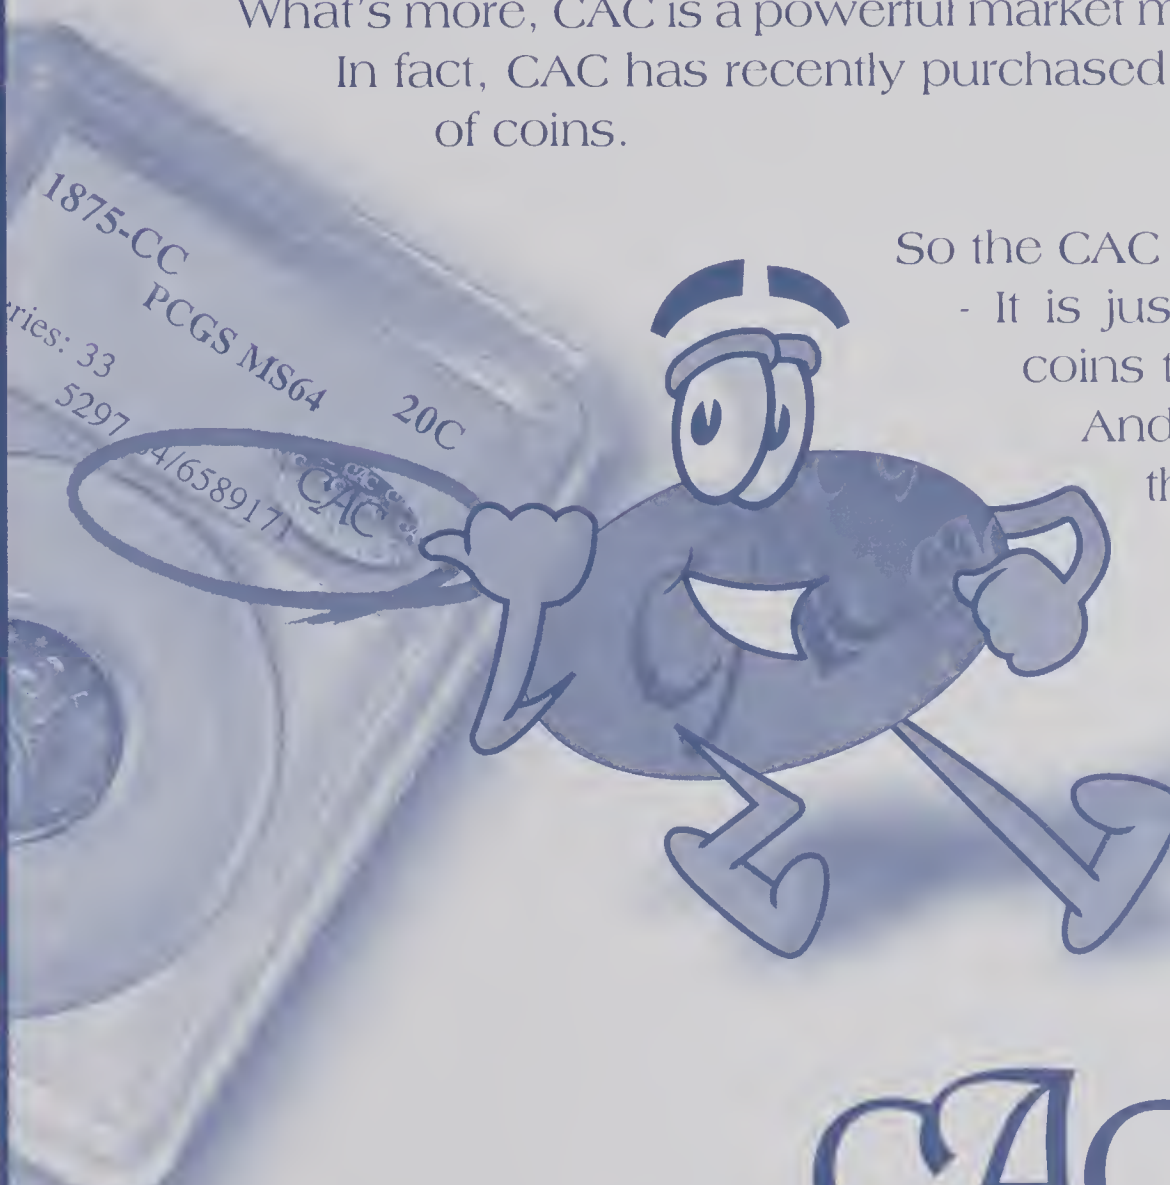

In fact, CAC has recently purchased over ~~\$200,000,000~~ worth of coins.

[^]
\$250,000,000

So the CAC sticker does not add value
- It is just an easy way to identify
coins that are solid for the grade.

And it gives you confidence in
the value of a coin.

*The CAC sticker
doesn't add value,
it just helps
to identify
a quality coin.*

Every Numismatic Library needs a complete set of the
COIN DEALER newsletter family of publications

the Backsheet

Now that we have your attention, we really haven't started an additional newsletter — but your library should include **Back Issues** of our publications. Back issues are available two ways:

You can purchase small quantities to fill in missing issues, to obtain articles necessary for your research, or to follow your special interests. You may also combine your order for back issues of any of our publications to obtain the lowest price:

1-10 issues - \$3.00 each • 11-25 issues - \$2.50 each • 26 & over - \$2.00 each

Or, you can purchase *complete sets* of back issues for really dramatic savings:

Complete set of the weekly **Coin Dealer newsletter (Greysheet)**
from June 14, 1963 to December 23, 2011, now includes 2,475 issues.
At \$2.00 each this would normally cost \$4,950, but a complete set
is only \$3,175.

Complete set of the monthly **CDN Monthly Supplement**
(formerly the Monthly Summary)
from August 1976 to December 2011, now includes 425 issues. At \$2.00
each this would normally cost \$850, but a complete set is only \$585.

Complete set of the **CDN Quarterlies**
from January 1992, to December 2011, now includes 240 issues, a
complete set is only \$315.

Combined weekly **CDN (Greysheet), Monthly Supplement & Quarterlies**
now includes 3,140 issues, and extra savings at only \$3,900.

Complete set of the weekly **Certified Coin Dealer newsletter (Bluesheet)**
from August 22, 1986 to December 23, 2011, now includes 1,253 issues.
At \$2.00 each this would normally cost \$2,506, but a complete set
is only \$1,600.

Complete set of the monthly **Currency Dealer newsletter (Greensheet)**
from September 1980 to December 2011, now includes 376 issues.
At \$2.00 each this would normally cost \$752, but a complete set
is only \$525.

4,768
Newsletters

For the most complete numismatic pricing library possible, you may order a
COMPLETE set of all of the Back Issues listed above for only **\$5,495.**

CERTIFIED COIN DEALER

newsletter

CCDN — a weekly report on the Sight-Unseen certified market published by the Coin Dealer Newsletter (est. 1963)

Vol. XXVII No. 19

May 11, 2012

Single copy price \$5.00

Type Takes Off

Pre-Long Beach Preview

Dealers are in Denver participating in the ANA National Money Show. At the same time, the electronic trading networks are very active, which is unusual during a big show since dealers often reduce their Bids or remove them altogether to avoid liability by overextending. This allows one to be financially prepared for any possible big purchase at the show. Unfortunately, precious metals have declined substantially heading into the show. Gold Spot, at \$1,595, has dropped to a level not seen since late December. Silver, currently resting at \$29.14, hasn't been in the \$29 per ounce range since the beginning of January. Platinum is down to \$1,494 per ounce which hasn't taken place since mid January.

Conditions prevailing during sight-unseen trading for Silver Commems can be best described as relatively tame. Although the declines haven't yet completely subsided, they are far fewer in number and less severe than those ravaging this segment each of these past eight weeks. Nevertheless, there are declines for Columbia Halves in MS66. Successive reductions for this same issue in NGC MS61 thru MS64 were accompanied by a \$10 drop in Bid for Bay Bridge issues in NGC MS65. Losses within the Gold segment were limited to a \$50 pull-back for 1904 Lewis & Clark Gold Dollars in PCGS MS65. First year of issue Morgan Dollars in MS63DMPL/DPL and MS64DMPL/DPL of all varieties and mintmarks are in greater demand at slightly higher Bids, as are 7TF Dollars in NGC MS63PL and MS64PL. However, a few generics from subsequent years in MS65PL, especially those attractive early S-Mint issues, appear to be in over-supply and are considerably lower now, including scarcer, comparably graded NGC 1885-S Dollars. Those often less attractive and volatile 1921-D Morgans in MS65, which are still quite popular as Type specimens, fell into disfavor with a 10% decline. Generic Peace Dollars in MS64 and MS65 are being discounted with respective reductions of \$4 and \$10.

Noticeable strength prevails within both the Mint State and Proof Type segments, and if the coin market was ever in need of a good shot in the arm, the Type segments sure gave it one this week. Bidders are competing for such issues as Draped Bust Half Dimes in MS62, NGC graded Capped Bust Halves in MS61 and MS62, as well as PCGS slabs in MS62 thru MS64. While early Copper-Nickel Indian Cents in PR65 fell slightly shy of expectations, Shield Nickels without Rays in PCGS PR65 and PR66 are robustly bouncing

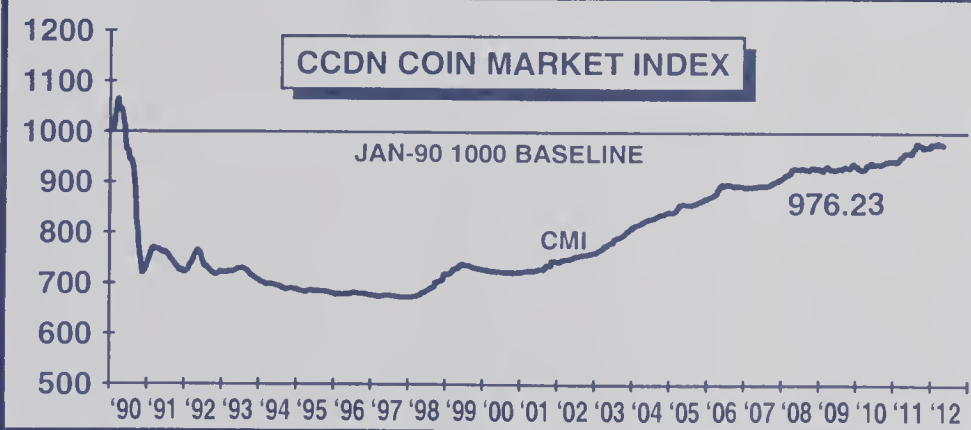

back, and many Silver Proof Type issues are also gaining muscle. Twenty Cent Pieces in PR61 thru PR64, Liberty Seated Halves, as well as their Dollar denominated peers in several grades, and some stunning Proof Trade Dollars have all risen nicely. Bidders are in hot pursuit of Proof Barber Halves, especially those in PCGS PR61 thru PR67 paying as much as \$700 more for those pristine examples of the latter grade.

After hanging onto their Bid of \$50 for nearly 18 months, first year of issue 1913 Type I Buffalo Nickels in PCGS MS64 couldn't maintain this level during retail auctions and are now reduced by 8%. All other Buffs, though are trading with firm support at current Bid. Compared to last week, it was a rather benign trading session for the early and key-date Mercury Dimes, but a few late-date Denver Mintmarked examples in MS65FB and MS66FB are getting stung by the effects of weak wholesale trade and auction performance. NGC 1940-D issues in the latter grade are among the hardest hit translating into a decline of 19%. Late-date Walkers in MS64 are in a second straight week of an upswing, pulling up their MS65 peers with them, but several issues in MS66 are still in descent, losing as much as 14% this week. On the bright side, final year of issue 1947 and 1947 D examples in PCGS MS67 each gained impressively, as the latter issues were Bid up by \$500. A surge in demand is taking place for various denominations within Proof Gold Type segment in PR61 thru PR64. Most generic Gold Type examples in Gem generally fared better during trading this week than their peers in Choice and lower grades, although common date \$20 Saints in MS65 have been faltering.

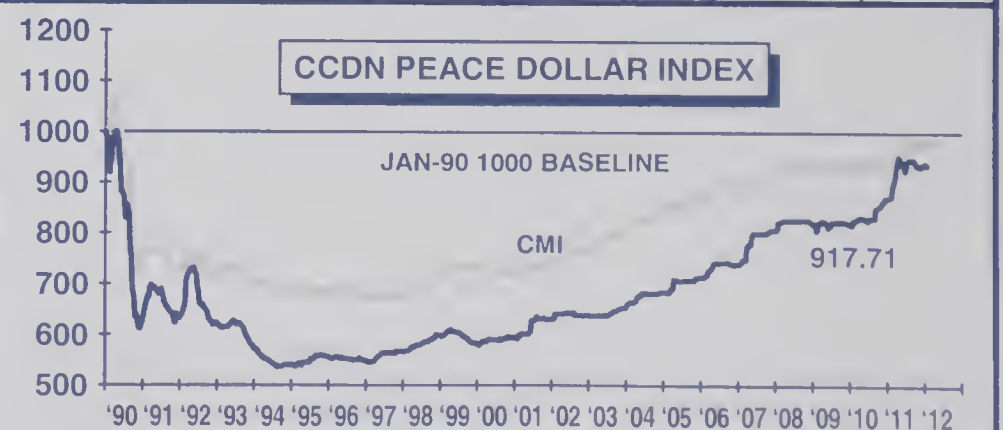

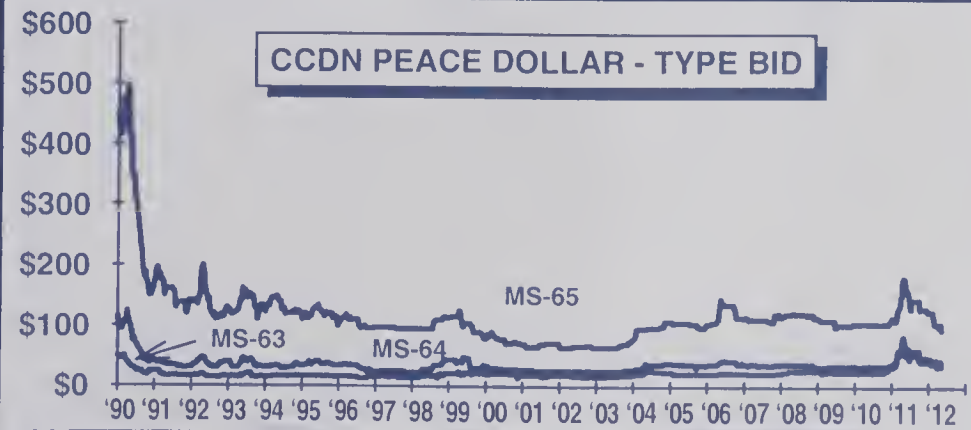

Ira and Larry Goldberg will hold a pre-Long Beach auction in Los Angeles, May 27-30, with collections from Bellissima, Cahn, Holmes, Shapiro, and Forsythe. Bonhams will have an auction as well May 27 in Los Angeles. See a few of the many highlights from each sale above. Long Beach will hold their next Expo May 31-June 2 with an auction by Heritage. Dealer set-up will begin at noon Wednesday, two hours earlier than in the past.

NGCNumismatic Guaranty Corporation of AmericaSarasota, FL (800) 642 2646

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services determined through careful study of market activity including the nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Ask. Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the property of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

CAC Leaps Another Milestone While Leading the Charge!

CAC was founded over four years ago by leading members of the numismatic community to set forth stringent standards for quality within a grade. Before CAC, prices for the solid quality coins were tethered to their lesser quality counterparts, thus holding down the market. Today, CAC is leading the charge to identify coins that fully merit the grade it was assigned. Now, advanced collectors and novices alike have an easy way to identify coins that are solid for the grade - look for the CAC sticker.

CAC continues to leap impressive milestones at breakneck speed, while giving you confidence in the value of a coin.

CAC[®]

"Because Confidence is Priceless"

www.caccoin.com

May 11, 2012

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Prooflike. Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

Can You Afford to be out of the Loop?

Information is Power. Join the Future of Electronic Coin Trading.

Introducing CoinPlex - a revolutionary coin trading network exclusively for dealers. Now you can take full advantage of real-time bid and ask values on all coins graded with PCGS+ and NGC+ designations with or without a CAC sticker. In addition, CoinPlex offers an unrestricted bidding platform for generics like Morgans, Saints and Libs.

The CoinPlex network puts a wealth of real-time information at your fingertips. As a member, you can browse the results from all of the major auction firms, review CAC population data, bid on and list coins, and instant message other members. What's more, for a limited time Charter Membership is available at the guaranteed low price of \$100 per month.* You can opt out at any time without penalty.

With all of the benefits membership in the CoinPlex network offers, can you afford to be out of the loop? Join today as we build the best market possible - together.

* Price guaranteed for three years. Cancel at any time without penalty.

DEPENDABILITY.

depend·a·bil·i·ty

noun - capable of being depended on; worthy of trust; reliable

Depend on Spectrum to:

- Give you the highest possible prices for your coins and currency. Nobody pays more than Spectrum!
- Provide immediate payment. Spectrum will pay you on the spot, wire your bank, or Fed Ex you a check.
- Purchase all types of coins and currency. No deal is too large or too small!
- Provide unmatched expertise. Spectrum's numismatic professionals are the most knowledgeable and experienced in the industry with over 300 years of combined experience. We have expertise in all areas of the rare coin and currency markets.

You will receive unparalleled customer service and you can bank on Spectrum to pay you absolute top dollar. Contact one of our reps Toll-Free at 888.828.2646, or send us an email or fax. Don't wait! Call today!

CCDN — a weekly report on the Sight-Unseen certified market published by the Coin Dealer Newsletter (est. 1963)

Vol. XXVII No. 20

May 18, 2012

Single copy price \$5.00

CAC & + Slabs Solid Long Beach On Deck

Dealers are now preparing for the Long Beach Expo and surrounding auctions beginning May 25. Dealer set-up will begin at noon May 30, two hours earlier than in the past. Exhibitors will be treated to beer and tapas during set-up, in addition to free wi-fi throughout the show. Admission is now free to all PCGS club members and Set Registry participants. In addition, visitors can utilize Collectors Corner's new CoinSearch feature using a free mobile app to locate the exact booth locations of the dealers selling the coins they are looking for. CCE members can identify which coins they will have for sale at the show through their Collectors Corner listings. Whitman launched a similar internet tool called Whitman Compass for their shows last year. Heritage will hold the official auction of the show, and we have included several of the many highlights herein. One of only two known 1907 Rolled Edge Eagles with Satin Proof surfaces will be on display at the Expo. This coin was previously misattributed as Mint State, and is now valued at \$3 million.

Silver Commems keep slip-sliding away and are falling further into a trough that appears to have no bottom. Arkansas, Connecticut, Rhode Island, Texas Type, and their 1934 dated peers, have all been further discounted across a successive range of grade categories, as well as those popular Wisconsin Halves in better grades. It is not all bad news, however, as Bridgeports in MS64 and Maine issues in MS65 are mildly resilient, and a handful of NGC+ graded issues, especially in MS66+, are making moderate gains. A lower Silver Spot is likely the culprit negatively impacting Mint State cartwheels, especially the generics in the lowest grades. Several NGC graded Morgan and Peace Dollars in MS65 had a particularly challenging week in maintaining their sight-unseen Bids at parity with their comparably graded PCGS counterparts, and the differentiating effect spilled over to lower Bids among a few common dates in the NGC MS66 column. However, buyers called for more of those scarce 1879-O Dollars in MS63DMPL, with a combined pop of only 63, to avail

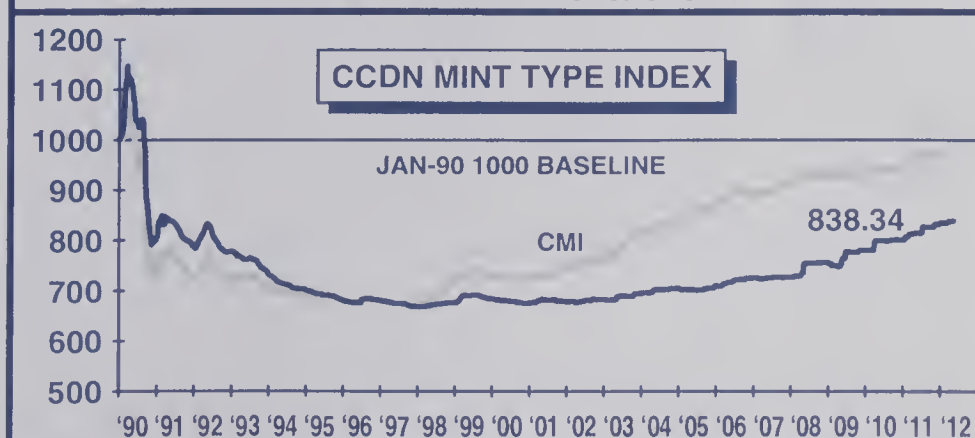

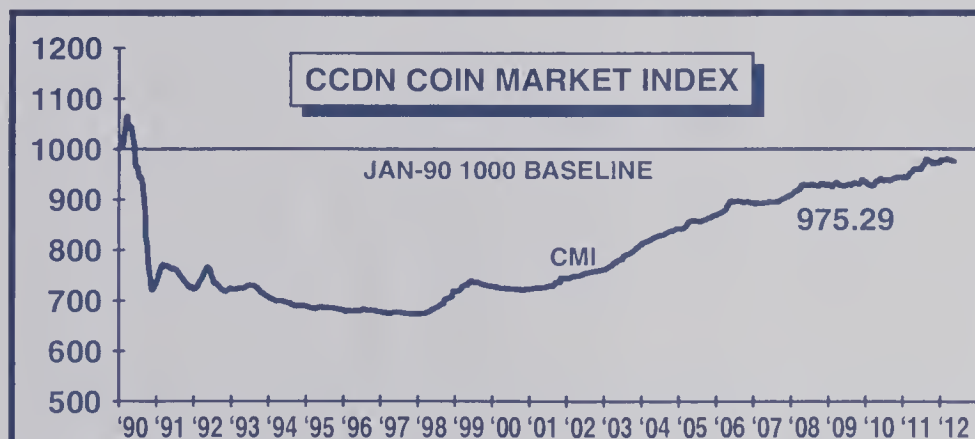

themselves at Bids 20% to 25% higher. Greater quantities of common-date Morgans in MS64DMPL are also being lured into the market as their Bids have been pushed up, in some cases, by as much as \$25. An 1886-O in MS64 with CAC approval now Bids at a 60% premium over a comparably graded non-CAC example, and those final issue year 1935 Peace Dollars in NGC MS66 have been Bid up to an even \$1,000.

Much of the material comprising both the Mint State and Proof Type segments is sitting tight with firm support at current Bid, recently elevated after last week's impressively upbeat activity. Moderate slippage for Barber Dimes in NGC MS66 and Liberty Seated Dimes with Legend in PCGS PR64, however, would have resulted as the only Bid alterations within these issues' respective segments, were it not for a 10% decline for Barber Quarters in NGC MS62. Two early Buffalo Nickels in NGC MS65, 1918-S and 1919-D, got a bit scarred by market weakness, as the latter issue posted its second moderate decline for the year. Although the Mercury Dime segment appears to be somewhat uneventful, if not in the doldrums, recent on-line auction performance of some early Mercs with Full Bands has been far from shabby. This past weekend, a 1920 and a 1931-D, both graded MS65FB by PCGS, sold for a respective \$546 and \$437 through Teletrade. Late-date Walkers in MS66, while still popular, are in another week of decline and have now dropped by over 30% since their run-up late last summer.

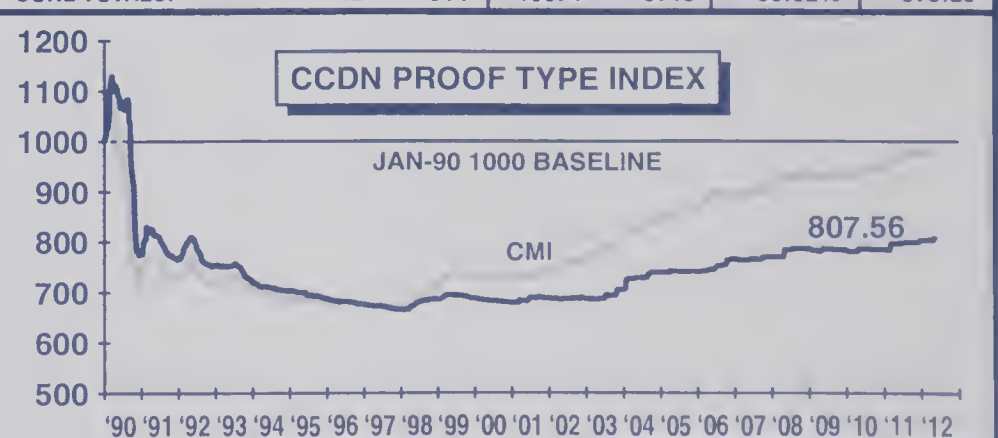

Gold Type remains predominantly unchanged, even though Bids for generic Double Eagles and certain fractional issues are continuing to decline as Gold Spot has now descended below its beginning of the year level. Scarcer Gold Type material remains strong and sought-after. In addition to the 1907 \$20 High Relief Saint graded NGC MS67★, there are some other very rare Double Eagles featured among Heritage's Long Beach auction, including an 1882 \$20 Liberty graded PCGS AU53, which has a total original mintage of only 571, as well as an elusive 1931-D \$20 Saint, graded PCGS MS65.

NGC has just announced that they have graded their 25th million coin, being the first third-party service to do so. PCGS is not far behind with 24,304,104 coins encapsulated to date. Incidentally, CAC has approved and stickered over 350,000 of these slabs.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity, including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

www.ccdnpublications.com

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

Enclosed is my check/M.O., for the amount checked below. Please start sending me the Certified Coin Dealer newsletter for

6 Months \$83.00 1 Year \$148.00 2 Years \$246.00

Name _____

Address _____

City _____ State _____ Zip _____

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Greatest Gold Mine of Coin Data - Yours **FREE!**

CAC's POP Report puts all the data you need at your fingertips

CAC-stickered coins give you confidence. That's because we verify previously graded coins and award our green sticker only to those that are at minimum "solid" within their grade. Data for each of the stickered-coins is maintained in an elaborate online database, where you can easily verify any CAC coin.

Now, all of the data is compiled in CAC's Population Report - an absolute "must have" if you are active in today's rare coin market.

Novices and advanced collectors alike can now access up-to-date, comprehensive data on all CAC-stickered coins, free of charge, by visiting our website at www.caccoin.com.

It's easy to identify coins that are solid for the grade - just look for the CAC verification sticker. And now there's an easy way to access a gold mine of CAC coin data, the FREE CAC POP report.

WALKING LIBERTY HALVES

CCDN does not represent that it is possible to purchase selected coins at these prices. Current sight-seen trades can be expected to occur at substantially higher levels in many cases.

NGC Bulk Submissions Have Never Been Easier

Scott Heller,
Director of Operations
Throughout his 19 years at NGC, Scott has managed and overseen thousands of bulk and prescreen orders. His in-depth knowledge of the numismatic community and the certification process is invaluable to the growth of your business.

Get personal consultations from industry expert Scott Heller.

For years, NGC has led the industry with consistent and accurate grading, excellent customer service and fast turnaround times — for an unbeatable value. We also offer a direct liaison for professional dealers interested in bulk submission. Scott Heller is uniquely qualified to personally assist you with bulk submissions, and will even travel to your location for on-site consultations.

**To discuss your options, contact Scott directly at
sheller@NGCcoin.com or 1-800-NGC-COIN (642-2646).**

Opportunity Knocks With Auctions Four Grading Services Meet Ebay Standards

Many dealers will be spending their Memorial Day weekend participating in auctions and preparing for the Long Beach show. Bonhams will hold a sale May 27 and the Goldbergs Pre-Long Beach auction is scheduled for May 27-28. Both auctions are in Los Angeles. The Expo and auction by Heritage follow May 31-June 2 in Long Beach. A collectibles booth displaying an example of a Proof \$10 Indian Rolled Edge, one of only two known; ultra rare 1875 Philadelphia \$10, \$5 and \$2½ Gold; the "Inverted Jenny" 1918 airmail stamp in finest known condition, and an extremely rare 1880 \$1,000 Legal Tender Note is a new feature at the expo.

Antietam Halves in MS64 and MS65, Maryland examples in MS65, Bay Bridge and York issues in MS66 are among those Silver Commems to sag again along with several of the most common issues. Iowas in MS61 thru MS65 are grappling with the fallout from an oversupply condition. In addition to their relatively high mintage, of the 14,588 certified by PCGS and NGC combined, well over 11,000 are graded MS65 and higher. At least one market-maker continues to work on extremely tight margins as seen for NGC graded Hawaiians as Gems are offered for \$4,075 with a sight-unseen buy-back of \$4,000. Similar spreads are in place for lower grades and can be seen in this week's market columns. Grant No Star \$1 Gold issues in MS63 dropped \$25 while their peers in PCGS MS65 fell by \$50, as did comparably graded and slabbed 1903 McKinley Gold Dollars. While generic Morgan Dollars in MS61, MS62, and NGC MS65 recouped their losses from last week, sight-unseen trading for cartwheels had little bearing on better-date issues. Lower demand for 1885 Morgans in PCGS MS66 resulted in their Bid reduction of 12%, and while generic Peace Dollars in MS65 bounced back up, they haven't moved enough to reclaim their Bids at the three-digit level they held at the beginning of the month. Heritage's Long Beach auction is replete with lots consisting of both generic and better-date cartwheels in a variety of grades, including several with PL and DMPL designations. Peace Dollar enthusiasts also have much to contemplate from an offering of several key dates, many in Gem grades with CAC stickers on their slabs.

Type coins would have remained completely unscathed had it not been for Barber Dimes in MS61 and MS62 and Barber Quarters in MS64 getting singed by the weaker reception shown during on-line auction activities, as Bid for the latter in NGC fell 9%. To a lesser extent, Type II Standing Liberty Quarters in MS63 lost appeal as well, but the current Bid support persists for every Type denomination in Proof. An important offering of mostly Mint State Liberty Head Large Cents from the famous Northwest Collection, comprised of at least one specimen of each date of issue, including many

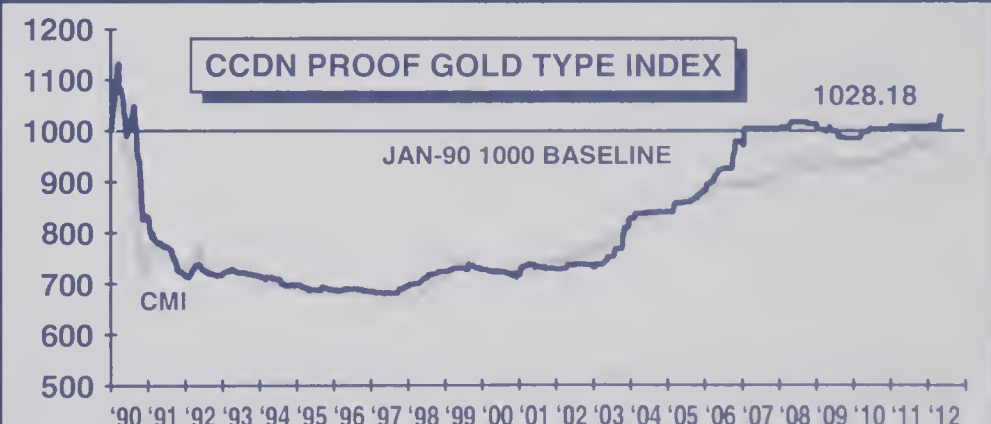

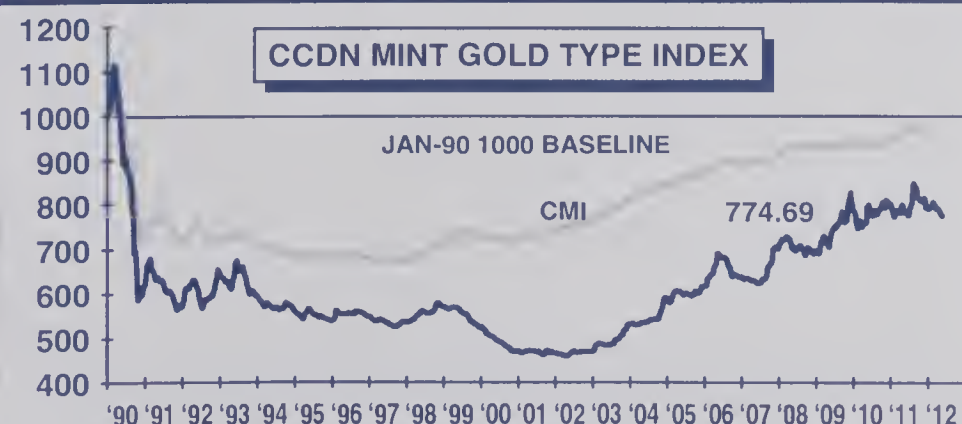

different die varieties, will go before the Goldberg's auction block among other highly prized material at the end of this month before the big event in Long Beach. PCGS has graded their first Brown Lincoln Cent in MS67, a 1956-D. NGC has graded 18 Brown MS67 Lincoln Cents. Neither has graded an MS68 or higher in either Brown or Red and Brown. This is after some 50 million coins have been slabbed by both services combined after over 25 years of grading.

Those often pretty and popular 1938-D Buffalo Nickels in MS67 got a few dollars worth more adrenaline this week, as Bidders are now seeking these out or any other date at \$110. Nearly two dozen examples changed hands sight-unseen this week through the electronic trading networks. Two 1937-D 3-Legged Buffs, both graded MS65 by PCGS, one CAC approved, are so far neck and neck at identical offers in highly competitive on-line Bidding through Heritage's Long Beach auction. 1937-S Mercury Dimes in PCGS MS65FB were pushed down a bit by weak auction activity, but this decline may be well overshadowed by the multiple, albeit moderate, advances posted for later-date Mercs with Full Band designations. A long awaited turnaround for common Walkers in MS65 and MS66 appears in place after weeks of persistent discounting took its toll on them, especially those of the latter grade. It is uncertain as to whether or not this is just a short-lived, partial recovery of the several months of cumulative losses or the beginning of a new surge that could reign in more positive action for this segment. 1945-S issues in NGC MS67 completely erased all their gains accumulated since mid-July of last year. Gold Spot appeared to be rebounding back to the \$1,600 per ounce level this week but, instead, reverted back towards \$1,550, thereby further dampening Bids for much generic Gold Type material. As a consequence, all Mint State \$20 Saints other than in MS67 continue to recede, but some plus signs did re-emerge after none were to be seen to denote any gains these past two weeks.

Four third-party grading services (PCGS, NGC, ANACS and ICG) have met eBay's recently revised standards and can continue to be listed with a numeric grade in their item description and title. Requirements of online certification verification, and population look-up have now been met by ANACS and ICG. Beginning May 31, those coins not encapsulated by one of these services will be considered raw. In addition, beginning June 30, if a coin is listed with a starting price of \$2,500 or more, it must be in one of the four grading services' slabs. This rule does not apply to bullion, collections, mixed lots or coin sets.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades prior levels, and auction prices). The CCDN may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers. The responsibility of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

www.ccdnpublications.com

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks and last, any source, and other sources of *wholesale* transactions. Auction prices realized or retail trading information are used to adjust prices for infrequently traded issues. The Publisher exercises due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no *guarantee* or *warranty* that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase or that it may be available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin may display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy:** During the thirty days prior to publication, we track the lowest *wholesale* retail price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We do not guarantee Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "w" - Lowest asking price during the week prior to publication (week old); "m" - Lowest asking price during the previous three weeks (month old); "1" - Trade during the most recent month; "1m" - Lowest asking price appearing last month; "1t" Trade appearing last month; "ot" Trade older than 2 months; " " a blank, for all Market prices older than two months; "a" for auction transactions; "oa" - auction older than 1 month

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

PCGS DMPL and NGC DPL. Bids are for fully Deep Mirror Prooflike coins. Bids for PCGS PL and NGC PL dollars will be listed monthly in a supplemental insert. CDN (Greysheet) Bids have always represented fully, deep mirror prooflike specimens.

PEACE DOLLARS

CCDn does not represent that it is possible to purchase selected coins at these Bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

MORGAN DOLLARS

PCGS DMPL and NGC DPL Bids are for fully Deep Mirror Prooflike coins. Bids for PCGS FL and NGC FL coins will be listed monthly in a supplemental insert CDN (GreySheet). Bids have always represented Deep Mirror Prooflike specimens.

Can You Afford to be out of the Loop?

Information is Power. Join the Future of Electronic Coin Trading.

Introducing CoinPlex - a revolutionary coin trading network exclusively for dealers. Now you can take full advantage of real-time bid and ask values on all coins graded with PCGS+ and NGC+ designations with or without a CAC sticker. In addition, CoinPlex offers an unrestricted bidding platform for generics like Morgans, Saints and Libs.

The CoinPlex network puts a wealth of real-time information at your fingertips. As a member, you can browse the results from all of the major auction firms, review CAC population data, bid on and list coins, and instant message other members. What's more, for a limited time Charter Membership is available at the guaranteed low price of \$100 per month.* You can opt out at any time without penalty.

With all of the benefits membership in the CoinPlex network offers, can you afford to be out of the loop? Join today as we build the best market possible - together.

* Price guaranteed for three years. Cancel at any time without penalty.

www.CoinPlex.com

Every Numismatic Library needs a complete set of the
COIN DEALER newsletter family of publications

the Backsheet

Now that we have your attention, we really haven't started an additional newsletter — but your library should include **Back Issues** of our publications. Back issues are available two ways:

You can purchase small quantities to fill in missing issues, to obtain articles necessary for your research, or to follow your special interests. You may also combine your order for back issues of any of our publications to obtain the lowest price:

1-10 issues - \$3.00 each • 11-25 issues - \$2.50 each • 26 & over - \$2.00 each

Or, you can purchase **complete sets** of back issues for really dramatic savings:

Complete set of the weekly **Coin Dealer newsletter (Greysheet)**
from June 14, 1963 to December 23, 2011, now includes 2,475 issues.
At \$2.00 each this would normally cost \$4,950, but a complete set
is only \$3,175.

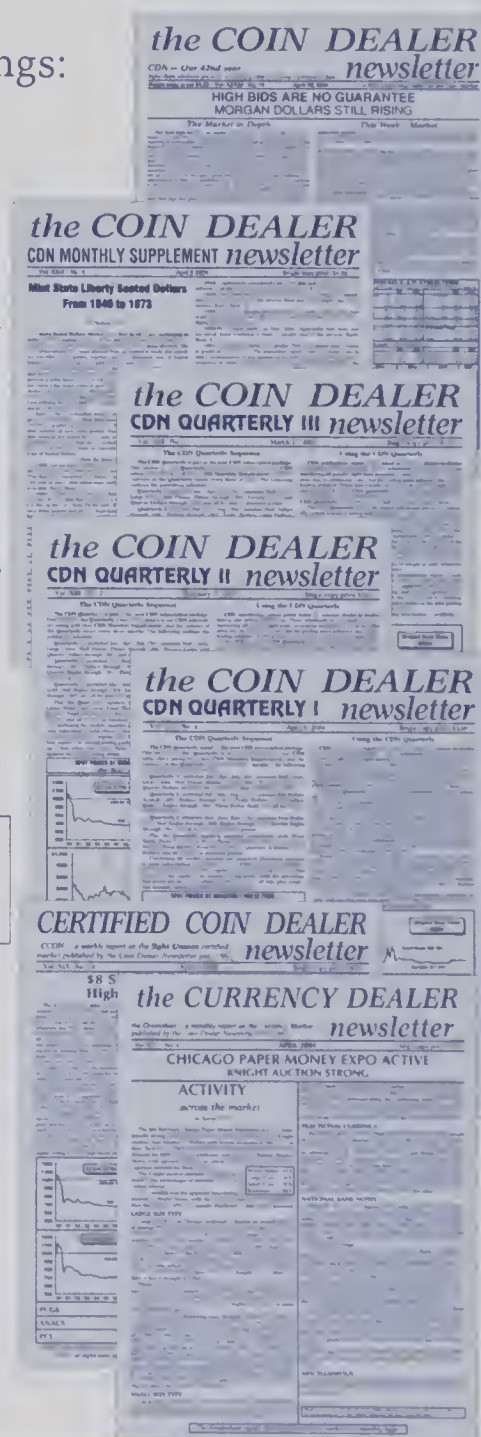

Complete set of the monthly **CDN Monthly Supplement**
(formerly the Monthly Summary)
from August 1976 to December 2011, now includes 425 issues. At \$2.00
each this would normally cost \$850, but a complete set is only \$585.

Complete set of the **CDN Quarterlies**
from January 1992, to December 2011, now includes 240 issues, a
complete set is only \$315.

Combined weekly **CDN (Greysheet), Monthly Supplement & Quarterlies**
now includes 3,140 issues, and extra savings at only \$3,900.

Complete set of the weekly **Certified Coin Dealer newsletter (Bluesheet)**
from August 22, 1986 to December 23, 2011, now includes 1,253 issues.
At \$2.00 each this would normally cost \$2,506, but a complete set
is only \$1,600.

Complete set of the monthly **Currency Dealer newsletter (Greensheet)**
from September 1980 to December 2011, now includes 376 issues.
At \$2.00 each this would normally cost \$752, but a complete set
is only \$525.

4,768
Newsletters

For the most complete numismatic pricing library possible, you may order a
COMPLETE set of all of the Back Issues listed above for only **\$5,495.**

the Coin Dealer Newsletter • PO Box 7939 • Torrance, CA 90504
310-515-7369 • FAX 310-515-7534 • E-Mail cdn@greysheet.com

Prices are for the most common dates. Better date coins usually bring more than the Bids of the most common issues listed herein. Bids listed for issues that trade infrequently are the last known.

UPDATE!

CAC Stickers Do Not Add Value!

Then why do CAC stickered coins bring a premium?

While it is true that CAC-verified coins bring a premium in the market, the "little green" sticker is not what adds the value. Truth is, with or without a CAC sticker, a quality coin will always bring a premium.

CAC has evaluated over ~~250,000~~^{350,000} coins with a market value over ~~\$1.3 billion~~^{\$1.7 billion}. Only those coins which meet stringent standards for quality within a grade are awarded a sticker. That is why CAC stickered coins bring a premium - they are placed on only quality coins.

What's more, CAC is a powerful market maker for its stickered coins.

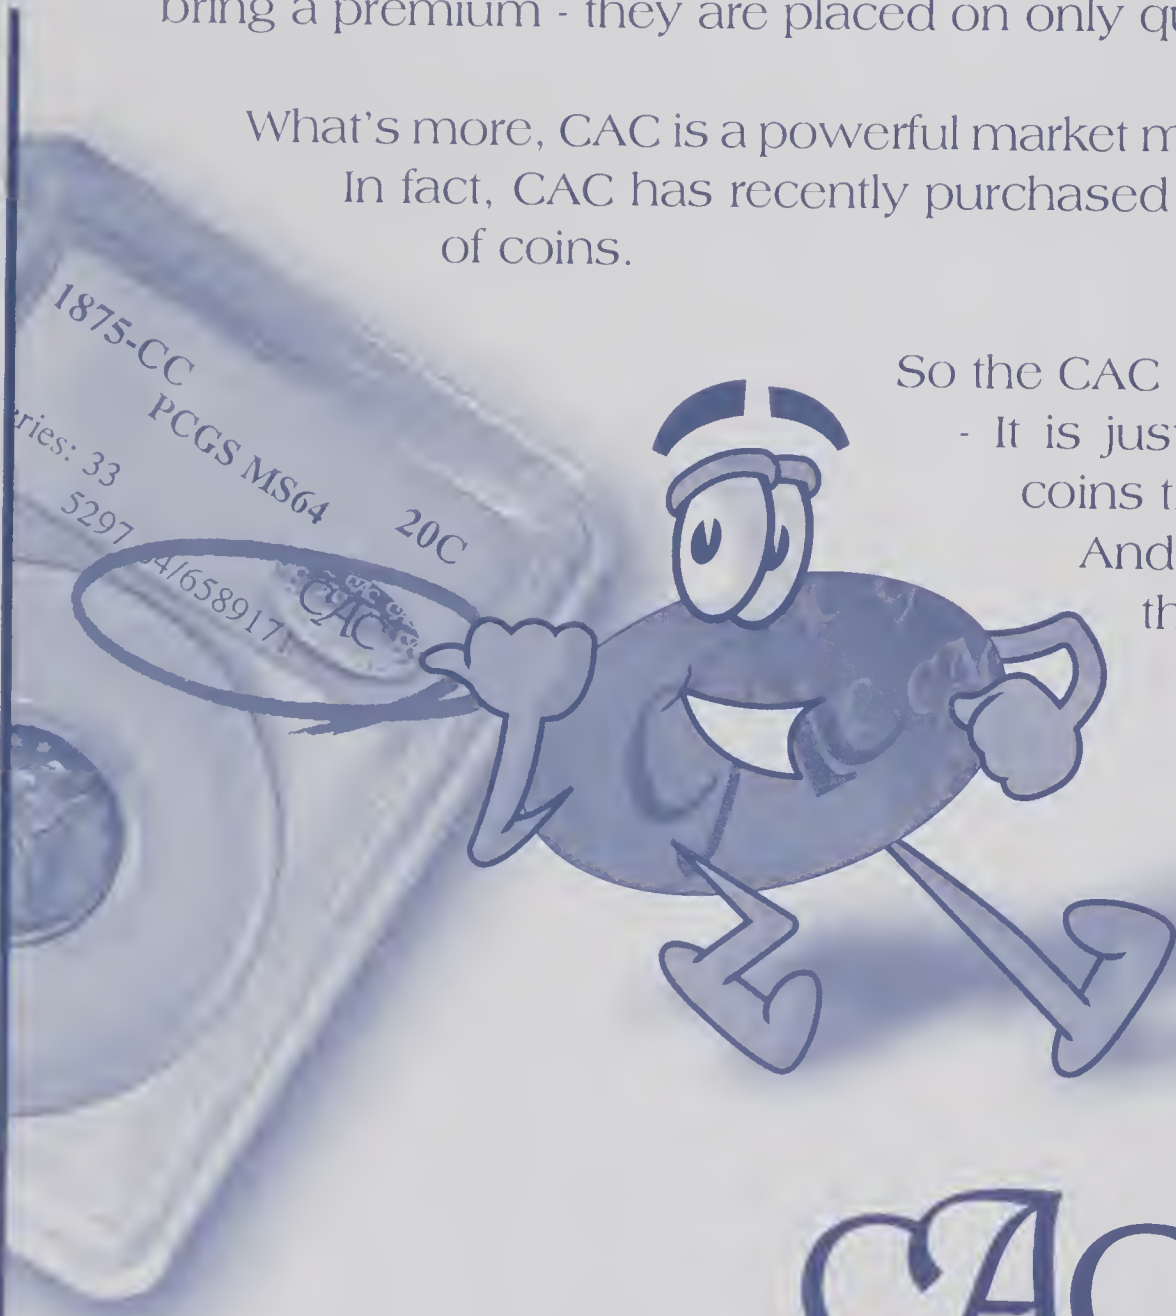

In fact, CAC has recently purchased over ~~\$200,000,000~~^{\$250,000,000} worth of coins.

So the CAC sticker does not add value

- It is just an easy way to identify coins that are solid for the grade.

And it gives you confidence in the value of a coin.

The CAC sticker doesn't add value, it just helps to identify a quality coin.

CAC[®]

Long Beach Underway Goldbergs Bring In Over \$8 Million

Set-up day at the Long Beach Expo was bustling with dealers buying, selling, and trading amongst each other. In addition to moving set-up time to Noon, allowing two more hours of dealer-to-dealer trading, there are a number of other enhancements at this show. One example includes Collectors Corner launching their new service, CoinSearch, which allows users to locate coins on the bourse using smartphones and tablets. Some 15 member dealers on the Certified Coin Exchange participated on opening day, with over 4,600 coins currently listed. In the future, this technology will be used at other venues as well and will also include paper money, stamps, sports cards and other collectibles.

Some Silver Commems that are generally perceived as less abundant were tossed into the bargain bin this week. Antietam Halves in PCGS MS64 and MS65 are in decline for a second straight week, while MS65 Wisconsin are also dipping again, further compounding their losses from two weeks ago, and dragging their MS61 thru MS63 peers down along with them. York issues in a variety of Mint State grades aren't holding up too well either. It should be noted, however, that exceptional quality Silver Commems are still faring well at major retail auction venues. Two beautifully toned CAC approved examples graded by PCGS, a 1936-S Columbia in MS68 and a 1952 Washington-Carver in MS67, are so far Bidding well into the five-digits at Heritage's auction, due to conclude this weekend. Gold Commems remain stable at current levels. Active trading within Morgan Dollars allowed for a considerable tightening of the spreads between Bids within the PCGS and NGC Mint State columns MS61 thru MS63 and, in many instances, the difference between a cartwheel grading MS61 and one in MS63 is just \$7. This gap has narrowed by at least \$4 in the past month. Spreads between comparably graded generic Peace Dollars remain even tighter, but those relating to both Morgan and Peace Dollars in Gem are far more disparate and less affected by recent trading activities. Generic Dollars of both varieties in Choice and Gem with either rainbow or other attractive toning

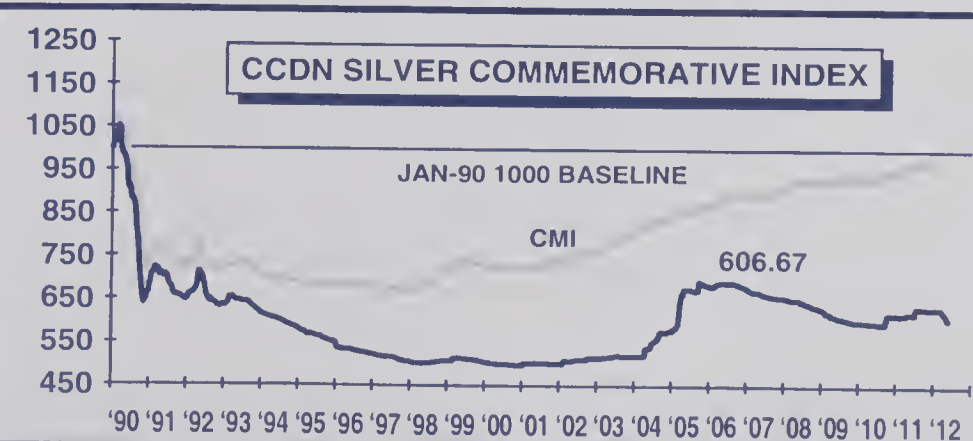

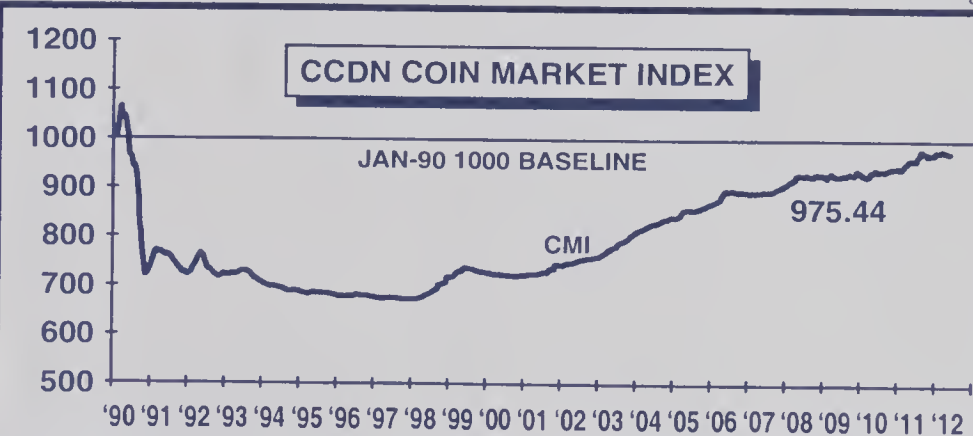

continue to be eagerly sought-after, and bring enormous premiums at times. Several dealers are looking for each and every date of GSA CC Dollars in original government holders with box and certificate and are paying current Bid. Many will pay a small premium for white or whitish coins. Weakening demand for Barber Dimes in MS61 and MS62 reflected by last week's declines has spread to include those graded MS63 by PCGS, and Barber Quarters in PCGS MS65 were pulled down by nearly 9% while Liberty Seated Quarters with Motto in NGC MS61 were hit with a \$20 reduction.

Sufficient supplies may be preventing Type 1 1913 Buffalo Nickels in NGC MS65 from regaining that \$100 Bid level, last seen at the end of March, as these issues slipped a tad again this week. Two S-Mint issues incurred fairly moderate pull-backs, mainly 1930-S issues, as those in NGC slabs declined by 8% and are all Bidding \$110 now. 1937-S Buffs in PCGS MS66 dropped by \$2. While Mercury Dimes in PCGS slabs all remained in place this week, a couple of NGC examples, the 1939-D and the 1940-D, both in MS65FB, each declined a bit as a result of on-line auction weakness. Weak auction prices realized for 1936 Walkers in NGC MS65 caused these Halves to tumble by nearly 20%. It may come as somewhat of a relief to see those late-date Walkers in MS66 resume in their ascent from last week instead of descending to offset those gains. While the volatility with these issues may continue in the weeks or months ahead, there is hope that they have found their low-ground and have passed the grueling test for a gradual but solid recovery.

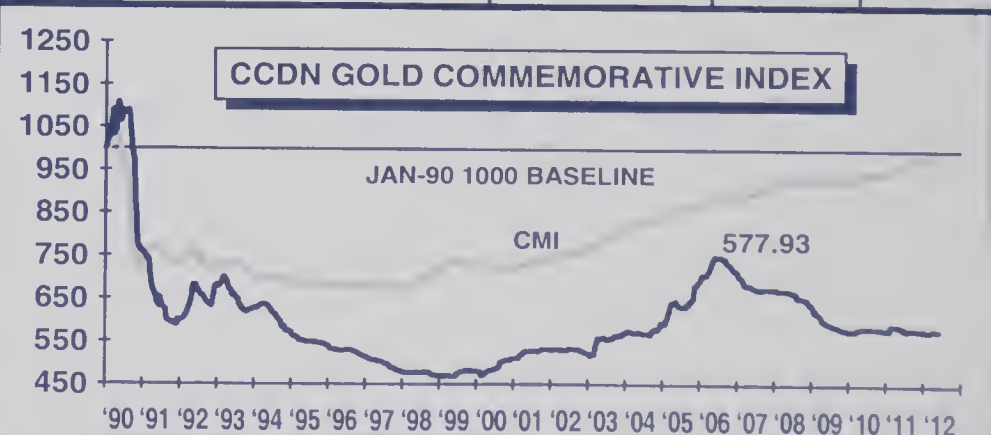

Gold Spot's dormancy this week hasn't helped in producing much positive turnaround for most generic Gold Type issues other than for a marginal amount of relief for \$20 Type 111 Libs in MS63 and \$20 Saints in MS65, while the latter issues' peers in MS66 sank back down by \$50 to a Bid of \$2,300.

Ira and Larry Goldberg held their Pre-Long Beach auction May 27-30 and hammered a total of over \$8.2 million. See a few of the many highlights herein. Their top lot was an 1895 Hawaiian FR-7 Reginald Huth \$20 Gold piece graded PCGS PR63 Cameo, CAC, which sold for \$230K. GreatCollections will hold auctions in June featuring four Mormon Gold pieces, a Silver Libertas Americana medal, and a collection of toned Morgan Dollars. One of the Mormon Gold pieces, an 1860 \$5 "Lion" is valued at over \$50,000. Of the 26 Morgans, 25 have been CAC approved.

CAC Leaps Another Milestone While Leading the Charge!

CAC was founded over four years ago by leading members of the numismatic community to set forth stringent standards for quality within a grade. Before CAC, prices for the solid quality coins were tethered to their lesser quality counterparts, thus holding down the market. Today, CAC is leading the charge to identify coins that fully merit the grade it was assigned. Now, advanced collectors and novices alike have an easy way to identify coins that are solid for the grade - look for the CAC sticker.

CAC continues to leap impressive milestones at breakneck speed, while giving you confidence in the value of a coin.

Single copy price \$5.00

Five-Figure Sight-Unseen Bids Target \$20 Saints Classic Commems Continue Collapse

Gold and Silver dropped after a short-lived rise above \$1,630 and \$29.48, respectively. After Bernanke's June 7 address, the yellow metal fell to \$1,587 while Silver dropped to \$28.52 an ounce. In spite of such volatility, the rare coin market is strong, with nearly \$22 million in total auction sales surrounding and including the Long Beach Expo—which had a record breaking public turnout. The sight-unseen market remains strong, though a bit weaker than last year. Over \$8 million in sight-unseen trades were recorded through CCE during the first five months of last year, while we are now just over \$6.7 million for the first five months of this year. After an already busy week, many dealers and collectors are currently in Memphis attending the International Paper Money show and Lyn Knight auction June 8-10.

Silver Commems, mostly in MS65 and MS66, are being traded on a voluminous basis with dealers working on ever tightening margins, resulting in another week of significantly reduced Bids for a multiplicity of issues. Isabella Quarters in PCGS MS66 dropped by \$250, and every Spanish Trail Half in an NGC slab in every Mint State grade other than MS65 trickled lower as well. While the discounting remains dominant, there are some moderate gainers but their numbers are far too few to really neutralize the net effect of the losses occurring within this segment. Several Gold Commems also headed further south, and the decliners include Lewis & Clark Dollars and \$2½ Sesquicentennials in MS66.

Volume discounting persists within generic Morgan Dollars in MS65, and lower auction prices realized are negatively impacting individual sight-unseen Bids for several of these issues in NGC MS66, resulting in declines from \$20 to \$40 in many cases. A few late date O-Mint Dollars in MS61 thru MS63 are being Bid up in reaction to the somewhat short supply of such issues in these grades, and several PL Dollars have been getting firmer since last month's report. Generic Peace Dollars in MS63 and MS64 are firmer as well, with Bids for the most common issues in NGC MS65 catching up with those of their PCGS peers of the same grade. However, 1923-S and 1928 issues in PCGS MS65 wobbled a bit during recent auction outings.

Neither Mint State nor Proof Type could completely avert the effects of a weakening market but, considering the broad diversity of material comprising this segment, it fared relatively well this week with good overall support at current Bid. Among the most notewor-

thy reductions, however, were Shield Nickels in NGC MS66 and Twenty Cent Pieces in PCGS MS64, each about 14% lower now. Liberty Seated Dimes, No Drapery in NGC MS66 and Arrows variety Liberty Seated Quarters in PCGS PR67 fared not much better, each of which took a bit of a beating at the auction block, losing 11% and 12%, respectively. Still, Bidders are yearning for some more of those early No Motto Liberty Seated Halves in MS61, and are now offering an even \$1,200 for any of the 1853 Arrows & Rays variety in MS62. Buffalo Nickels remained relatively calm throughout the week with only minor pull-backs as 1937-D and S-Mint issues graded MS65 by PCGS, as well as comparably graded 1937-S Buffs in NGC slabs declined.

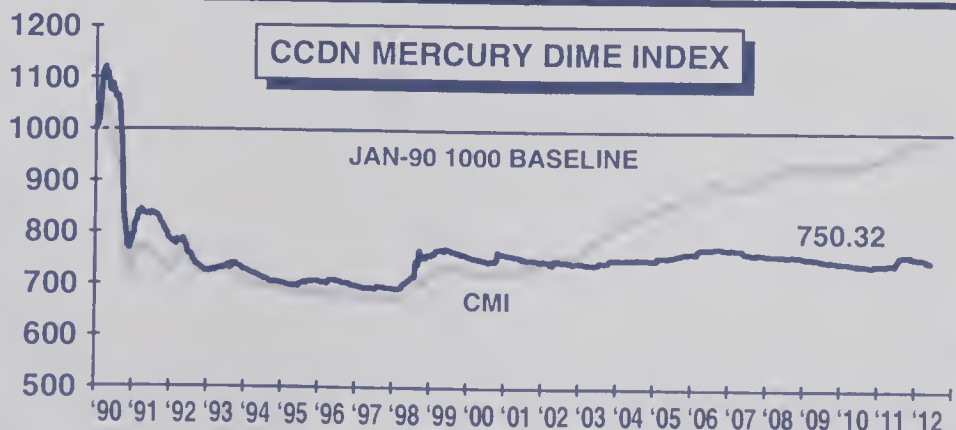

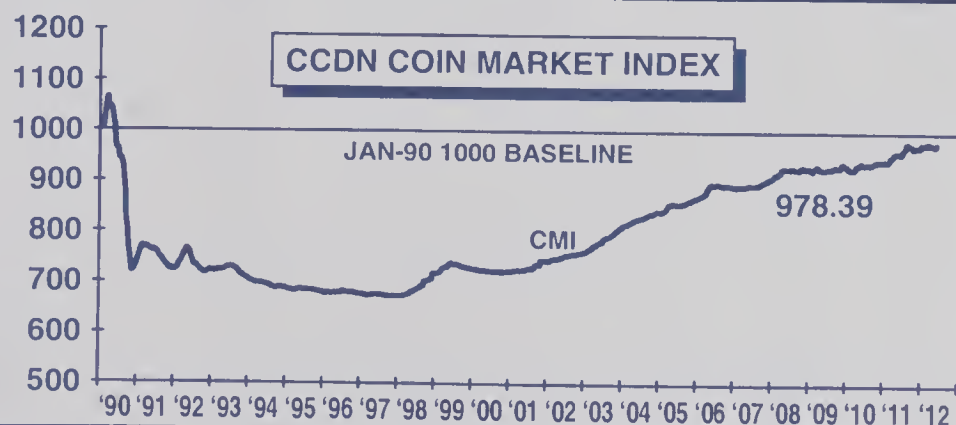

Key and better-date Mercury Dimes are faring relatively well in this tumultuous market,

but some issues that are not as challenging to find, even with Full Bands, are down considerably. 1926 Mercs in NGC MS66FB, for example, fell way short of expectations during auction sessions this week with a 28% drop, while comparably graded 1936-D Mercs took a painful hit along with their peers in MS65FB that constituted a decline of 28% on average. It wasn't a pretty week for Walker Halves either, and the minus signs strewn about the columns for this segment denoted some considerable declines, which included several Depression-era and pre-War dated issues in MS66-MS67. 1942 D issues in virtually all Mint State grades are really getting pounded, and those volatile 1946-S Halves in NGC MS67, which were Bidding as high as \$1,250 early this year, plunged by another 20% to Bid now at \$830. Interestingly, Teletrade auctioned off a pristine 1946-D Walker, graded MS67 by NGC with CAC approval, which sold this week for \$1,238.

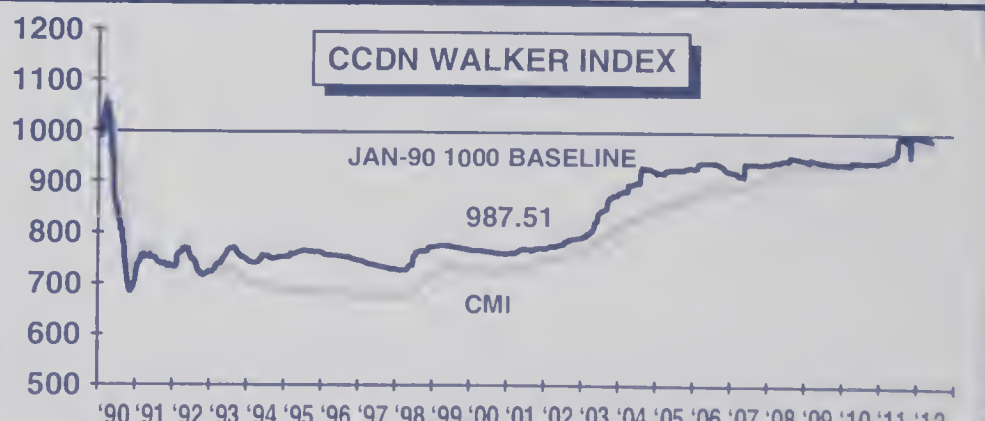

Bidders appear focused on more bullion related Gold Type, but that isn't to say that better-date and condition rarity Gold issues are being ignored. Although generic \$20 Saints continue to trade within a narrow but volatile range, issues such as the 1908-S in NGC MS66 and MS67 and comparably graded 1909-D issues, spiked dramatically this past month. New 5-figure sight-unseen Bids have been recorded for a half dozen better dates.

Heritage hammered over \$12.6 million in Long Beach, May 31 through June 3, with a top lot of \$184K for an 1879 \$4 Flowing Hair Stella, PCGS PR64. See some of the many other highlights herein.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services determined through careful study of market activity including the nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsolicited high Bid or by Asks of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

www.ccdnpublications.com

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

Enclosed is my check/M.O., for the amount checked below.
Please start sending me the Certified Coin Dealer newsletter for
6 Months \$83.00 1 Year \$148.00 2 Years \$246.00

Name _____
Address _____
City _____ State _____ Zip _____

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Collect with Confidence—For over 25 years, buyers and sellers have trusted NGC for its expert grading, unmatched security features and comprehensive guarantee. To learn more about the services that have made us the industry's **largest and most reliable third-party grading company**, visit NGCcoin.com

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Prooflikes. Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

Greatest Gold Mine of Coin Data - Yours **FREE!**

CAC's POP Report puts all the data you need at your fingertips

CAC-stickered coins give you confidence. That's because we verify previously graded coins and award our green sticker only to those that are at minimum "solid" within their grade. Data for each of the stickered-coins is maintained in an elaborate online database, where you can easily verify any CAC coin.

Now, all of the data is compiled in CAC's Population Report – an absolute "must have" if you are active in today's rare coin market.

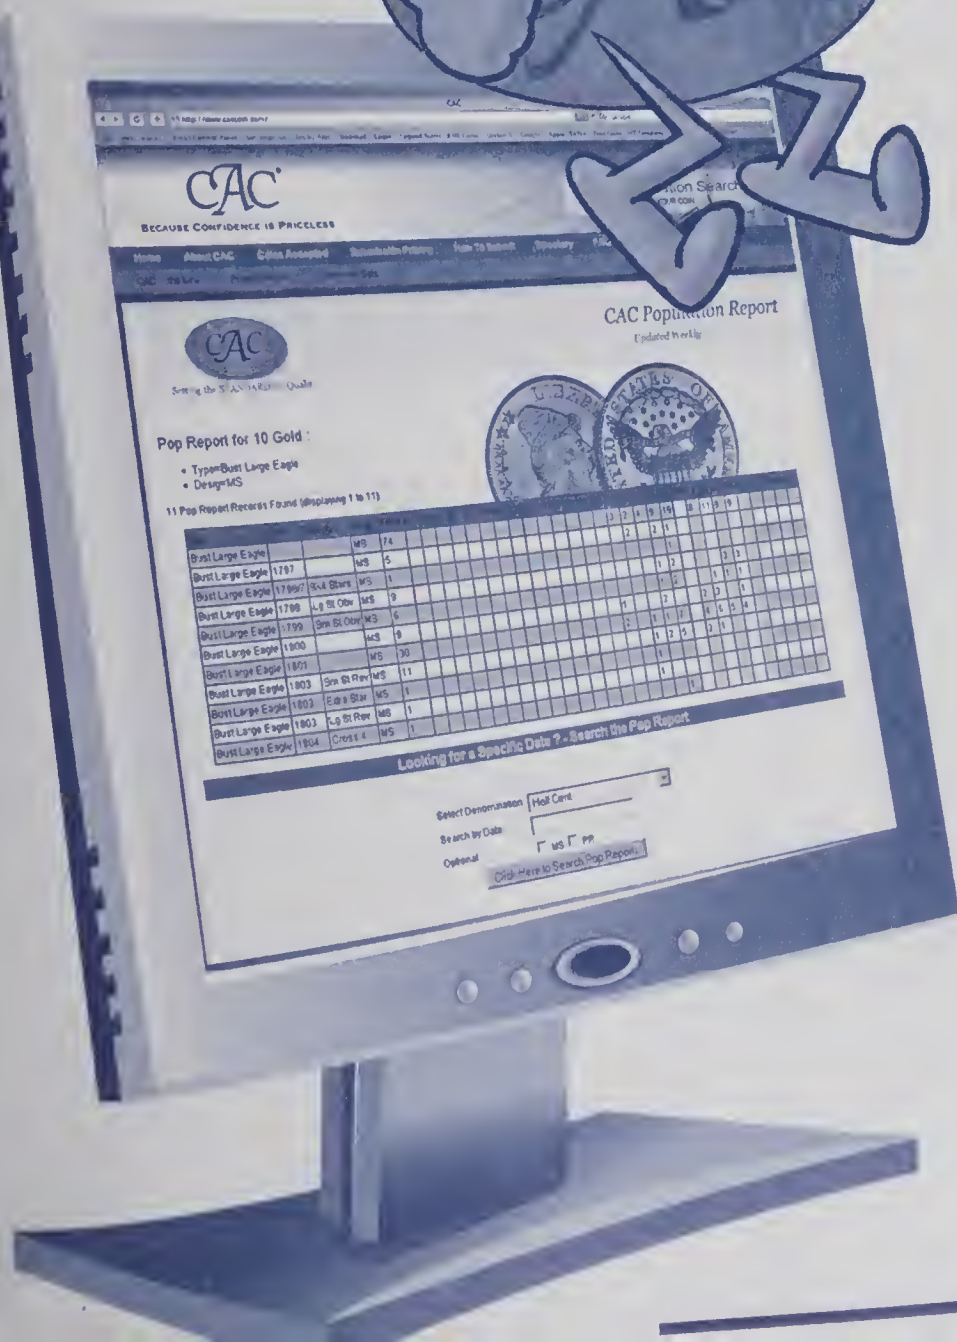

Novices and advanced collectors alike can now access up-to-date, comprehensive data on all CAC-stickered coins, free of charge, by visiting our website at www.caccoin.com.

It's easy to identify coins that are solid for the grade - just look for the CAC verification sticker. And now there's an easy way to access a gold mine of CAC coin data, the FREE CAC POP report.

Can You Afford to be out of the Loop?

Information is Power. Join the Future of Electronic Coin Trading.

Introducing CoinPlex - a revolutionary coin trading network exclusively for dealers. Now you can take full advantage of real-time bid and ask values on all coins graded with PCGS+ and NGC+ designations with or without a CAC sticker. In addition, CoinPlex offers an unrestricted bidding platform for generics like Morgans, Saints and Libs.

The CoinPlex network puts a wealth of real-time information at your fingertips. As a member, you can browse the results from all of the major auction firms, review CAC population data, bid on and list coins, and instant message other members. What's more, for a limited time Charter Membership is available at the guaranteed low price of \$100 per month.* You can opt out at any time without penalty.

With all of the benefits membership in the CoinPlex network offers, can you afford to be out of the loop? Join today as we build the best market possible - together.

* Price guaranteed for three years. Cancel at any time without penalty.

Buffalo Nickels See Higher Ground

Stack's Bowers Sale Nears

Trading through CCE and Coinplex has slowed with a total of just over \$230K in sight-unseen transactions compared to last week which was over \$570K. Dealers may be taking it down a notch or two in order to maintain liquidity and have plenty of capital for the upcoming auction and show in Baltimore. Precious metals have been on a slow, but steady rise, as Gold has crept up above \$1,620 during the week while Silver is flirting with \$29 an ounce.

The market is far less edgy for Silver Commems as of late. Sight-unseen Bids for some issues rebounded at least enough so to regain losses sustained over the past few weeks. California Halves in MS64, Iowas in PCGS MS66, Maine Halves in PCGS MS65, and Monroe issues in PCGS MS64 are among those that are in a recovery mode for a second straight week. 1936 and 1937 Texas PDS Sets in MS64 are moderately rising to an occasion of some long awaited positive motion in this segment. CAC Bidders came in with astoundingly heftier sight-unseen offers, by as much as 45% higher. Included in the run-up for Gem CACs are Missouri examples having a pop of 32 with 1 finer; Missouri 2x4, 33/6; Monroe, 53/10 and Sesquicentennial Halves, with a pop of 35 and just 4 higher. Discounting persisted among select Gold Commems, causing some mild pull-back action for Grant No Star Dollars in PCGS MS62 and MS63, as well as for their With Star versions in NGC MS66.

Although the upward momentum prevailing throughout much of the Morgan Dollar segment can be attributed in part to Silver Spot's relative stability this week, fundamental market forces underscored some of the positive movement. Market-makers seem unable to get enough of those various first-year issues in MS61 through MS63, and must up the ante for them to satisfy the increased demand. Gem common date Deep Mirror Prooflike cartwheels in NGC are back up, now Bidding sight-unseen at \$420, and 1921 Morgans in MS66 appear increasingly popular as those in NGC slabs can attest with a 26% rise from our last report. Stack's Bowers is offering an incredible 1892-S Dollar, graded MS67 by PCGS in the Baltimore auction. This coin has a combined pop of just ten with only one finer and is one of only five Morgan Dollars that Bid already in the five digits even in the lowest Mint State grades of MS60-MS61. Several Peace Dollars are eliciting moderately higher offers in a succession of multiple grades,

particularly PCGS 1921 and 1927-D issues. Increased demand for No Drapery 1839 Liberty Seated Half Dollars in NGC MS61-MS62 resulted in higher sight-unseen Bids, as those of the latter issue have advanced by more than 11% since November. These have an NGC pop of six in MS61 and two in MS62 with only ten finer. Solid support at current Bid was widespread throughout both Mint State and Proof Type segments.

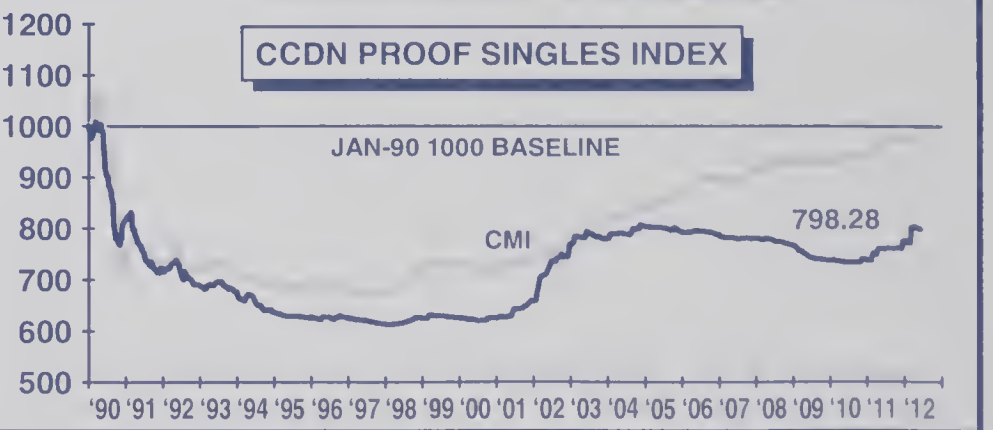

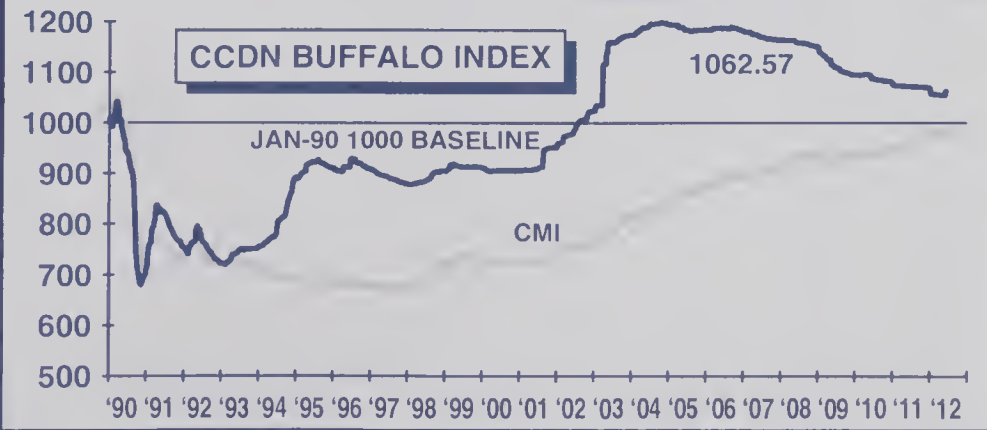

Plus signs are peppered amongst a multitude of early and late-date Buffalo Nickels denoting mostly moderate advances. Some Buffs, however, got more than a good jolt of energy and pegged on considerable gains. A few of the top performers on a percentage basis include 1934-D issues in PCGS MS64 jumping 83% followed by 1925-S issues in NGC MS63 and those popular 1937 Buffs in NGC MS67, both of which are now 29% higher. CAC free Mercury Dimes neither advanced nor declined, and have stayed somewhat in the shadows this week to allow their successor cousins to take the spotlight. Teletrade offered two Roosevelt Dimes from the Just Having Fun Collection this past weekend, a 1953 and a 1953-S, both graded MS67FB by PCGS, which sold for a respective \$2,703 and \$1,840. The doldrums for late-date Gem Walkers persisted, as several of these issues in MS65 retracted back to their Bid level of early last month. However, 1947 and 1947-D examples in PCGS MS67 continue to tantalize and awe the market with yet more dramatic increases this week as the latter issues have now risen by 33% just this year. Most of the motion within the Gold Type segment maintained an upward direction for virtually all common Double Eagles, and included a number of fractional denominations advancing in the MS61 thru MS64 grade range. Strictly graded and premium quality better date Gem Gold of any denomination remains particularly elusive and often sells for considerable premiums when found on the bourse or at auction.

Dealers are gearing up for the Baltimore Expo running from June 28 to July 1 with an auction by Stack's Bowers. See some of the many highlights herein. Included in the sale is the 1879 \$4 Flowing Hair Stella in NGC Proof 68 Ultra Cameo, a pop one coin with none finer. Also in this auction is the single finest example Ultra High Relief \$20 Saint graded PR69 by PCGS. In addition, the finest known PCGS registry set of Liberty Nickels will be broken up and sold as 80 separate lots, and this show will include the Presidential Coin and Antique Company Auction 82 of Exonumia Saturday, June 30.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity, including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

UPDATE!

CAC Stickers Do Not Add Value!

Then why do CAC stickered coins bring a premium?

While it is true that CAC-verified coins bring a premium in the market, the "little green" sticker is not what adds the value. Truth is, with or without a CAC sticker, a quality coin will always bring a premium.

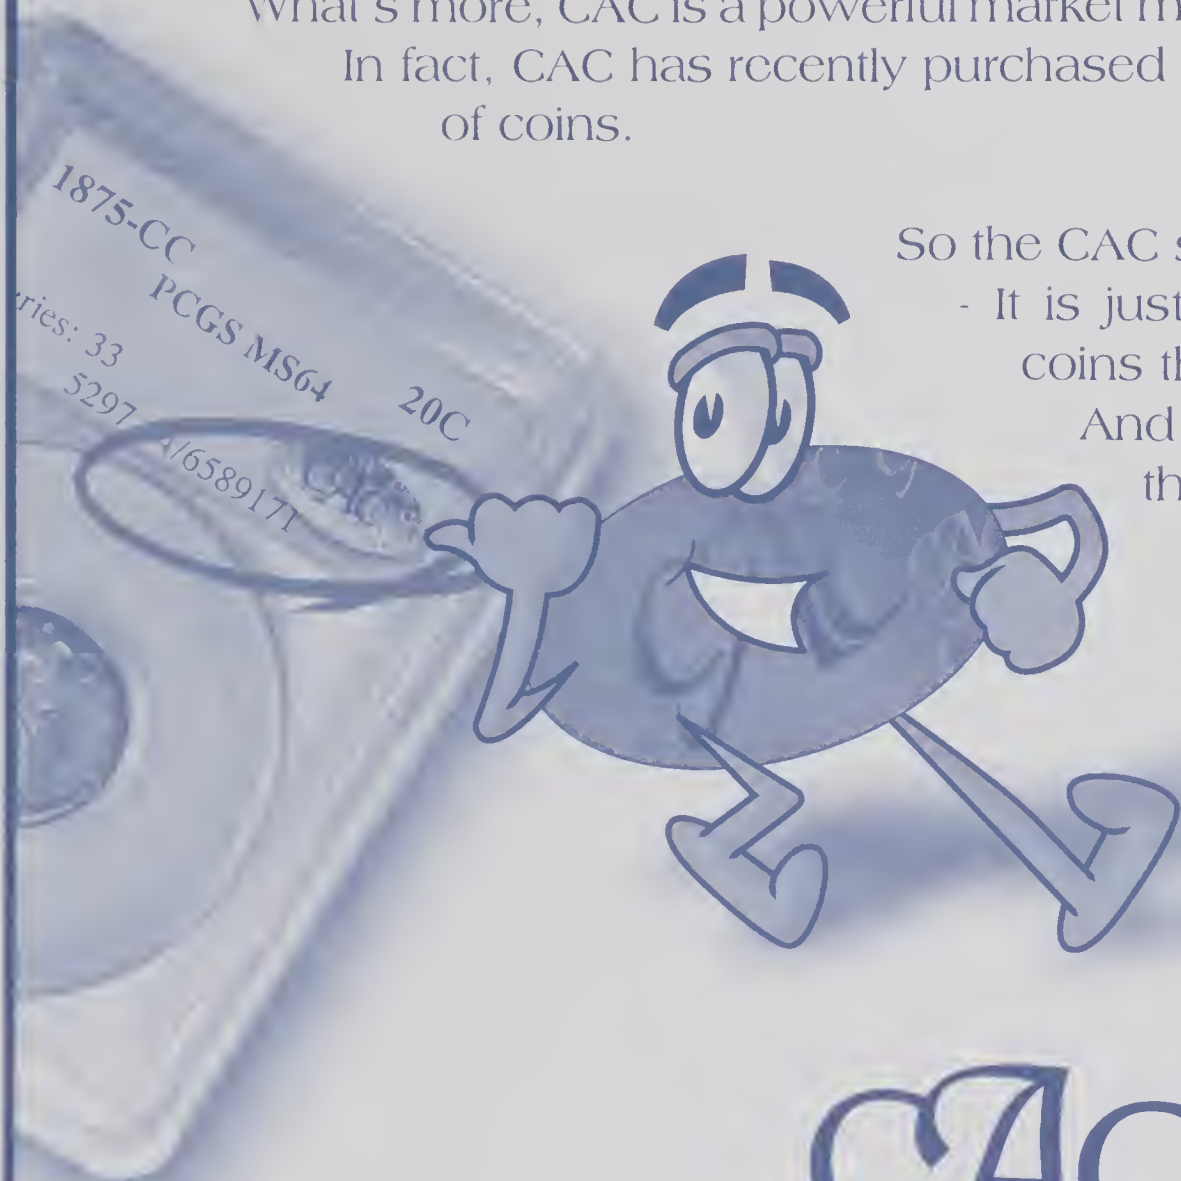

CAC has evaluated over ~~250,000~~^{350,000} coins with a market value over ~~\$1.3 billion~~^{\$1.7 billion}. Only those coins which meet stringent standards for quality within a grade are awarded a sticker. That is why CAC stickered coins bring a premium - they are placed on only quality coins.

What's more, CAC is a powerful market maker for its stickered coins.

In fact, CAC has recently purchased over ~~\$200,000,000~~^{\$250,000,000} worth of coins.

So the CAC sticker does not add value
- It is just an easy way to identify
coins that are solid for the grade.
And it gives you confidence in
the value of a coin.

*The CAC sticker
doesn't add value,
it just helps
to identify
a quality coin.*

Market Column Revealing

Baltimore—Center Of Attention

It has been a pretty active week for trading certified coins through the dealer-to-dealer wholesale trading networks, with over \$415K in material changing hands sight-unseen. Generic Gold Type has firmed up during the first part of the week, accounting for the bulk of these reported transactions. Common date Morgan and Peace Dollars follow in terms of the amount of sight-unseen trading activity taking place. A number of Walking Liberty Half Dollars along with a handful of Proof Singles and Classic Commems were also exchanged sight-unseen, but the majority of these transactions are virtually always led by Type Gold and Dollars. Trading activity will likely slow down a bit on the wholesale networks as is the tradition heading into a large national show such as next week's Baltimore Expo to be held June 28-July 1. Many dealers will be in the Old Line State prior to show in anticipation of consummating private deals, auction lot viewing and old fashioned schmoozing with dealer buddies. Stack's Bowers is the official auctioneer of the Expo and will begin their public sale on June 27. Included in the sale is the 1879 \$4 Flowing Hair Stella in NGC PR68 Ultra Cameo, a pop one coin with none finer. Also the finest known PCGS registry set of Liberty Nickels is set to see the gavel along with the single finest example Ultra High Relief \$20 Saint-Gaudens graded PCGS PR69. Optimistic that this coin will sell, PCGS is holding an informal "Guess the Price" contest for a chance to win a Gem \$20 Saint. The winner will have posted their closest guess to the actual price realized (including premium), whether over or under, to PCGS prior to the start of the auction. So far, over 680 guesses have been recorded and range from \$140K to \$10.8 million with the majority falling in the \$2-\$4 million range. Collectors Corner's Coin Search mobile app will make its second appearance at the Baltimore show after a successful debut in Long Beach earlier this month. Currently users can locate the table locations of nearly 3,400 certified coins and other items listed for sale by 15 CCE member dealers who are participating.

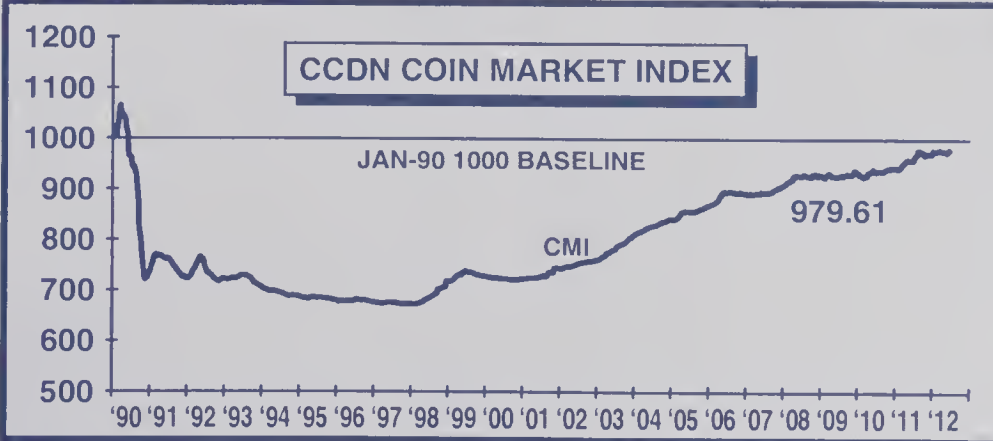

Both good news and bad is seen within the Silver Commemorative segment this week. The good news is, not only are some Commems heading higher, the advances outnumber declines by a ratio of nearly 2:1. This is the second consecutive week where plus signs dominate minus signs. Margins between sight-unseen Bid and wholesale Ask have become extremely tight for several of the better issues, offering little downside risk to buyers. Isabella Quarters in MS64 are one such example with sellers at \$725 and unconditional buyers paying \$710, making for a \$15 spread. Hawaiians in NGC MS64 and MS65 are another example of little room between offers to buy and sell, with spreads as low as 2%. This information can be seen in this week's Market columns along with several examples that have sold at retail public auction in the recent month for less than standing sight-

unseen buy offers. Gold Commems remain healthy with visible support for most issues at or near current levels.

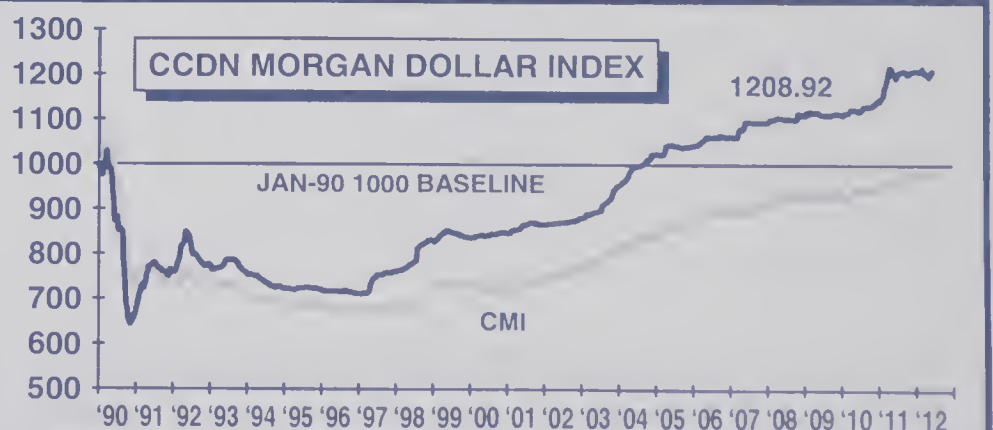

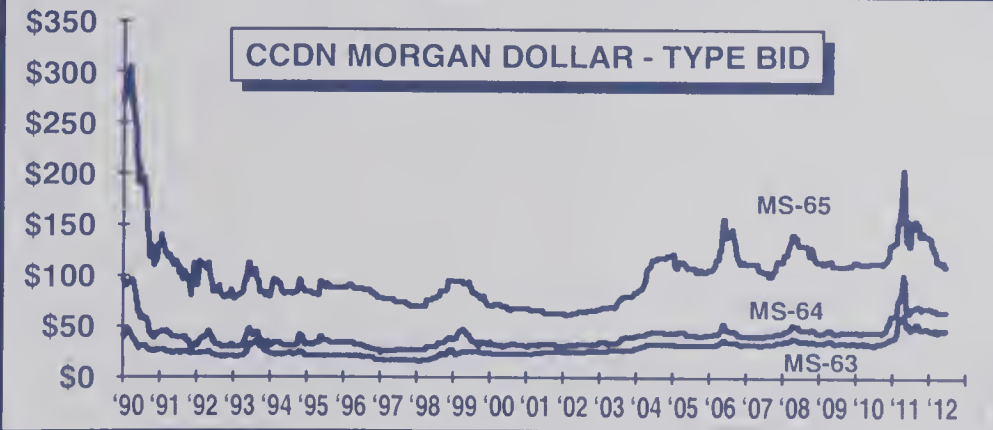

Morgan Dollars are experiencing some positive movement among a few slightly better dates with a concentration in the lower Mint State grades. Many of these new increases are trumping the lower retail prices collectors recently paid in winning these slabs in online auctions. Market column prices preceded by an "a" denote these examples that sold at auction, which are up to 20% less than dealers are paying sight-unseen. Similar auction results can also be found within Peace Dollars this week; however, the majority that sold for less than Bid realized within one Bid increment or less than 10%. Mint State Type continues to uphold well in the sight-unseen arena at a time when quality coins and an emphasis on eye appeal have become an ever increasing factor in the overall rare coin marketplace. Copper and Nickel material are unchanged while Silver experienced a minor correction for Gem NGC Barber Dimes. Another pair of tight market-maker spreads where the high buyer is also the low seller can be seen in the NGC MS64 column where the spread is \$50 and \$100 for Trade Dollars and 1853 A&R Seated Half Dollars respectively. Proof Type is eerily quiet for all metal compositions with not a single adjustment to report. Barber Halves in NGC PR67 have a \$5,300 payday available for any of the 364 graded at this level, while they are being offered for sale at \$5,425.

Buffalo Nickels are continuing to receive some much needed attention with nearly a dozen increases recorded on top of last week's 54 advances. Additional increases are likely needed in order to bring most of these little beasts to market as all but two of these new Bids are still quite a distance from what these have brought in public sales. Walker Bids are adjusting slightly higher in Choice and Gem for select common dates. For the most part, many of these slabs are readily available in online auction venues at or below current levels as testified by the handful of declines present.

Following a statement by Ben Bernanke that the jobs market has slowed, Gold plummeted from \$1,626 at the beginning of the week to \$1,565 today. The spread between Gold and Platinum narrowed to \$126—down from a peak gap of \$219 last December. Silver dipped to \$26.83, dropping over 6% from Monday's Spot of \$28.67 an ounce. Jobs grew at the slowest pace in a year this May, and the jobless rate has been above 8% since February of 2009. Today's \$50 drop in Gold Spot had little effect on the Gold Type market as only a single decline is present. Fractional Gold Type is actually increasing with gains as high as 6% from our last report for \$5 Indians in MS61 and for common Gold Dollars in MS62-MS63. Premiums are increasing here as well and will continue to do so if Gold Spot and Type proceed in opposite directions.

NGCNumismatic Guaranty Corporation of AmericaSarasota, FL (800) 642-2646

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity in the nationally reported sight unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDn may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid by Auction. Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are not the same as the Bids of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.
